FOREWORD

It is a matter of immense pleasure for me to bring out the 21st edition of 'Finger Prints in India' for the year 2017. Its publication had started in the year 1997.

The publication got somewhat delayed as the data collection proforma had been extensively revised in order to collect in-depth information under crime specific heads and sub-heads. The publication contains details of the important cases solved by the Central Finger Print Bureau (CFPB) as well as State Finger Print Bureaux (SFPBx) through use of Finger print science. The publication also carries information on transaction activities of SFPBx, including visits to different scenes of crimes, number of chance prints developed, document cases examined, experts opinion given in Courts of Law etc. It is a matter of satisfaction to note that the Finger Print staff of various State Bureaux visited 45,597 scene of crimes and developed 14,794 chance prints. The Bureaux also examined and gave opinion on 1,667 document cases.

The NCRB has floated a global tender for procurement of National Automated Finger print Identification System (NAFIS), to be available across all the States/UTs Bureaux and all the Police districts/ Commissionerates in an integrated manner. To enable them to feed finger prints and to make searches across national database in the subsequent phase all the police stations across the country will be provided with Finger Print enrolment devices. NAFIS will provide unique identifier for establishing the identity of the accused in CCTNS. A mobile app will be part of NAFIS and police officers in the field will be able to verify the antecedents of suspects by their finger prints.

NCRB is also making efforts for amendments in the Identification of Prisoners Act, 1920, so as to empower police officers/FP experts to capture advanced biometrics of accused persons and also to remove mandatory one year rigorous imprisonment clause in case of convicted persons for taking FPs.

Further, the XVIII All India Conference of Directors of Finger Print Bureaux of States/UTs was organized on 30th & 31st March, 2017 at Haryana Police Academy (HPA), Madhuban, Haryana. A total of 99 delegates from various Finger Print Bureaux of the States/UTs, CFSL-CBI, CFPB/NCRB, Colleges and Universities participated in this two day event and deliberated on important issues related to Finger Prints.

The strength of CFPB staff in NCRB has been augmented through recruitment of 32 Sub-Inspectors (FP) and 04 Head Constables (FP) against vacancies. This staff has undergone 18 weeks of training at CFPB/NCRB Head Quarters as well as State/UT FPBx.

I take this opportunity to compliment Central Finger Print Bureau team for their sustained efforts in revising input collection proforma and bringing out this publication. I am sure that the present edition of this annual report will be found useful by all stake holders. Suggestions, if any, are welcome.

EXECUTIVE SUMMARY

‘Finger Prints in India-2017’ is the 21st edition of annual publication of Central Finger Print Bureau (CFPB) under the aegis of National Crime Records Bureau (NCRB) which presents the annual performance reports for the calendar year 2017, of the Central and State/UT Finger Print Bureaux (SFPBx), including the activities, achievements, database status, trainings undertaken as well as other useful information such as relevant laws, equipment, and relevant books all at a glance, enabling the Finger Print experts, readers and the stake holders throughout the country to equip themselves with the latest developments in the field.

Chapter-I- ACTIVITIES OF CENTRAL FINGER PRINT BUREAU

In the year 2017, CFPB was able to examine and send opinion/report in 84 document cases received from Nationalized Banks, Recruitment Agencies, Insurance companies, and 183 chance prints received from various State/UT Finger Print Bureaux. The bureau has been able to achieve a search slip trace percentage of 19.87. The bureau organized the XVIII All India Conference of Directors of Finger Print Bureaux on 30th & 31st March, 2017 at Haryana Police Academy (HPA), Madhuban, Haryana with a participation of 99 delegates. In the 61st AIPDM which was held from 24th to 28th February, 2018 at TNPA, Chennai, Tamil Nadu, a team of CFPB Experts conducted Finger Print competition consisting of practical and viva-voce. CFPB also conducted the All India Board Examination for Finger Print Experts (AIBE)-2017, during 26th to 28th March, 2018 for accrediting Finger Print personnel from States/UTs. In AIBE-2017, 10 candidates appeared, and all of them were declared qualified, Sh. Ajesh K. V. from FPB, Kerala secured the first position.

The process of procuring long awaited National Automated Fingerprint Identification System (NAFIS) has started. The Request For Proposal (RFP) prepared by CFPB experts for NAFIS has been approved by MHA and a global tender has been floated to procure world class NAFIS for Indian Police. NAFIS aims to function as the central repository of all crime and criminal finger print data available in all States/UTs, and facilitate a national level searchable finger print information repository.

A detailed proposal to amend the existing Identification of Prisoners Act, 1920 (IPA) was sent to MHA for approval by CFPB/NCRB in the month of July 2018. The Act, if amended, would include more number of slips of arrestees / convicts leading to a significant increase in the national database. The proposed key amendments including, but not limited to, are - Change of title to ‘Identification of Arrested and Suspected Persons’ Act’; Inclusion of advanced Biometrics such as Palm Impressions, Voice samples, Iris Scan, DNA typing etc.; Removal of mandatory one (01) year Rigorous Imprisonment clause; Powers to Magistrate to order taking measurements of juveniles.

Chapter-II- ACTIVITIES OF STATE FINGER PRINT BUREAUX

Main responsibility of FP expert is to develop the chance prints left by criminals at the crime scene and to match with the fingerprints of the existing criminals. Further, FP experts also receive fingerprint slips of arrested persons for providing the previous criminal history by comparing fingerprints. Expert opinion is given on the questioned documents referred to the Finger Print Bureaux. Since, the

total number is very large, each state has submitted few important cases based on the sensitivity, value of property lost/recovered, detection of series of cases etc for printing in this publication.

In the year 2017, experts from SFPBx visited a total of 45,597 crime scenes and developed 47,538 chance prints. SFPBx has forwarded details of 95 important cases solved through finger prints in the calendar year 2017 to CFPB for inclusion in the annual report, out of which 63 were shortlisted for publishing in FPI-2017 which included cases of murder, theft, dacoity, robbery, Arms Act and NDPS Act.

Chapter- III- TRANSACTION ACTIVITIES OF CFPB AND SFPBx

State wise statistics related to transactional activities such as number of FP slips of convicted and arrested persons received, accepted and enrolled, number of crime scenes visited, number of chance prints developed and compared, number of document cases received and opinion given are covered in this chapter. CFPB received 41,841 cases for search in the central database. State Finger Print Bureaux received a total of 66,047 finger print record slips from Districts / Police Stations in the year 2017. Further a total of 6,14,622 were found fit and accepted for conducting search in the respective databases of Finger Print Bureaux of States/UTs. A total of 1,880 document cases were received in the SFPBx out of which 1,667 cases were examined by FP experts. In 325 cases, FP experts from various SFPBx deposed in the Courts of Law for testimonies. In case of development of chance finger prints from scene of crime, State of Kerala topped the list with development of 10,919 chance prints, followed by 9,620 chance prints by Andhra Pradesh. State of Andhra Pradesh topped the list by identifying 1,446 chance print cases and in document cases Madhya Pradesh topped with 189 cases. Following table shows the all India Statistics of the fingerprint transactions in States/UTs during 2017.

	Convict Slips Received	Arrestee Slips Accepted	Chance Prints Developed	FP Document Cases Received
TOTAL	66047	6,14,622	47,538	1,880

Chapter- IV- ANALYSIS OF FP TRANSACTION ACTIVITIES

This chapter consists of the analysis of various finger print related transaction activities performed in States/UTs. Extensive changes have been made in the Annual Statistics Report Form 2017, which has led to the addition of many crime specific heads and sub-heads. This revision of ASR 2017 form has facilitated in gathering crime specific information from the States/UTs.

The States of Madhya Pradesh, Andhra Pradesh, Rajasthan and Uttar Pradesh have examined a large number of document cases. States such as Maharashtra, Madhya Pradesh, Gujarat, Punjab and Telangana have recorded the highest number of arrestee slips. Record slips of those convicted for murder, grievous hurt, rape and attempt to murder are the highest in number as compared to other IPC heads whereas the search slips recorded also demonstrate a sharp rise in crimes such as Kidnapping,

Abduction and Assault on women. The number of persons arrested and convicted for the offence of Theft is higher than those involved in Robbery, Burglary and Dacoity. The number of persons arrested and convicted for NDPS comes second after other SLL crimes. States of Rajasthan and Tamil Nadu have received a significant number of conviction slips but were not updated on AFIS. States of Karnataka, Telangana, Andhra Pradesh, West Bengal are also lagging behind in the count of conviction slips.

Chapter- V- CAPACITY BUILDING

This chapter consists of the information pertaining to Capacity Building and various training programs conducted during the calendar year. CFPB/NCRB organizes a number of training/refresher courses for police officers/staff of FPBx from India as well as from foreign countries. In the year 2017, CFPB undertook the initiative in the direction of capacity building by direct recruitment of 32 Sub-Inspectors (FP) and provided them with 16 weeks in house training along with a 15 days police orientation training at CBI Academy, Ghaziabad. 04 Head Constables were also recruited for CFPB along with the Sub-Inspectors (FP).

ANNEXURE:

Useful information like Pioneers of Finger print Science, laws related to finger prints in India, Recommendation of XVIII All India F.P. Directors conference, Staff posted in various Finger Print Bureaux, history of automation of finger prints, availability of different type of equipment in each State/ UT, list of AIBE toppers, standard books on finger print science, contact details of State FPBx are covered in annexure part of the publication.

METHODOLOGY OF DATA COLLECTION AND CONTENT FORMATION

The Bureau brings out its annual report entitled 'Finger Prints in India', which is a collection of statistical data on the performance and activities of States/UTs Finger Print Bureaux, CFPB, and other information related to Finger Prints (FP).

A. DATA COLLECTION AND COMPILATION PROCESS

The process of publication of the annual report i.e. 'Finger Prints in India' consists of the following steps-

- i. At the end of every calendar year, the CFPB/NCRB used to send out requisition letters addressed to all the Finger Print Bureaux of the country to send data and information about their activities in the standard Annual Statistics Report (ASR) form. It had the following details :
 - a) Number of convicted persons' finger prints maintained at the State Finger print Bureau during the beginning of the year, number of FP slips added in the year under consideration , FP slips received but returned back to police station due to errors, number of FP slips digitized and entered into AFIS, number of FP slips eliminated.
 - b) Similar type of information is received in respect of arrested persons.
 - c) Number of FP cases received at Finger Print Bureau seeking previous criminal history, number of cases traced pendency at Finger Print Bureau.
 - d) Record of convicts such as who prepared FP slips, method of preparation of FP slips, governing rules, dispatch of slips.
 - e) Category of offences for which Finger Prints obtained in the State Finger Print Bureau.
 - f) Single Digit Section, Scene of Crime details, Documents Section, Absconder Action/ Death Reports.
 - g) AFIS details regarding its connectivity and functionality status in SFPBx along with availability of FPLive Scanner.
 - h) Details of training courses being run, its faculty strength and cross-section of officials attending it.
 - i) Organizational structure of existing FPBx of States/UTs and DFPB as well as source of allotment of funds to them.
 - j) Summary on the milestones achieved by the Bureaux of States/UTs and suggestions for future developments.
- ii) On receiving the data from States/UTs, CFPB officials compile and verify with the statistics of

previous years. If any abnormality is noticed, then concerned States/UTs are asked to reconfirm/rectify.

iii) Based on the reconfirmed date, this publication is prepared.

B. CHANGES/ IMPROVEMENTS IN CURRENT PUBLICATION (2017)

- From the year 2017, the data collection proforma has been revised to seek additional information in connection with the crime data related to finger prints by categorizing into various crime heads such as; Murder (Section 302), Culpable Homicide not amounting to Murder (Section 304), Causing death by Negligence (Section 304-A), Dowry deaths (Section 304-B), Abetment to suicide (Section 305/306), Attempt to Murder (Section 307) & Culpable Homicide (Section 308), Grievous Hurt (Section 325,326), Acid Attack (Section 326A,326B). Assault on Women (Section 354,354A, B,C,D), Kidnapping & Abduction (Section 363, 363A, 364, 364A, 366A, B & Section 365 to 369) Human Trafficking (Section 370, 370A, 372, 373), Rape (Section 376) etc
- New columns have been added to include information on finger print (Record and Search) slips about Foreign Nationals committing crime in India and also about Indians involved in crime abroad.
- New column for showcasing the R&D activities taking place in the SFPBx is added.
- Chance Print (Scene of Crime) section is modified and a tabular form is introduced to display a clear picture of chance print comparison happening in SFPBx and in districts. The table has a column to specify Chance Prints lifted by Finger Print staff, police personnel or other staff.
- Document Case section is augmented with the information about the source of document: Government or others.
- Provision is made to furnish Judgment details in the proforma
- A new capacity building section has been added to furnish the details of training and state wise staff trained, both from police as well as non-police background.
- Organizational infrastructure has also been revised to include sanctioned strength, actual strength, vacancies etc. and also finger print equipments.
- Information on vehicles available for finger print work at State, district and police station levels is also introduced.
- In chapter IV, analytical and graphical representations of transactional details of the states have also been presented for ease of comprehension and comparison.

Chapter-1

ACTIVITIES OF CFPB

The Central Finger Print Bureau is an apex body in the country which co-ordinates, guides, monitors and provides technical support to the State Finger Print Bureaux, as well as investigation agencies and international organizations like INTERPOL in all matters related to Finger Print Science.

The Bureau maintains the records of 10-digit Finger Print slips of persons convicted under various laws as per OM No. 115/POLICE (L)/55(8) Intelligence Bureau, Ministry of Home Affairs, Government of India, Dated 19.02.1955, on the subject of 'Establishment of CFPB and Instructions to be followed by State Bureaux and District Police Officers in sending FP Record Slips'. As on 31.12.2017, number of digitized Finger Print slips maintained in the database is 11,34,235 which is tantamount to over 11 million (or one crore finger impressions). State Finger Print Bureaux and INTERPOL (through CBI) are regularly requesting CFPB to furnish the previous criminal antecedents of the arrested persons by sending the arrested persons Finger Prints. Similar requests are also being made to CFPB with respect to Chance Prints developed at the scene of crime.

The Bureau imparts training in various aspects of Finger Print Science to police and non-police personnel coming from States/UTs of India as well as abroad, as per Indian Technical and Economic Cooperation (ITEC) and Special Commonwealth African Assistance Programme (SCAAP) of Ministry of External Affairs. The Bureau is also mandated to conduct All India Board Examination (AIBE) annually for the accreditation of Finger Print Experts. All India Conference of Directors of Finger Print Bureaux of States/UTs is also being organized by CFPB with the assistance of a State which is ready to host the event. The conference provides a forum for Finger Print professionals to deliberate on recent advancements in the field of Finger Print science and other issues concerning Finger Print fraternity of the nation. CFPB has a branch at Kolkata which is mainly organizing training courses for North Eastern States and examining the questioned documents.

A. Important Document Cases Solved at CFPB, New Delhi

During the year 2017, New Delhi Office has given opinion on 84 questioned document cases which includes cases referred from Banks, Income Tax Authority and Judiciary. Brief descriptions of few notable cases are described below:

i. Document Case number 72/2016 (examined in 2017)

The referred case is one of the many suspected cases sent by CAPF for examination of Finger Prints for verification purposes. The authorities taking note of the gravity situation and sought the help of Central Finger Print Bureau. The FPs of suspected candidate taken during different stages of examination was sent to CFPB for examination and to give opinion. The case was allotted to Finger Print expert on 28.10.16 and the report of examination was sent on 12.01.2017. The job was very laborious and the prints were too bad and concerned document on which the print reflecting the impersonation was a

Xerox Copy of OMR sheet. Finger Print expert satisfied that there was impersonation in that case and the questioned print affixed on the answer sheet of the written examination was different from the specimen prints and prints affixed at different other stages of examination. Solving case of impersonation has not only helped to CAPF to initiate action on the erring applicant.

ii. Document Case No. 2/2017

The case requires special mention here because of it being a scene of crime print. This case was received from Dy. Superintendent of Police, CID, Andaman & Nicobar Islands, related to a theft case u/s 457/380 IPC, of PS Aberdeen, A&N Islands. The case involved comparison of sixteen (16) chance prints with eleven (11) search slips of suspects. Although the chance prints were of very poor quality, yet the experts at CFPB could conclusively establish that one of the Chance Print was identical with one of the finger impression in search slip supplied as suspect slip, thus helping the authorities in nabbing the criminal.

iii. Document Case No. 6/2017

This case was sent by district Superintendent of Police, Mandasaur, on directions of CJM, Mandasaur. It was a property dispute case in which Director, Finger Print Bureau, State Crime Records Bureau, Police Headquarters, Bhopal had already furnished the opinion on the case but the case was sent for re-examination by central agency on the request of woman (seller of the property). The case involved sales of four (04) properties vide four different registries. The specimen Finger Prints of the petitioner were extremely poor and not bearing identifiable characteristics due to very advanced age of the petitioner. The issue was to identify the seller with the impression; the CFPB experts involved, put in their best consistent efforts and could establish the identity of the seller conclusively.

iv. Document Case No. 48/2017

Assistant Commissioner Officer (ACO), Central Excise, Customs & Service Tax, Bhubaneswar, Odisha sent documents for Finger Print examination and furnishing expert opinion with respect to the candidate Shri Kumar Abhijeet recruited as Inspector by Staff Selection Commission. There were allegations and suspicion of impersonation. The case was examined by CFPB, NCRB expert who with his painstaking and consistent efforts could bring out the points of similarities in otherwise seemingly non-decipherable prints. The finger impressions were of extremely poor quality, but through the sustained efforts put in by the CFPB experts yielded the result, and the identity of the candidate was established as genuine, restoring the dignity and respect of a genuine candidate.

v. Banking Recruitment Cases

In Punjab National Bank recruitment, Institute of Banking Personnel Services (IBPS) authorities observed mis-match in Thumb Impressions affixed by the candidates on call letters for CWE/Interview and suspected impersonation. For further scrutiny, they called the original Attendance Sheets for CWE/Interview from IBPS, in respect of the suspected candidates. CFPB was requested to examine the finger prints related to suspected candidates who were selected as Management Trainees at Punjab National Bank.

The prints were of very poor quality, but the experts at CFPB with their due diligence, perseverance and expertise could conclusively establish impersonation in seven (07) cases, which had oc-

curred at the time of written examination, thus helping the bank authorities to take necessary action. The clearance of remaining candidates from suspect list could help authority handover appointment letters to the genuine candidates restoring their dignity. Impersonation in certain cases was proved, thus helping the authorities in cancelling the candidature and to start proceedings against them.

vi. Recruitment cases in CRPF

The recruitment cases were sent by CRPF authorities for examining the doubtful individuality in recruitment of constables. In these cases, Finger Prints along with signatures were taken at different stages of examination like written examination, document verification, interview, physical examination and on recruitment form etc. which had to be compared with the specimen prints of the candidates. In all these cases experts at CFPB established that the prints taken at all the stages were identical thus proving that the candidates were genuine and they personally appeared at every stage of examination. Thus apart from restoring the respect, dignity and honor of the candidates CFPB, NCRB could help the authorities to handover appointment letters to the genuine candidates.

B. Important Document Cases Solved at CFPB, Kolkata

During the year 2017, Kolkata Office had given opinion on 96 questioned document cases which include cases referred from Government and PSUs. In one of the interesting case, FP expert visited the scene of crime at IIT Kharagpur and collected Finger Prints of 47 persons (staff) related to a case of theft by making a duplicate master card for entering in a room of a Guest Faculty. Brief descriptions of few other notable cases are described below:

i. CFPB/NCRB/Kolkata Case No.37/2016 (examined in 2017)

This document case was received from State Bank of Bikaner, Kolkata. In this case the questioned LTI purported to be put up by Sh. Alok Chakraborty, appearing on Registration Certificate issued by the Finance Department, Government of West Bengal was found IDENTICAL with the specimen Finger Impression of suspected public servant Sh. Dipak Kumar Ghosh working as Telecom Technician at Calcutta Telephones, BSNL. The examination of finger impression confirmed the suspicion of authorities, thus helping them find the fraud.

ii. CFPB/NCRB/Kolkata Case No.46/2017

On 18.07.2017 a document case has been received by this unit from BSF, Kolkata for verification of Thumb Impression of a candidate in connection with recruitment for the post of Constable (GD) in CAPs & AR. On being declared medically unfit during the course of recruitment, the candidate Sri Anupam Jana filed a writ petition in Hon'ble High Court regarding his recruitment and as per direction of Hon'ble Court the candidate was examined at Command Hospital, Eastern Command Kolkata where he was declared medically fit. Both specimen and questioned finger prints of the candidate were thoroughly examined and found that both are 'IDENTICAL'. Report (findings) were sent accordingly.

iii. CFPB/NCRB/Kolkata Case No. 67/2017

This case has been received from CBI, Kolkata where in LTI of a candidate namely Prashant Bajpai for IBPS examination for the post of Probationary Officer has been obtained on the call letter for

online exam, call letter for interview and interview attendance list. But after thorough examination by this unit, it was detected that the LTI, appeared in the online examination attendance list was of a different person. The specimen finger prints of one Shri Rajeev Ranjan, an officer of Central Excise, Durgapur, provided by the CBI/Kolkata was found IDENTICAL with the finger impression appeared in the attendance list for online examination. It appears that Shri Rajeev Ranjan of Central Excise had appeared in the online examination in place of Prashanata Bajpai. Report (findings) were sent accordingly.

iv. CFPB/NCRB/Kolkata Case No. 85/2017:

Received from Divisional Railway Manager, East Central Railway, Danapur. In this case, the questioned Finger Impressions against the name of Late.Ganpat Pal, Ex.Trackman/DLN, E.C.Railway, submitted by his daughter Smt. Sahodara Devi appeared in the Adoption Deed has been detected as IDENTICAL with the questioned finger impressions against the name of same person, appeared in the Medical Memo and Service Book. Finger Print examination conducted by this unit has revealed the genuineness of the claimant.

v. CFPB/NCRB/Kolkata Case No.2/2017

This land disputed case has been received from Ld. Sub-Division Judicial Magistrate, Koderma, Jharkhand. Thoroughly examined the questioned Finger Prints against the name of Bajo Sao and Suresh Sao, appeared in the different sheets of Sale Deed. Also examined the best legible ten digit specimen finger impressions against the name of Baijnath Sao @ Bajo Sao. It is found that the said questioned finger impressions of Bajo Sao are DIFFERENT from the specimen finger impressions against the name of Bajo Sao. The result of examination disclosed that Suresh Sao, brother of Bajo Sao has sold out the land by affixing the finger impression of some other in the questioned documents (sale deed).

C. OTHER ACTIVITIES AND EVENTS BY CFPB

1. Procurement of National Automated Finger print Identification System (NAFIS)

Currently installed Automated Finger Print Identification System called FACTS 5.0 has become obsolete and its supplier has advised CFPB to replace it with latest system called FACTS 7.0 Actually, FACTS 5.0 was designed for capacity of one million FP slips and we have crossed that limit. When CCTNS was conceptualized in 2011, M/s PWC was engaged as consultant for preparation of RFP to procure National Automated Finger Print Identification System (NAFIS). However, MHA dropped that plan with an intention to use Aadhaar system. Since, Unique Identification Authority of India (UIDAI) has denied sharing their data with other agencies, NCRB has requested MHA to accord an approval for procurement of NAFIS and in-principle approval was given on 25.08.2017. NCRB officers prepared RFP document without engaging any Consultant. Highly cost effective architecture is proposed by which States need not have to procure their own AFIS. Even the States, who have recently procured latest AFIS, can utilize their investment because their data can be replicated to centre. NAFIS aims to function as the central repository of all crime and criminal finger print data in the country. NAFIS and CCTNS are proposed to be integrated, so that Finger Print Expert need not have to enter the demographic details of the criminal because they will be coming from CCTNS. Regular Criminal Number (RCN) maintained in NAFIS will be shared with CCTNS so that uniqueness of a criminal can be established.

NAFIS would also be capable of complete integration with other biometric systems such as Iris, Facial Image Recognition etc. IFD/MHA examined the RFP and gave an approval for floating the NAFIS tender.

2. Amendments in Identification of Prisoners Act 1920

CFPB requested all States/UTs to offer their views about the amendments required in Identification of Prisoners Act, 1920. Representatives of few neighboring states like Haryana, Delhi, and Uttar Pradesh along with BPR&D were invited to NCRB and lots of deliberations were made in this regard. Information about modern biometrics was collected and a detailed proposal was prepared highlighting all the clauses that require amendment. Comprehensive justification was also worked out and the same was sent to MHA for approval. Meetings were held at MHA and now the file is being moved to legal department. The Act, if amended would include more number of arrestees/convicts leading to a significant increase in the national database. The key amendments proposed were: Change of title to 'Identification of Arrested and Suspected Persons' Act'; inclusion of biometrics such as Palm Impressions, Voice samples, Iris Scan, DNA typing etc.; Removal of mandatory one year rigorous imprisonment clause; powers for Magistrate to order for taking measurements of Juveniles.

3. XVIII All India Conference of Directors of Finger Prints Bureaux of States/UTs at HPA, Madhuban, Haryana on 30th and 31st March, 2017

CFPB with the assistance of Haryana Police organized the XVIII All India Conference of Directors of Finger Print Bureaux on 30th and 31st March, 2017 at Haryana Police Academy (HPA), Madhuban, Haryana. A total number of 99 delegates from various Finger Print Bureaux of the States/UTs, CFSL-CBI, CFPB, / NCRB, Colleges and Universities offering Forensic Science and Criminology courses participated in this Conference. Shri Y P Singhal, IPS, DGP, Haryana (Prison) the Chief Guest, inaugurated the Conference on 30th March, 2017 in the esteemed presence of DGP, Haryana Shri K.P. Singh, IPS. ACTIVITIES OF STATE FINGER PRINT BUREAUX

Finger Print Bureaux operating in States/UTs are assisting Police in their investigation by visiting scene of crime and matching the chance print developed at scene of crime with the FP database. Some of the important cases solved through Fingerprint science in various states are highlighted below:

ANDHRA PRADESH

1. P.S. Anakapalli Town, District Visakhapatnam Rural, FIR No. 261/2017 Dated 4/5 and 5/6.11.2017 u/s 457, 380 IPC

Some unknown offenders gained entrance into the AP Grameena Vikas Bank, Kotturu Branch, Anakapalli town by cutting backside window grill with gas cutter in the night of 4/5, 5/6 Nov 2017. By making hole in the iron safe locker with gas cutter they looted 3.175 Kg gold. T. Vijaya, Finger Print Expert with a team reached the scene, examined it minutely and developed 16 chance prints on objects or articles such as left door of Iron almirah in locker room, plastic water bottle with lid, stainless steel lock, inside frame of the wooden window which was then sent to State FPB. Two of the chance prints matched with left little finger and right middle finger impressions of suspect Gangadhar @ Sadasiva S/o Chandra Sekhar. Moreover, two more associates were caught on 20.11.2017 and 1.841 Kg gold was recovered. The accused was arrested on 20-11-2017 and the case is under trial.

2. P.S. Eluru Rural, District West Godavari, FIR No. 210/2017 Dated 07.11.2017 u/s 392 IPC

This is the case of Robbery where Sri K. N. Murthy, FP Inspector visited the scene of offence and developed nine (09) chance prints on the objects and articles such as steel almirah door, plastic box and Steel almirah locker door. After examination/elimination, the Inspector sent two chance prints to AFIS Central Server through online network. It has been processed against FP data. Sri K. Praveen Kumar, SI verified and identified the query CHP with right thumb impression and left little finger impression of Syed Abbas @ Saleem S/o Pasha. Based on the information given by the FP Expert, the offender was arrested on 23/11/2017 and Rs. 4, 28,000/- was recovered. CHP was the only clue which leads to detection of the case. The case is under trial.

3. P.S. Bhimavaram Rural, District West Godavari, FIR No. 157/2017 Dated 09.10.2017 u/s 454, 380 IPC

In this case, Shri M. Rajesh, SI (FPB) visited the scene of offence on 09-10-2017 and developed five (05) chance prints on the objects such as plastic box, plastic cover, and stainless steel box. After examination/elimination, the SI sent one chance print to AFIS Central Server through online network. It has been processed against FP Data and Sri K. query CHP with left middle finger impression of Guttula Ravi Kumar S/o Subba Rao. Based on the information given by the FP Expert, the offender was arrested on 20-10-2017 and entire stolen property was recovered. The case is under trial.

4. P.S. III Town P.S., Visakhapatnam City, District Visakhapatnam City, FIR No. 315/2017 Dated 22/23.06.2017 u/s 457, 380 IPC

An unknown offender reached the 4th floor of the apartment by scaling over 14 mts. long 'Drainage PVC Pipe and entered into the Flat by breaking open window and committed an offence while the inmates are sleeping. He stood on the cement beams of the sunshade and entered in to the bedroom of the complainant through sliding glass window door (where the window grill is not fixed) for opening the window. The FP Inspector has keenly examined the main bedroom of the complainant and developed chance prints on steel almirahs having various scene of crime articles like plastic jewellery boxes, plastic covers, and containers of cosmetics, dressing table etc., and all the ransacked articles suspected to be handled by the offender in the rest of the flat were also meticulously examined. He could find only the smudged impressions of hand gloves/scene of socks but not the finger prints with ridge details. Though it was risky, the Finger Print Expert has stood on the cement beams to examine the point of entry i.e., sliding glass window and the Outdoor Units of two split Air Conditioners, one window Air Conditioner and most importantly the PVC pipe. With a risky undertaking and efforts, the FP Inspector had developed six chance prints with black powder on top exterior surface of one of the outdoor unit of split Air Conditioners, one print with white powder on the interior portion of broken window glass and found four dust chance prints on the PVC pipe used by the offender to reach the 4th floor of the apartment i.e., scene of crime. The chance prints of this case were searched against the FP records of Andhra Pradesh state on the newly acquired AFIS (Papillion) which resulted in the identification of the same with the Finger Prints of an ex-convict Pokathota Gangadhara Rao @ Siddardha S/o. (late) Venkata Ramana who was later convicted by the court of law.

5. P.S. Penamaluru, District Vijaywada City, FIR No. 615/2017 Dated 22.09.2017 u/s 457, 380 IPC

In this case, A. Prasada Rao, Inspector visited the Scene of crime on 22-09-2017 and developed six (06) chance prints. After examination/elimination, the Inspector sent the chance print to the AFIS central database through online network which were processed and verified against the FP data. N. Koteswara Rao, FP Inspector verified and identified the query CHP. S. with left thumb impression and left ring finger impressions of Sanniyala Venkatesh S/o Subba Rao. Based on the information given by the FP Expert, the offender was arrested on 15-10-2017 and entire stolen property was recovered. CHP was the only clue which leads to detection of the case. The case is under trial.

BIHAR

1. P.S. GRP Bihar Sharif, District Nalanda, FIR No. 03/17 Dated 23.02.2017 u/s 397 IPC

A smart phone of a lady was stolen while she was travelling in a train. She lodged an FIR (P.S. case No. 03/17) giving details viz. IMEI and mobile no. etc. The I.O. asked the mobile operator to put this IMEI no. on surveillance. After sometime, mobile operator informed the police that a man named

Neeraj Kumar Paswan of village Akanda, P.S. Belchi, Dist. Patna is using this set with different SIM. The police immediately caught him but he said that he has purchased it from Janaki Devi of the same locality and that he has the receipt issued by her which bears her thumb impression. Thereafter, the police did a hunt for this lady. The police later caught her from her house and produced before the magistrate where she refused to have sold the mobile. Hence, to prove the guilt, her specimen thumb impression was taken and sent to FPB, Patna for comparison with the disputed finger print on the receipt. The expert at Patna compared the disputed with specimen prints and found it to be RTI of Janaki Devi and thus helped the police to prove the guilt.

2. P.S. Araria R.S.OP, District Araria, FIR No. 466/2017 Dated 30.06.2017 u/s 406, 409, 120 IPC

A fraudulent case of withdrawal of money in the name of Meena Khatoon from Post Office related to Indra Awas Yojna was reported. The case was monitored by Lokayukt office of Bihar. The district administration on the instruction of Lokayukt office sent the withdrawal slip, account opening form and the application of information bearing finger print impression to FPB, Patna for comparison. At FPB Patna, Finger Print Expert compared the prints and gave opinion based on which Hon'ble Judge of the Lokayukt, Bihar delivered Judgment. Thus, finger print science proved to be of significant importance to judiciary in this case.

19. MEGHALAYA

Meghalaya was earlier part of the undivided Assam State and the Finger Print Bureau was located at Shillong. The State of Assam was divided into four States (Assam, Meghalaya, Mizoram and Nagaland) but the FPBx remained common for all the states at Shillong. The Finger Print Bureau of the Meghalaya State was then set up at Shillong in January 1979 as a Single Digit Bureau, Later it became a full-fledged Ten digit State Finger Print Bureau on 16.07.1980. The bureau is functioning under the direct control of ADGP (CID), Meghalaya headed by an officer of the rank of SSP (CID). AFIS (FACTS IV) was installed by CMC Ltd. in 2002 but is presently not functional. It had 4,355 number of Ten-digit finger print slips of convicted persons in its records as on 31.12.2017.

ANALYSIS OF FP TRANSACTION ACTIVITIES

Fingerprint science has evolved to be an indispensable part of not only the criminal justice system, but also the governance in countries around the world. Worldwide scientific peer groups are working along in order to utilize the science of fingerprints in as many ways as possible. This chapter deals with the analysis of cumulative factors such as conviction rate, population of the states, reasons of discrepancies in the data provided and an inter-comparison of data procured from the State Finger Print Bureaux along with the depiction of major activities such as Record slips, Search slips, Document cases and Chance prints accepted during the year 2017 at a glance.

**Graph No.1****NUMBER OF FP RECORD (CONVICTION) SLIPS RECORDED IN THE YEAR 2017
(STATE WISE)****Graph 1**

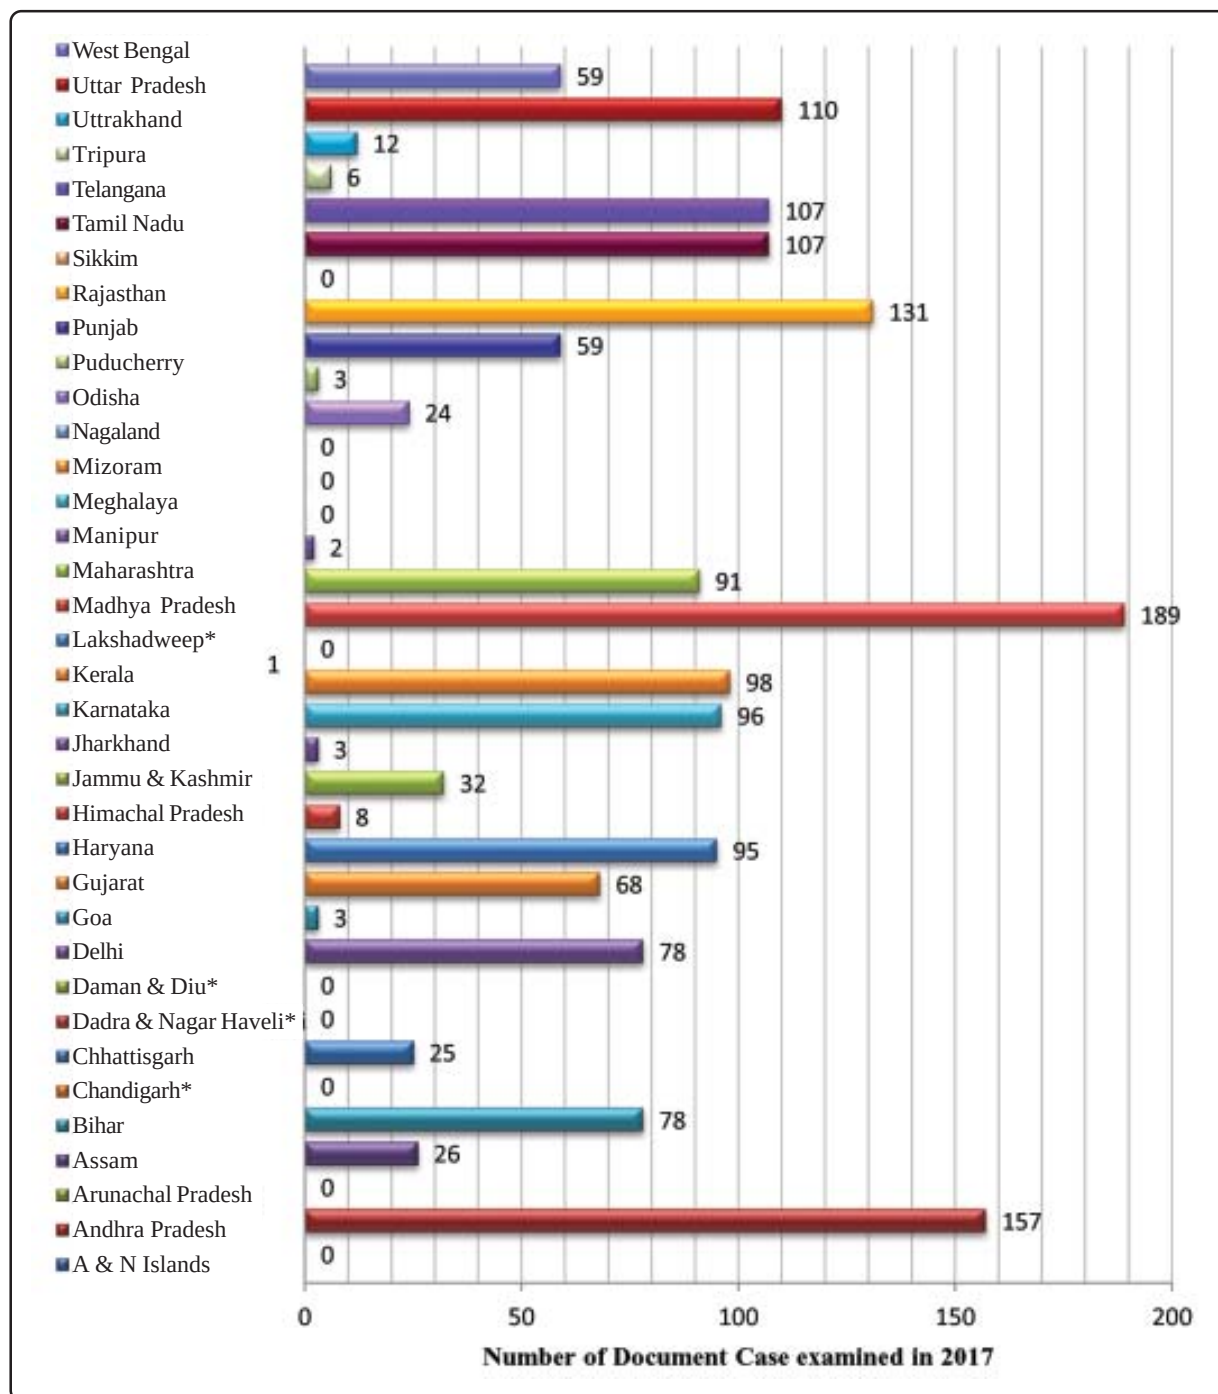

Majority of the states except Punjab, Maharashtra and Madhya Pradesh have remained under performers with figures in hundreds and a few thousands whereas the crime rate ranges to tens of thousands. Rajasthan and Tamil Nadu have recorded not even one conviction slip in the year 2017. States of Karnataka, Telangana, Andhra Pradesh, West Bengal are also lagging behind in the count of conviction slips. Except Delhi and Puducherry, no other UT possesses an AFIS which accounts for the lack of information being received.

**Graph No.2**

**NUMBER OF FP SEARCH (ARRESTEE) SLIPS RECORDED IN THE YEAR 2017
(STATE WISE)**

**Graph 2**

States such as Maharashtra, Madhya Pradesh, Gujarat, Punjab and Telangana have recorded the highest number of arrestee slips. The point to be speculated is that some of the other states including Chhattisgarh, Kerala, Rajasthan, Tamil Nadu, Uttar Pradesh and West Bengal have recorded much lesser number of FP Arrestee slips as compared to their mere size (area wise), population and number of crime incidences. Some of the States/UTs are under the process of maintenance/upgrading their AFIS.

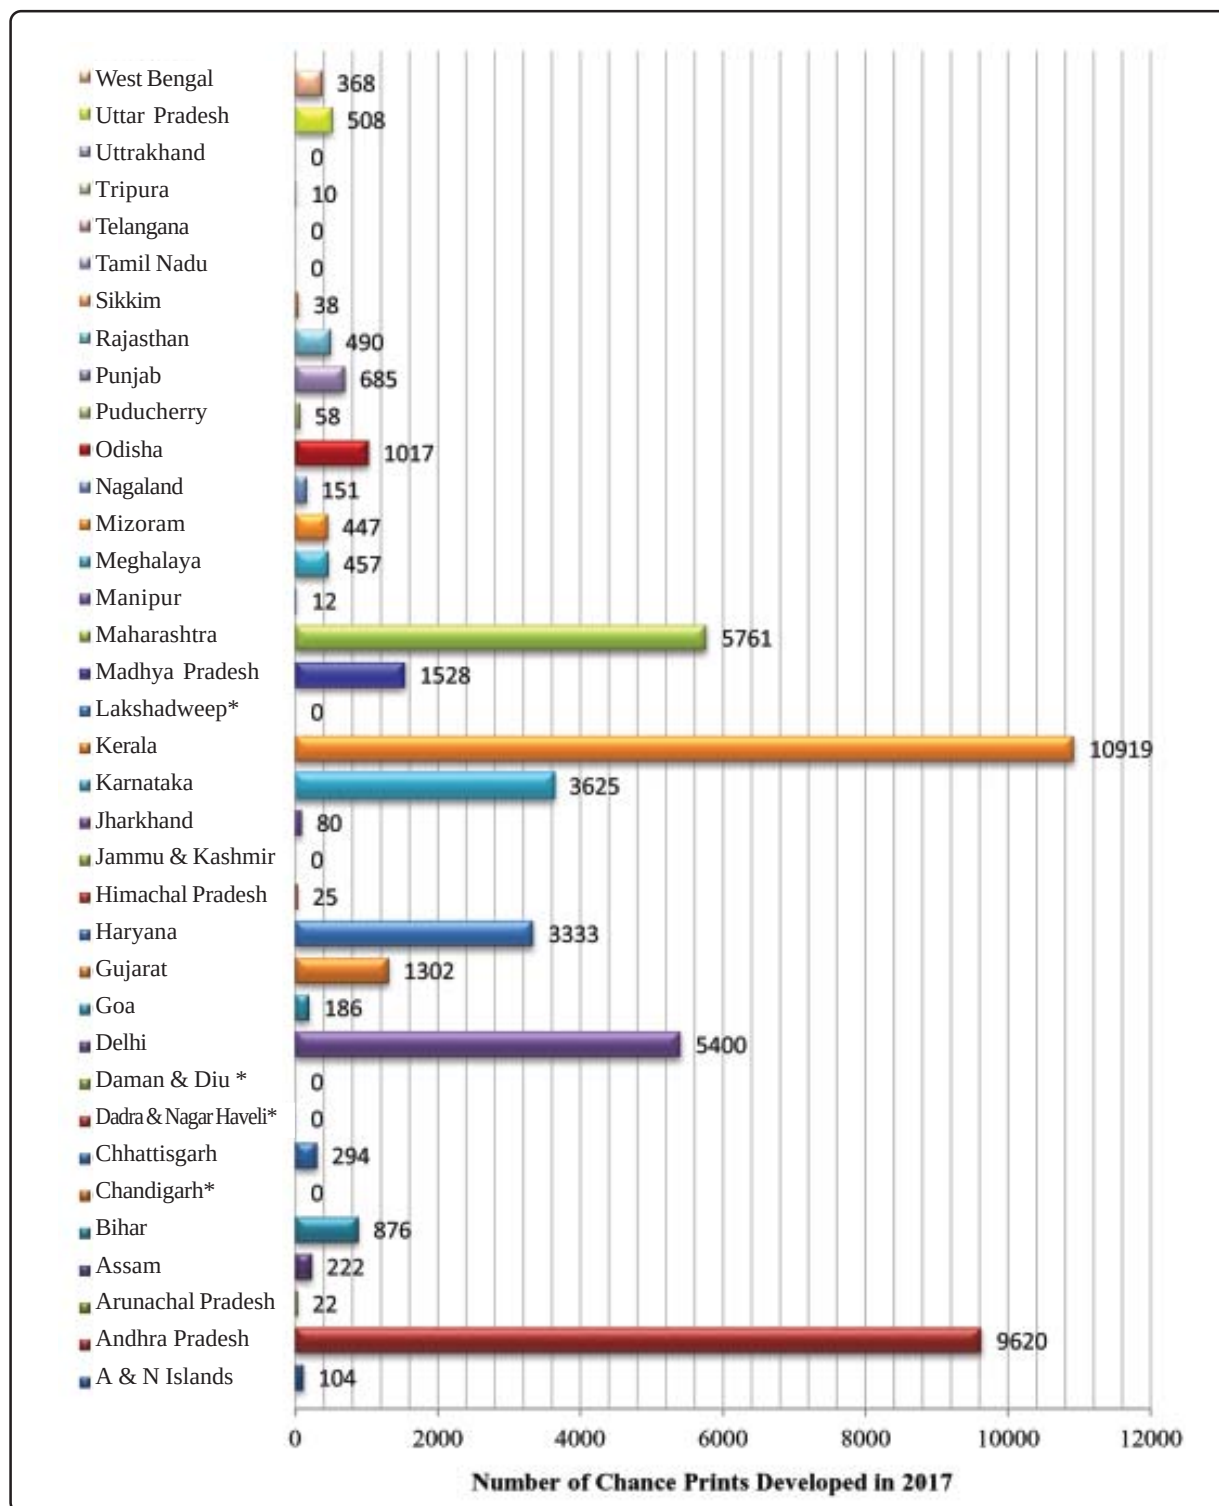

**Graph No.3****NUMBER OF DOCUMENT CASES EXAMINED IN THE YEAR 2017 (STATE WISE)****Graph3**

The States of Madhya Pradesh, Andhra Pradesh, Rajasthan and Uttar Pradesh, in decreasing order, have examined significant number of document cases in the year 2017. These higher numbers of cases examined may also be related to their corresponding higher population as States such as Uttarakhand, Goa, Odisha with lesser population have examined much less number of cases. As depicted in the graph, the States/UTs with an asterisk* have no established FPBx, therefore the number of cases examined are also null.

Graph No.4

NUMBER OF CHANCE PRINTS DEVELOPED IN THE YEAR 2017 (STATE WISE)

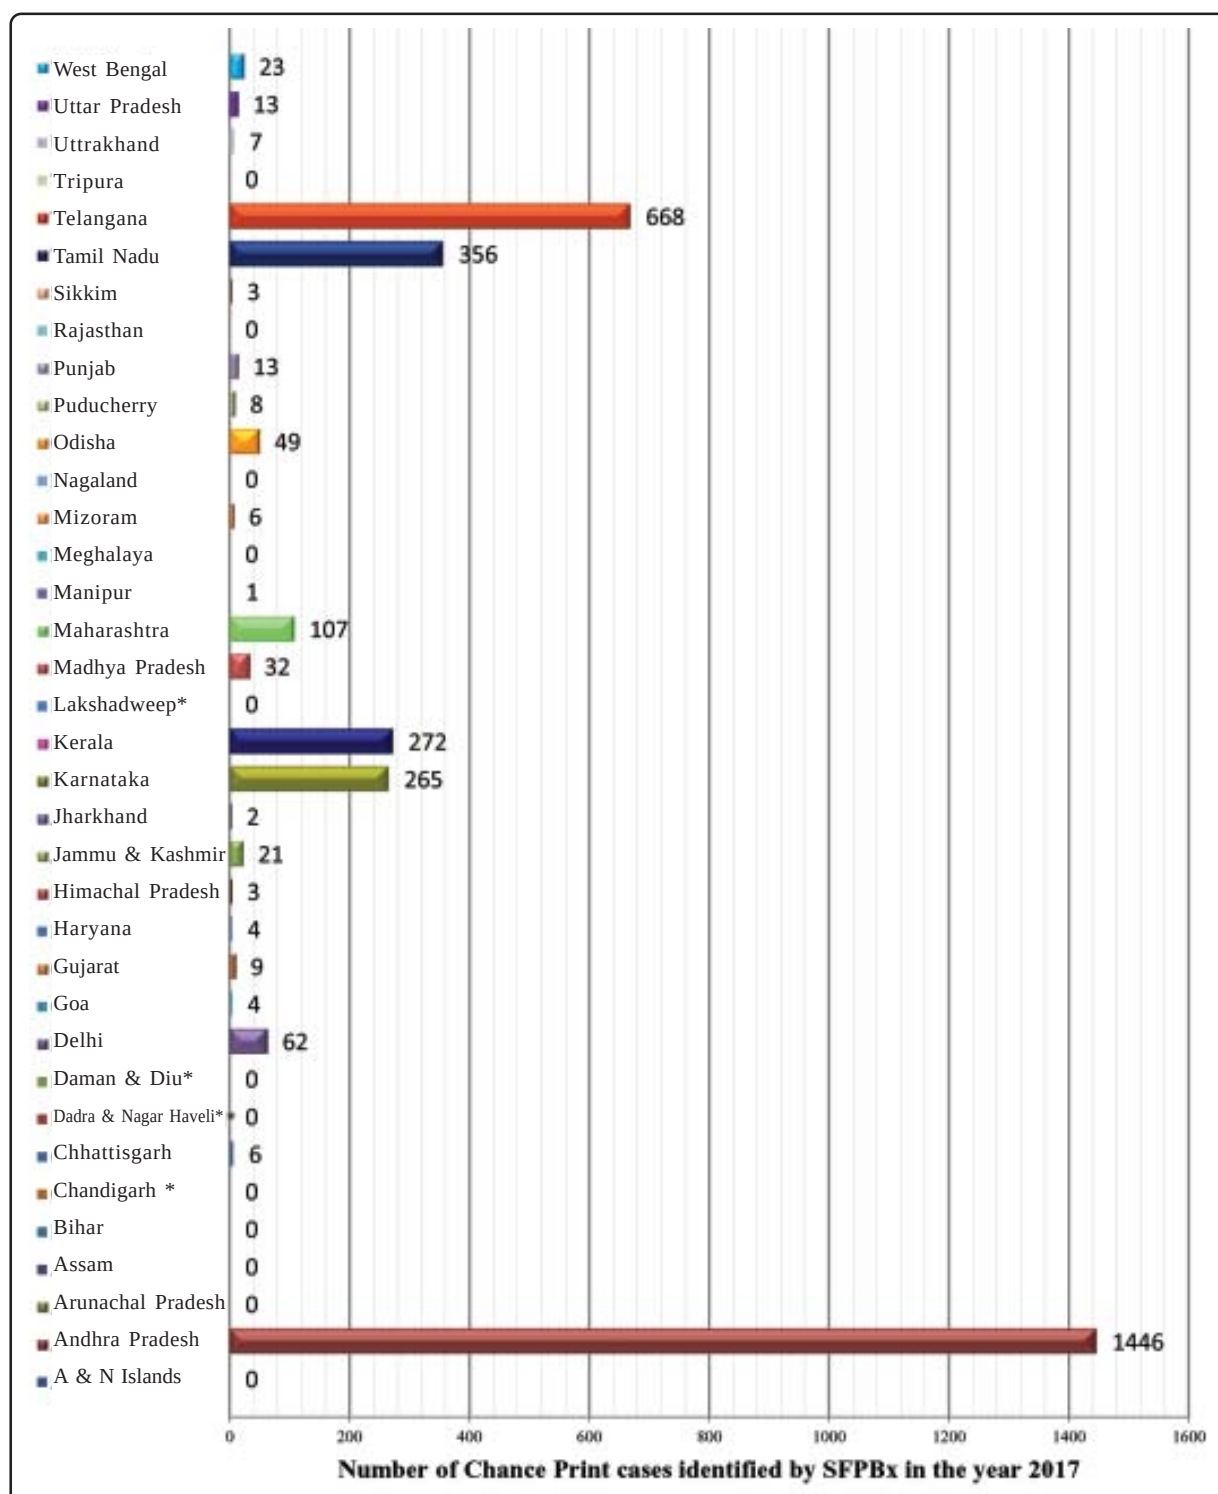

Graph 4

States of Kerala, Maharashtra and Andhra Pradesh have topped the list with highest number of chance prints developed in a calendar year. Other bigger states are not even close to the figures of the above mentioned states. Delhi is the only union territory to have developed a large number of chance prints.

Graph No.5

NUMBER OF CHANCE PRINT CASES IDENTIFIED DURING THE YEAR (STATE WISE)

Graph 5

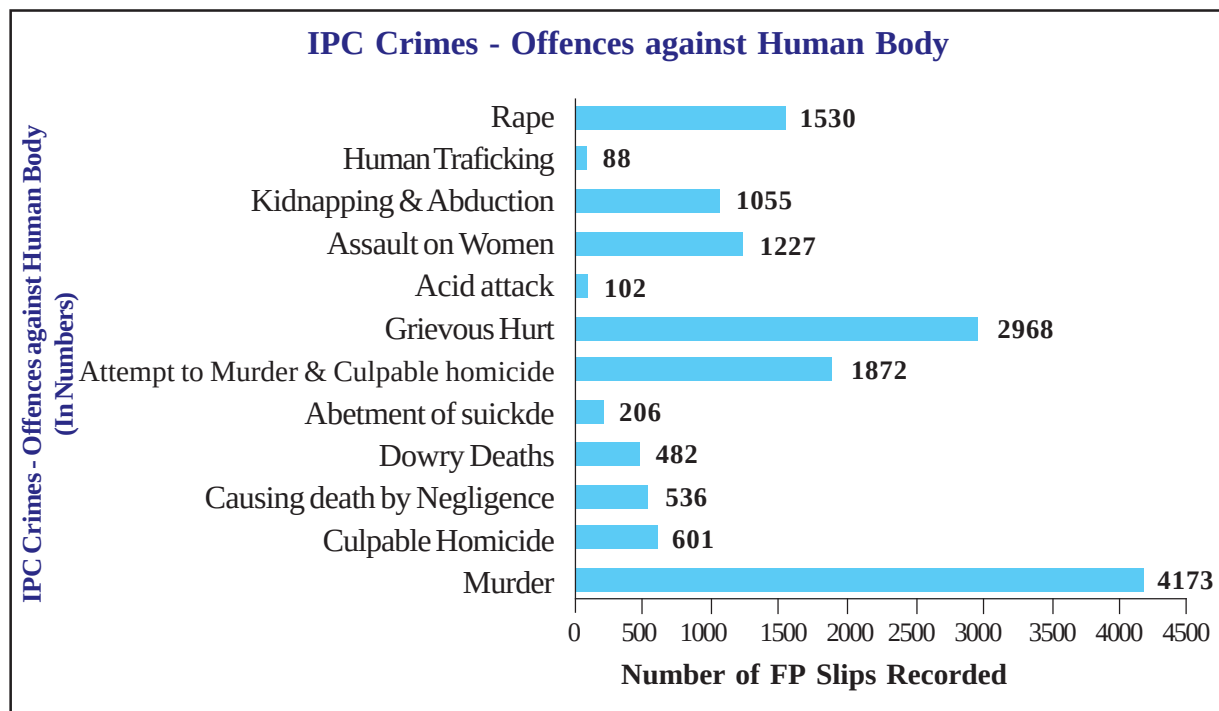

States of Andhra Pradesh, Telangana, and Tamil Nadu have topped the list with highest number of chance print cases identified in the year 2017. The States of Kerala, Karnataka & Maharashtra have also identified a significant number of CP cases in succession to the above mentioned States.

IPC Crimes -Offences against Human Body

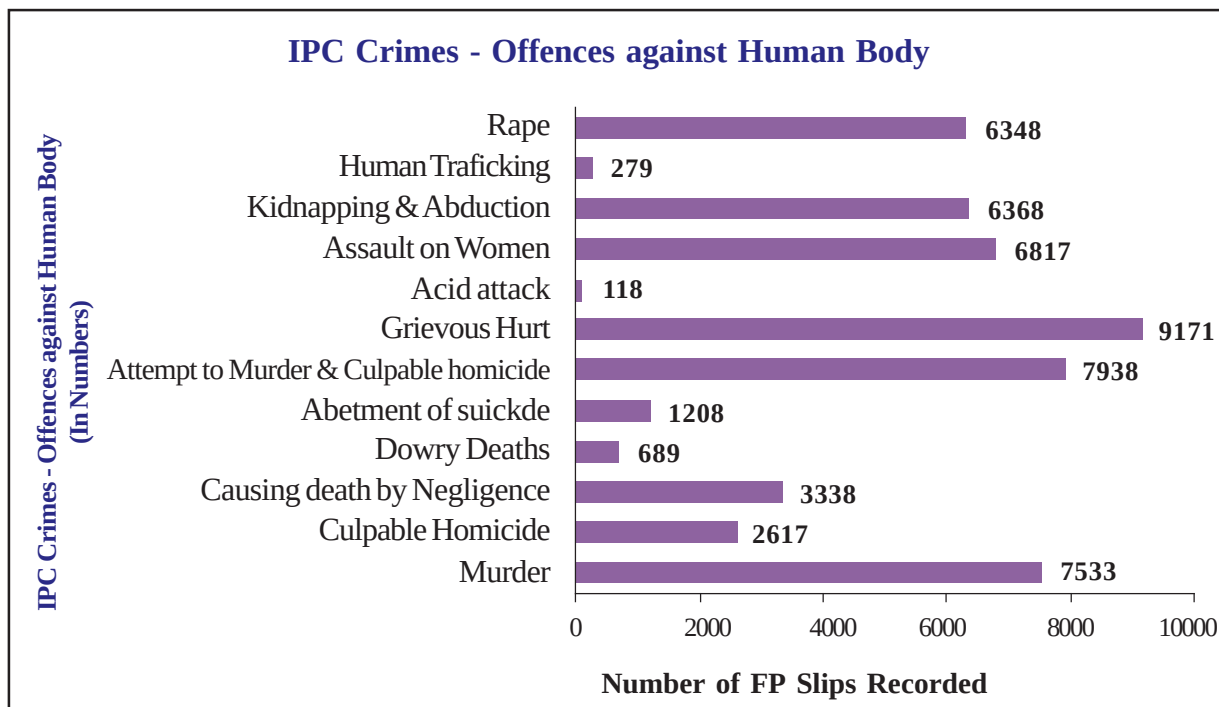

Record Slips

Graph 5

Search Slips

Graph 6

Graph 5 & 6

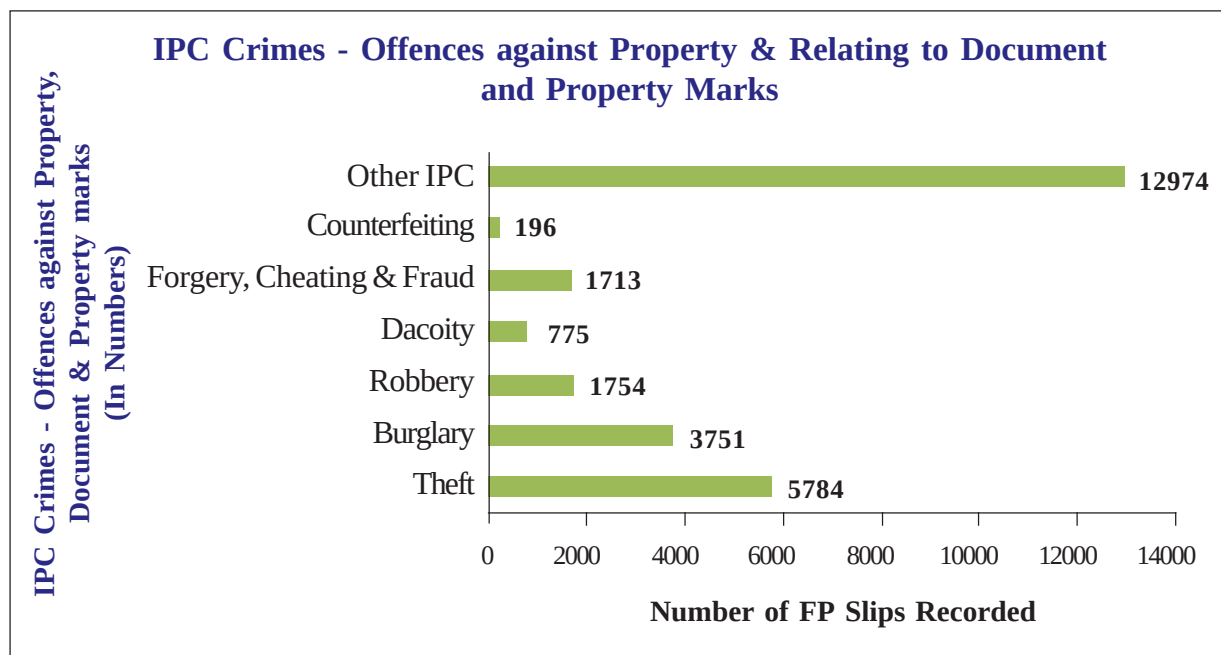

Record slips of those convicted for Murder, Grievous Hurt, Attempt to Murder and Rape are the highest in number as compared to other IPC heads whereas the search slips recorded also demonstrate a sharp rise in crimes such as Kidnapping, Abduction and Assault on women. The number of Search slips for all the heads of crime is higher than the number of conviction slips recorded.

IPC Crimes -Offences against Property & Relating to Document and Property Marks

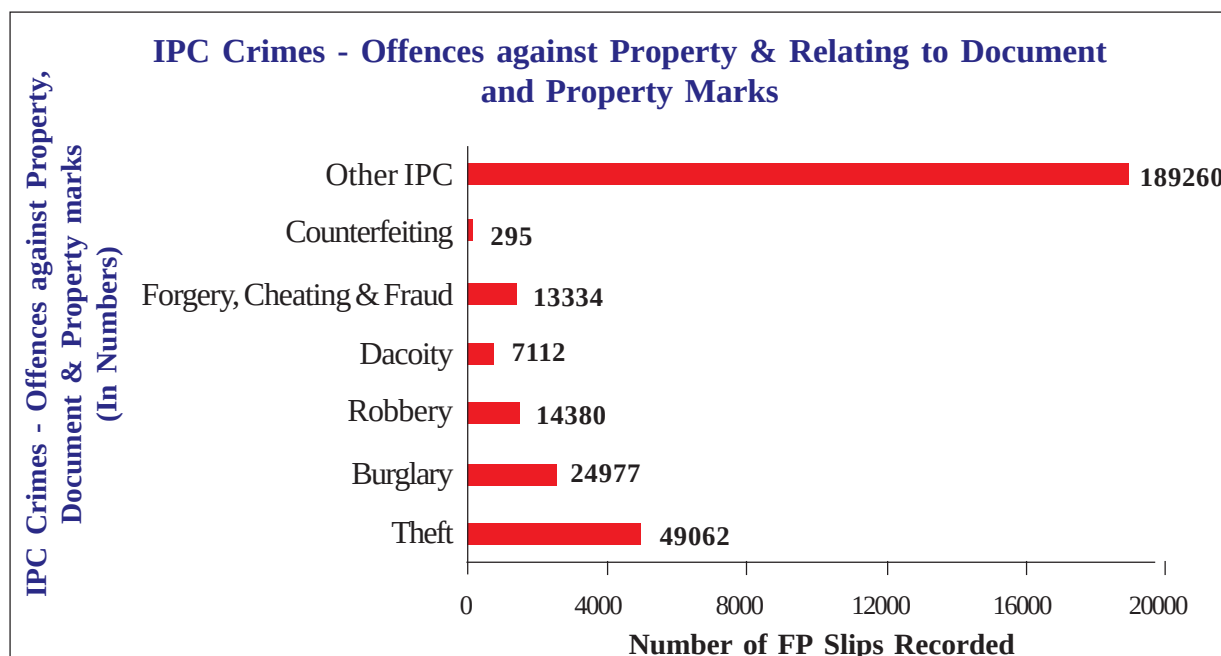

Record Slips

Graph 7

Search Slips

Graph 8

Graph 7& 8

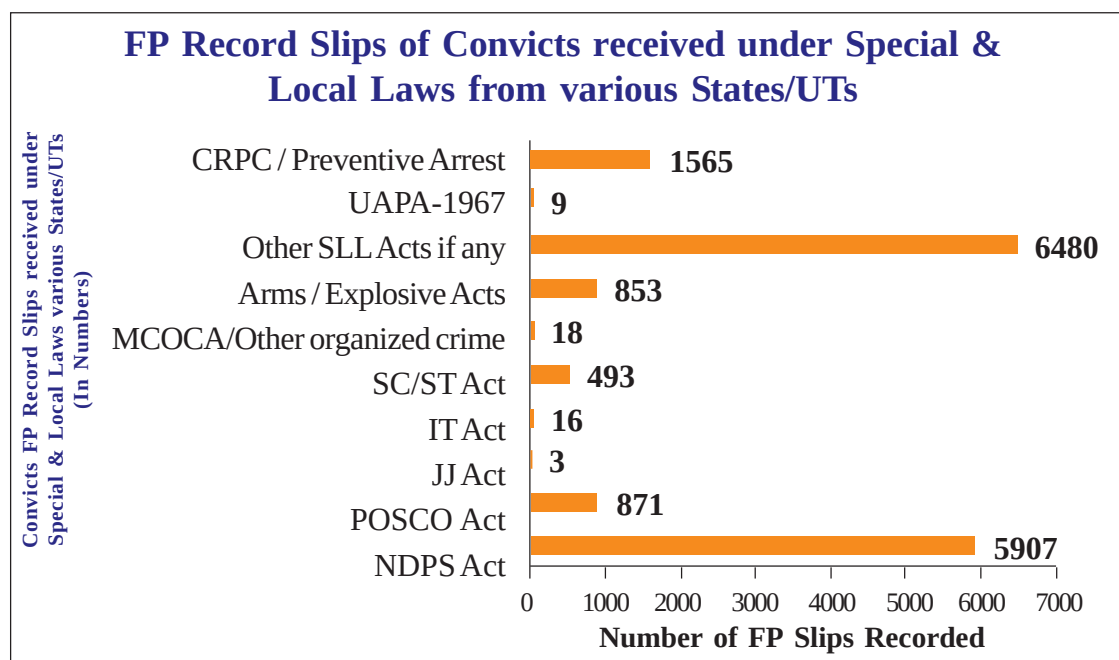

The number of persons arrested and convicted for the offence of Theft is higher than those involved in Robbery, Burglary and Dacoity. In document related offences, more number of persons has been arrested and convicted for forgery rather than counterfeiting. As 'other IPC' crime head involves the rest of the IPC sections, it has obviously documented more number of crimes than rest of the crimes combined.

Convicts & Arrestee FP Slips received and searched under Special & Local Laws from various States/UTs

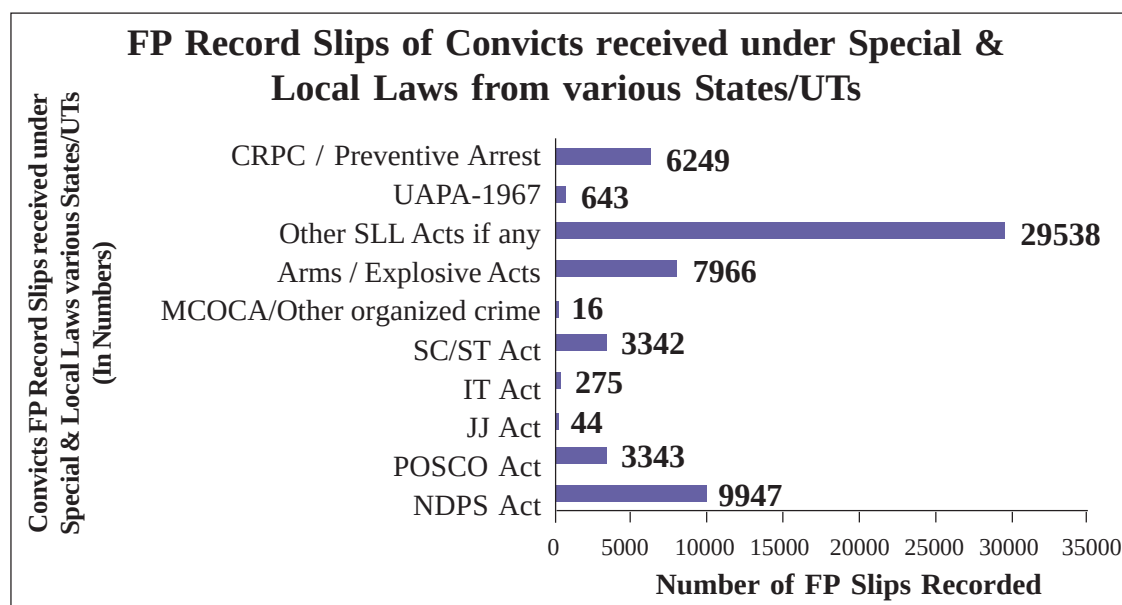

Record Slips

Graph 9

Search Slips

Graph 10

Graph 9&10

The number of persons arrested and convicted for NDPS comes second after other SLL crimes followed by Arms/Explosive Acts. 6249 persons have been arrested under CrPC/ Preventive arrest while 1565 have been convicted. Neglecting the discrepancies in receipt, collection and forwarding of the data mentioned here and assuming the figures to be the ground reality, Graph 9&10 highlights the fact that the number of persons arrested for a certain crime is always higher than those who get conviction from the court of law. It also endorses the quote that a person remains innocent until proven guilty.

CAPACITY BUILDING

TRAINING AND CAPACITY BUILDING IN FINGERPRINT SCIENCE AT CFPB/NCRB, NEW DELHI

One of the objectives of NCRB is to provide training in IT and Finger Print Science for capacity building in Police Forces in the country. Each year this branch conducts various training programmes for Indian & Foreign Police Officers. Training on subjects like Cyber Crime Investigation & Digital Forensics, CCTNS, ToT in Finger Print Science, Advanced Finger Print Science, Network & e-Security, Colored Portrait Building System, Operators Course for Statistical Software Crime in India & ADSI, Operator Course for Prison Statistics India etc. is conducted. NCRB also conducts the courses on “Training of Trainers” for development of training resource persons in Police Programmes conducted in NCRB are attended by officers of all ranks including senior officers from States / Union Territories as well as from Central Police Organizations/Central Armed Police Forces. Besides training of Indian Police Officers, NCRB also conducts courses for Foreign Police officers under Indian Technical and Economic Cooperation (ITEC) and Special Commonwealth African Assistance Programme (SCAAP) of Ministry of External Affairs. In the year 2017, CFPB with the progressive leadership of Director, NCRB undertook the initiative in the direction of capacity building by direct recruitment of 32 Sub-Inspectors (FP) and 04 Head Constables (FP) and provided them with 16 weeks in house training along with a 15 days police orientation training at CBI Academy, Ghaziabad. Director, NCRB also envisioned to familiarize the newly recruited Sub-inspectors with routine ground work of Scene of Crime visits and in implementation of the same, attached all the Sub-inspectors with different SFPBx in the country for a duration of 15 days to 1 month.

PIONEERS OF FINGER PRINT SCIENCE

There are records of fingerprints being taken many centuries ago. Ancient artifacts with carvings similar to friction ridge skin have been discovered in many places throughout the world. The ancient Babylonians pressed the tips of their fingertips into clay to record business transactions. Thumbprints were used on clay seals in China to “sign” documents. A petroglyph located on a cliff face in Nova Scotia depicts a hand with exaggerated ridges and finger whorls, presumably left by the Mi’kmaq people.

With the advancement in the field of Identification/ Investigation, many of the Scientists/ Investigators worked, whose contributions are listed below:

Dr. NEHEMIAH GREW (1641-1712)

- English Plant Morphologist, Considered as “Father of Plant Anatomy”.
- Studied and described the ridges, furrows, and pore structure of friction skin.
- Published very accurate drawings of the Finger Print patterns and areas of the palms.
- Did not address uniqueness or permanence of the ridges.

MARCELLO MALPIGHI (1628-1694)

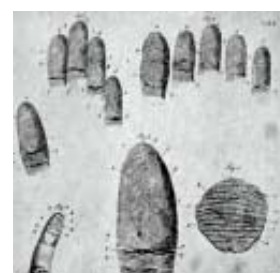

- First to see the capillaries and was a founder of histology, embryology, plant anatomy, and comparative anatomy.
- Used a microscope for the first time to examine friction skin and made observations as to its structure.
- Malpighian layer of skin names after him, for his research contributions.
- Did not address uniqueness or permanence of friction ridges.

Dr. J.C.A. MAYER (1747-1801)

- Authored a book on human anatomy and anatomical illustrations. The book is one of the earliest recordings supporting the uniqueness of fingerprints.
- The book included drawings of friction skin and this is still a valid statement ;

“Although the arrangements of skin ridges are never duplicated in two persons, nevertheless the similarities are closer among some individuals. In others the differences are marked, yet in spite of their pecu-

liarities of arrangement all have certain likeness.”

This statement has been verified by all other medical and scientific researcher of friction skin.

Dr. JOHANNES E. PURKINJE (1787–1869)

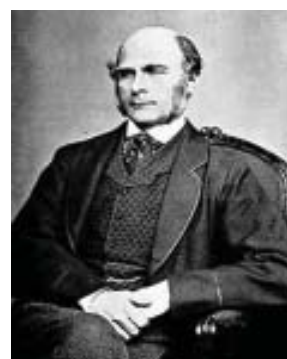

- At Breslau he created the world’s first Independent Physiology department and the first official Physiology laboratory.
- He discovered the Purkinje effect, Purkinje cells, and Purkinje fibers.
- He was the first to give regular classification of FingerPrint patterns into nine categories which is as follows:

➤ A: Transverse curves,	➤ F: Spiral,
➤ B: Central longitudinal stria,	➤ G: Ellipse or elliptical whorl,
➤ C: Oblique stria,	➤ H: Circle or circular whorl, and
➤ D: Oblique sinus,	➤ I: Double whorl
➤ E: Almond	

SIR WILLIAM JAMES HERSCHEL (1833-1917)

- He experimented with the idea of using a handprint as a signature by having a man named Rajyadhar Konai put a stamp of his right hand on the back of a contract. The contract was received and accepted as valid.
- He instituted taking fingerprints of both pensioners and criminals so that it is not carried out by imposters.
- He was the first person to use Hand Prints/ Finger Prints officially.
- He published an account of his work entitled ‘The Origin of Fingerprinting’.

Dr. HENRY FAULDS (1843–1930)

- British surgeon and Superintendent of Tsukiji Hospital in Tokyo.
- Wrote an article that discussed fingerprints as a means of identification.
- He published a paper on the subject titled ‘On the Skin-Furrows of the Hand’, in the scientific journal ‘Nature’ and it was the first scientific literature to suggest the basic concepts of the fingerprint system of identification.

- In an article, Faulds proposed using friction ridge individualization at crime scenes and gave two practical examples.
- Recommended Printer's Ink for recording of fingerprints.

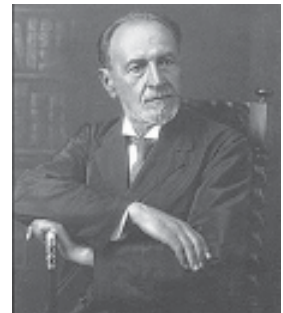

SIR FRANCIS GALTON (1822-1911)

- He was an English explorer and anthropologist best known for his research in Eugenics and Human Intelligence.
- Established that friction ridge skin was unique and persistent.
- Defined & Named each Peculiar characteristics /Minutiae/ Ridge Characteristics
- Wrote book on "Fingerprints" in 1892 & "Decipherment of Blurred Fingerprints"

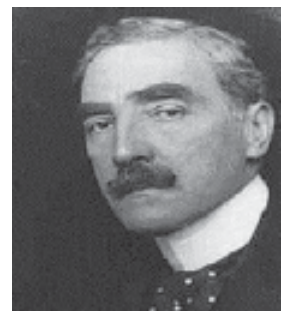

IVÁN (JUAN) VUCETICH (1858-1925)

- His classification system and individualization of prisoners through the use of fingerprints were the first practical uses of the Finger Print science by law enforcement personnel.
- He made the first positive identification of a criminal in a case where Francisca Rojas had killed her two children and then cut her throat, trying to put the blame on the outside attacker. A bloody print identified her as the killer.

SIR EDWARD RICHARD HENRY (1850-1931)

- Inspector General of Police for the Lower Provinces in Bengal.
- Considered as Father of Modern Finger Print Science.
- With the help of Indian Police Officers Khan Bahadur Azizul Haque, and Rai Bahadur Hem Chandra Bose, the Henry classification system was developed.
- Went before an inquiry committee to convince them to change to fingerprinting criminals instead of using the Bertillon Method.
- Established the Metropolitan Police Finger Print Bureau, it was Britain's first.
- Published a book "The Classification and Use of Finger Prints."

AZIZUL HAQUE (1872 – 1935)

- Officer-in-charge of the Anthropometric Bureau at Calcutta
- Helped in devising the classification formula on a mathematical basis.
- Was awarded the title “Khan Bahadur”
- Was awarded honoraria of rupees 5000/- for his contribution to the establishment of finger print classification.

HEM CHANDRA BOSE (Born in 1867)

- An officer of the Anthropometric Bureau in Calcutta
- Created a system for single digit impression
- Created a telegraphic code for communicating classification.
- Was awarded the title “RaiBahadur”
- Wrote a book called “Finger Print Companion”
- Awarded honoraria of rupees 5000/- for his contributions.

EDMOND LOCARD (1877-1966)

- Formulated the basic principle of forensic science: “Every contact leaves a trace”.
- Developed the science of Poroscopy.
- Established the first rules of the minimum number of minutiae necessary for identification. He said that if 12 specific points were identical between two fingerprints, it would be sufficient for positive identification.

LAWS RELATING TO FINGER PRINTS IN INDIA

In an endeavor for the betterment of the publication a new chapter on laws relating to Finger Prints has been added from this year, the chapter contains all relevant legal information pertaining to Finger Print Science in India.

Section 45 of the Indian Evidence Act, 1872, as amended by Act V of 1899, defines:

Any other person whose finger prints is ordered to be maintained by the Govt. of India from time to time, subject to the provisions of the Identification of prisoners Act (act XXXIII of 1920).

“When the Court has to form an opinion upon a point of foreign law, or of science or art, or as to identity of handwriting or finger impressions, the opinions upon that point of persons especially skilled in such foreign law, science or art, or in questions as to identify of handwriting or finger impressions are relevant facts. Such persons are called Experts”.

Section 293 of Cr. P.C. states as follows:

- 1) Any document purporting to be a report under the hand of a Government scientific expert to whom this section applies, upon any matter or thing duly submitted to him for examination or analysis and report in the course of any proceeding under this code may be used as evidence in any inquiry, trial or other proceeding under this code.
- 2) The Court may, if it thinks fit, summon and examine any such expert as to the subject-matter of his report.
- 3) Where any such expert is summoned by a Court, and he is unable to attend personally, he may, unless the court has expressly directed him to appear personally, depute any responsible officer working with him to attend the court, if such officer is conversant with the facts of the case and can satisfactorily depose in court on his behalf.
- 4) This section applies to the following Government Scientific Experts, namely:-
 - a) Any Chemical Examiner or Assistant Chemical Examiner to Government.
 - b) The Chief Inspector of Explosives.
 - c) The Director, Finger Print Bureau.
 - d) The Director, Haffkine Institute, Bombay.
 - e) The Director of a Central Forensic Science Laboratory or a State / UT Forensic Science Laboratory.
 - f) The Serologist to the Government.

To ascertain, whether a finger print is that of a person by whom it purports to have been made, the court may direct any person present in the court to record his finger prints for the purpose of enabling the court to compare the finger prints alleged to have been made by such person. When given by recognized finger print experts, evidence as to the identification of persons by means of finger prints left

at the scene of crime, is a fact. Summon from court is received whenever, court requires the services of experts either to prove the identity of the accused person or to give evidence in case in which experts opinion has already been furnished by the Bureau.

LAWS RELATING TO PREPARATION OF RECORD AND SEARCH SLIPS

Identification of Prisoners Act, 1920

Section 3: Related to Convicted Persons

- a) Every person who has been convicted of any offence punishable with rigorous imprisonment for a term of one year or upwards or of any offence which would render him liable to enhanced punishment on a subsequent conviction and
- b) Every person ordered to give security of his good behavior under Section 118 CrPC shall if so required allow his measurements and photographs to be taken by a police officer in the prescribed manner.

Section 4: Empowers police officers for taking fingerprints of non-convicted arrested persons in connection with an offence punishable with RI for one year or more.

Section 5: Empowers a magistrate of first class to order a person to give his Finger Print for the purpose of any investigation or proceedings.

Section 6:

- i) Empowers the use of necessary means to secure the fingerprints of any person who resists or refuses taking of fingerprints.
- ii) Resistance or refusal is deemed to be an offence u/s 186 IPC.

Section 7: Deals with destruction of finger print slips on acquittal or on discharge or on release without trial.

SCHEDULE OF OFFENCES FOR TAKING FINGER IMPRESSIONS AS PER CFPB MANUAL

As per OM No. 115/POLICE (L)/ 55 (8) Intelligence Bureau, Ministry of Home Affairs, Government of India, Dated 19.02.1955, on the subject of 'Establishment of C.F.P.B and instructions to be followed by State Bureaux and District Police officers in sending F.P. record slips', mentions about the G.O. No. 37/223/55-piii Dated 5.12.55, which incorporates the procedure to be adopted for taking finger impressions of all persons convicted of any offence mentioned in the schedule of offences.

Finger Print slips of the following persons will be recorded at the Central Finger Print Bureau:

- 1) All persons convicted of offences under chapter XII to XVII IPC which are punishable with rigorous imprisonment for a term of one year or more.
- 2) All persons convicted of any offence under Chapter VI IPC or of sabotage and subversive activities against State.
- 3) All persons convicted of offences under section 170, 302, and 304 (murder for gain), 328, 338, 465 to 477A, 489A to 489D IPC.

- 4) All persons convicted under the Arms, Opium and State Excise acts who are suspected to be smugglers in Arms, Opium by dangerous drugs as defined in the Dangerous Drugs Act (Act II of 1930) or entailing enhanced punishment on reconviction .
- 5) All persons convicted of smuggling gold, currency and valuable articles under Foreign exchange Regulation Act VII of 1947.
- 6) All persons ordered to execute bonds under sections 109 and 110 CrPC (for offence against property only).
- 7) All traffickers in women and children who are convicted under section 363 to 373 IPC.
- 8) All persons convicted under section 5 of Act LXXIV of 1950 for unlawful possession of telegraph wires.
- 9) All persons convicted under section 3 of Ordinance XIX of 1944 for unlawful possessions of Railway Stores.
- 10) All professional criminals and persons of dangerous character externed from any area under any state Act.
- 11) All foreigners externed under Foreigners Act XXXI of 1946.
- 12) All approvers in gang dacoity and criminal conspiracy cases.
- 13) All persons suspected of being professional itinerant criminals and persons of notoriously criminal reputation who habitually absent themselves from their homes and are believed to travel to other states for the purpose of committing crime and who have been arrested by police and whose finger prints have been taken, even if they are acquitted provided that in case of acquittal permission for record for finger prints is obtained from the court under section 7 of Act XXXIII of 1920.
- 14) All persons convicted for attempt or abetment (sec 511 or 109/114 IPC) and criminal conspiracy (sec 120B IPC) for offences mentioned in this schedule.
- 15) All Indian nationals convicted outside India of any offence for which finger prints have been received at the State Bureau from those countries.
- 16) All International criminals and absconders whose finger prints are sent to the State Bureau from countries outside India.
- 17) All persons convicted under explosive Substances Act (Act VI of 1908).
- 18) All persons convicted under the official Secrets Act (Act XIX of 1923).
- 19) All persons convicted under sec 101, 126 and 128 of the Indian Railways Act (Act IX of 1890).
- 20) Any other person whose finger prints are ordered to be maintained by the Govt. of India from time to time, subject to the provisions of the Identification of prisoners Act (act XXXIII of 1920).

Note: The taking of finger prints of persons who are local men and convicted of offences of trivial nature will be subject to the discretion of the Supdt. of Police of the district concerned.

IMPORTANT COURT VERDICTS ON FINGER PRINT EVIDENCE

1. Supreme Court Ruling Of 1961 : [State of Bombay Vs. Kathikalu Oghad AIR 1961 SC 1808]

A thumb impression of an accused taken by the police in course of investigation which was later on produced at the trial did not amount to testimonial compulsion under Article 20(3) and was not on that account inadmissible. It held that the application of finger prints in the identification of persons does not violate the fundamental rights under Article 20(3) of the constitution. It was further held that to be a witness in its wider sense means giving an oral or written statement but does not amount to exposing a part of the body for the purpose of identification.

2. Supreme Court Ruling Of 1972 : [AIR 1972 SC 975]

“The comparison and identification of finger prints has developed into a science and the results derived there from have reached a stage of exactitude. As long as the report shows that the opinion was based on observations which led to a conclusion, such opinion can be accepted.”

“Unless there is a doubt as to the correctness of the opinion, the report of the examiner may be accepted without examination of the expert.”

3. Supreme Court Ruling of 1978: [Mohanlal Vs. Ajit Singh AIR July 1978 SC 1183]

The hon’ble Supreme Court ruled that an opinion based on 8 identical ridge characteristics was fully justified and conformed to the views expressed in scientific books on the subject.

“Nothing substantial has been urged to challenge the opinion of the director of the Finger Print Bureau and all that has been argued is that as there were only 8 points of similarity, there was not enough basis for the expert’s opinion about the identity of finger prints. Reference in this has been made to B.L.Saxena’s ‘Identification of handwriting, disputed documents, finger prints, foot prints and detection of forgeries’ (1968 edition, page 247), Walter R. Scott’s ‘Finger print mechanics’ (page 62) and M.K.Mehta’s ‘The identification of thumb impression and the cross examination of finger print experts’ (second edition, page 28). We have gone through these books but they do not really support the argument of the learned counsel for the respondent. While referring to the old practice of looking for a minimum of 12 identical characteristic details, Saxena has admitted that the modern view is that 6 points of similarity are sufficient to establish the identity of finger prints. Walter Scott has stated that as a matter of practice most experts who work with finger prints constantly satisfy themselves as to the identity with 8 or even 6 points.” The larger surface of the fully rolled impression not only allows accurate classification but it also gives more points for comparison. (For representative purpose only)

4. Supreme Court Ruling of 1979: [Jaspal Singh Vs.State of Punjab AIR 1979 SC 1708]

“The science of Finger print identification is an exact science and does not admit of any mistake or doubt.”

Annexure-III

RECOMMENDATIONS OF THE XVIII ALL INDIA CONFERENCE FOR DIRECTORS OF FINGER PRINT BUREAUX HELD AT HARYANA POLICE ACADEMY (HPA) , MADHUBAN, HARYANA ON 30TH AND 31ST MARCH, 2017

I. AFIS, FED & CADB

1. House recommended that AFIS must conform to open architecture for avoiding vendor lock in. The system should also be NIST standards compliant so that there are no issues of interoperability.
(NCRB/STATES/UTs)
2. The house was unanimous in advising that states who do not have an AFIS may look into procuring AFIS urgently.
(NCRB)
3. There is a need for evolving standards and parameters for exchange of data between CCTNS and AFIS including finger print data among states. A committee is proposed with members from Telangana, Madhya Pradesh, Chhattisgarh, Tamilnadu, Odisha and NCRB to go into the details and submit its report in a month's time.
(NCRB/Concerned STATES)
4. Benchmarking of AFIS systems being deployed by the states and also those being used by various private agencies to assist in recruitment, access control systems etc should be undertaken by the NCRB urgently. House felt that specifications available for FED at UIDAI website are adequate.
(NCRB)
5. It is also felt that some sort of arrangement must be made to leverage UIDAI certified agencies so that their services can be utilized for taking finger prints. That way states would not need to procure FEDs.
(States/UTs)
6. House recommended that Aadhaar number should be mandatorily included with all CADB and also with all examination reports. This provides for uniqueness of the person throughout the country.
(States/UTs)
7. It is proposed that NCRB will work on making the system so that transfer of data from states to the CFPB/ NCRB is standardized and also that transfer of data is instantaneous. This online system would be developed by NCRB and made available to all the states FPB's. After deployment, NCRB will share the software details as how data needs to be uploaded to NCRB. For states that do not have AFIS, NCRB will share the standard formats for sharing the data.
(NCRB)

II. TRAINING

8. A committee was proposed to set up under the chairmanship of Sri. Sumit Sharan IGP Tamilnadu and members from Delhi, Madhya Pradesh, CFSL (CBI), Maharashtra

and NCRB to address the following issues:

- To define training content, syllabus for newly recruited SI's of Fingerprint,
- To define training content and syllabus for 2 day training of personnel other than police involved in taking fingerprints.
- To define training content, syllabus and refresh cycle for finger print experts
- Review the existing guidelines for selection of winners of the excellence in finger print science competition that is conducted in connection with Annual conference and to recommend comprehensive criteria.
- To define amendments required in CFPB Manual.

(NCRB/Concerned States)

9. House felt that every 5 years, FP expert must be sent for refresher / advance course.
(States/UTs)
10. House felt that interaction between universities and FP experts needs to be strengthened. FP experts expressed desire to have live demo of newer techniques and powders developed by the universities. Both researchers and FP experts were requested to be in touch with the each other.
(NCRB)
11. Using Artificial Intelligence (AI) and machine learning in Finger Print training, NCRB should take this forward.
(NCRB)

III. ADMINISTRATIVE MATTERS (INCLUDING REVISION OF CFPB MANUAL)

(NCRB/MHA/UIDAI)

(States/UTs/NCRB)

12. Pros and cons of making FPB independent house with the FSL or keeping with Police were discussed in detail. House was of the opinion that Director FPB must be Finger Print Expert only. Also deliberated as whether non-finger print person can hold the position of Director, FPB.
(States/UTs)
13. It is proposed that at least SP rank officer shall be Director of FPB for larger states and at least Dy. S.P. for other states.
(States/UTs)
14. Appropriate action needs to be initiated to fill the vacancies. NCRB would be writing to all state Chief Secretaries and DGP's to take urgent action in this matter,
(NCRB/States/UTs)
15. House was of the opinion that FP experts should not be deployed for other/field duties unless it is extremely essential.
(States/UTs)
16. A committee is proposed look into the report submitted earlier to define the manpower requirement for State FPBx both at state and at district levels. Smt. Tejswi Satpute, IPS Maharashtra is proposed as chairperson with members from Tamil Nadu, Madhya

Pradesh, Haryana, Delhi and NCRB.

(NCRB and concerned States)

17. House is of the opinion that States that do not have separate Finger Print cadre such as Uttar Pradesh, Punjab and they should be advised to create such cadres.
(NCRB/Punjab/UP)
18. House unanimously decided that CFPB unit at Kolkata should be relocated to New Delhi in the new premise at Mahipalpur, New Delhi. It is also decided that all the training modules should be consolidated in the upcoming new infrastructure of NCRB at New Delhi.
(NCRB)
19. It was recommended that NCRB should work out modalities for accreditation of State Finger Print Bureaus and also to grade State FPBx for encouraging healthy competition.
(NCRB)
20. It was recommended that the committee looking into the revision of existing CFPB Manual make necessary changes and get it approved by the Ministry at the earliest.
(NCRB)
21. House recommended that States should share the rules and manuals which govern taking, processing, retention and destruction of biometric data. NCRB would convene meetings of senior police officials and FP experts from states to have wider consultation on the Identification of Prisoners Act 1920 and take them on board for submission to MHA. All States were requested to share their views on the persons where finger prints can be taken and requesting MHA to amend the Act.
22. From the detailed presentation, it was felt that UIDAI data cannot be used by police unless the Aadhaar Act is amended. Speaker clarified that UIDAI Act is based on the consent of individual and therefore, expressed concerns for using their data for investigation. House recommended to make a request for amendment to the Aadhaar Act so as to assist the police in solving cases and identifying the unidentified dead bodies.
(NCRB/MHA/UIDAI)

VI. MISCELLANEOUS

23. Cyber security issues in integrating different AFIS systems, and other applications should be appreciated and catered for by the NCRB.
(NCRB)
24. Mobile applications which can assist the Finger Print experts and also the users of the Finger Print databases to be developed so that the field level use of the Finger Print data is facilitated.
(NCRB)
25. From the detailed presentation, it was felt that UIDAI data cannot be used by police unless the Aadhaar Act is amended. Speaker clarified that UIDAI Act is based on the consent of individual and therefore, expressed concerns for using their data for investigation. House recommended to make a request for amendment to the Aadhaar Act so as to assist the police in solving cases and identifying the unidentified dead bodies.
(NCRB/MHA/UIDAI)

AUTOMATED FINGER PRINT IDENTIFICATION SYSTEM

Automation of the fingerprinting technology has been the agenda of scientific and industrialist peers in order to provide the law enforcement agencies with the best of the tools and techniques to maintain highest possible decorum of law and order. Since, FACTS is the indigenous version of AFIS being used by finger print bureaux throughout the country, following is the brief illustration describing the working a generic FACTS system.

The following diagram shows the work transaction mechanism of FACTS 5.0.

**AFIS BASED COMPARISON AND MARKING OF IDENTICAL POINTS
(FOR REPRESENTATIVE PURPOSE ONLY)**

The first FACTS was developed by NCRB with assistance from CMC Ltd. with the most basic features for an automated system. With the advent the microprocessors and communication technology, the latest FACTS is equipped with the state of the art advantages that improves the efficiency of a Finger Printexpert. Following is an analytical comparison of the range of features developed since the inception of the FACTS system.

The Electronic Finger PrintTransmission Specification or EFTS defines the interface between the IAFIS and other agencies' systems. The EFTS contains a description of operational concepts, descriptors, field edit specifications, image quality specifications, and other information related to IAFIS services. The Electronic Biometric Transmission Specification (EBTS) is the latest upgrade to the FBI Finger Print spacification and replaces EFTS Version 7.1. The scope of the EBTS has been expanded over previous versions to include additional biometric modalities (e.g., Palm print, facial, and iris) in

NAFIS: National Automated Finger Print Identification System

The virtual partition of the NAFIS designated for 36 states would also integrate with CCTNS application (Customised and configured core application software (State) or other similar applications implemented at (States/UTs) for mapping of relevant crime & criminal attribute data with Finger Print data for providing descriptions of demographics, reporting and annotations purposes.

Glossary

- ❖ **AMPUTATED:** The removal of a limb or other body extremity by trauma, prolonged constriction or surgery.
- ❖ **AUTOMATED FINGER PRINT IDENTIFICATION SYSTEM—**1: An automated, minutiae-based identification system that may consist of two or more distinct databases comprising two-finger identification records and ten-finger latent cognizant records (records of individuals more likely to be found at crime scenes, for example, burglars). 2: A computer-based system for reading, cataloguing, searching, matching, and storing fingerprints and related data. (ANSI/IAI) 3: A generic term for a Finger Printmatching, storage, and retrieval system. (SWGFAST 2011)
- ❖ **ACE-V—**The process for identifying latent fingerprints, which involves Analysis, Comparison, Evaluation, and Verification:
 - a. Analysis is the qualitative and quantitative assessment of Level 1, Level 2, and Level 3 Details to determine proportion, interrelationship, and value for individualization.
 - b. During Comparison, the latent print examiner looks at the attributes noted during analysis for differences and agreement between the latent print and the known exemplar.
 - c. Evaluation follows extensive comparison by making a determination if two impressions were made by the same source, not from the same source, or if the information is inconclusive. (A determination is made as to the results of the Comparison process. The Finger Print community accepts three conclusions: (a) the latent print and known exemplar were made by the same source, (b) the latent print and known exemplar were not made by the same source, or (c) a conclusive comparison could not be determined. This could be due to a lack of comparable area in the known exemplar or lack of clarity due to improperly recorded known exemplars.)
 - d. Verification occurs when a second qualified examiner does an independent assessment of the latent print and known exemplar, utilizing the ACE process.
- ❖ **ANSI/NIST STANDARD—**Standard proposed by NIST and adopted by ANSI. For example, the ANSI/NIST-ITL standard Data Format for the Interchange of Fingerprint, Facial & Other Biometric Information is used by law enforcement, intelligence, military, and homeland security organizations throughout the world. The first version of this standard dates to 1986. Over the years, it has been updated and expanded to cover more biometric modalities beyond the original record type of Finger Print minutiae.

(NIST)

- ❖ **BACKGROUND DISTURBANCE / INTERFERENCE:** A feature of the background (such as the texture or pattern) of the substrate (surface) that the mark is left on, which affects the appearance and resultant interpretation of the friction ridge flow or ridge details.
- ❖ **CADAVER:** A deceased person.
- ❖ **CHANCE PRINT OR SCENE OF CRIME PRINT:** means any chance or accidental impression left by friction ridges skin on a surface, regardless of whether it is visible or invisible at the time of deposition.
- ❖ **DISPATCH CHEQUE:** The details in triplicate prepared by the State Bureaux containing Name, Parentage of the convicts and Cheque No., Date and District of Origin of Finger Print Record Slips for forwarding the Finger Print Record Slips to other Bureaux are called Dispatch Cheques /Invoice.
- ❖ **DATABASES:** Collections of data and associated material designed to provide information rather than for archive, which are stored systematically in hard copy or electronic format and are, e.g. used for: providing information on the possible origin of objects or substances found in casework; and/or providing statistical information.
- ❖ **EDGEOSCOPY:** Study of the contour or shape of the edges of friction ridges.
- ❖ **EXPERT (CFPB):** 'Expert' means an officer working in the CFPB having undergone thorough training in classifying, recording & searching of F.P. Slips and examining of latent and documentary prints either in any State Bureau or at the Central Finger Print Bureau and having a Finger Print expert certificate by clearing the All India Board for Examination of Finger Print Experts.
- ❖ **ELIMINATION FINGER PRINTS**1: Finger Print images taken from persons with legitimate access to evidence under examination for latent fingerprint. 2: Exemplars of friction ridge skin detail of persons known to have had legitimate access to an object or location.
- ❖ **HENRY CLASS FINGER PRINT CLASSIFICATION**— an alphanumeric system of Finger Print classification named after Sir Edward Richard Henry used for filing, searching, and retrieving ten-print records.
- ❖ **FINGER PRINT SLIP FOR RECORD:** The form containing 10-digit rolled impressions and plain prints taken in proper sequence for record with particulars regarding name, parentage, residence, conviction, etc. of a convict is called a Finger Print Slip for record.
- ❖ **FINGER PRINT SLIP FOR SEARCH:** Similar form with 10 digit impressions when

used for search to trace previous conviction from the record of the Bureau is called Finger Print slip for search.

- ❖ **INKED FINGER PRINT**- the Intentional recording of the friction ridge skin. Using black printer's ink and a Finger Print roller, the ridge characteristics of a particular individual, can be formally recorded on a standard Finger Printcard.
- ❖ **INTERPOL**—Originally the International Police Commission, established in 1923 with the first headquarters in Vienna, Austria. With the General Secretariat now in Lyon, France, Interpol focuses on international crimes that threaten public safety, especially those involving terrorism, criminal organizations, drugs, finances and technology, and trafficking in human beings, and provides fugitive investigative support.
- ❖ **LATENT(Chance print)/LATENT SEARCH**—A search of a latent print against other latent prints, which are usually stored in the Unsolved Latent File, and which has the potential to link crimes committed by same person, even though that person is as yet unidentified. Also referred to as a latent/unsolved latent search.
- ❖ **LIVESCAN**: "Livescan is an electronic biometric platform for capturing, storing and transmitting friction ridge detail.
- ❖ **MINUTIAE DATA**—The data representing the relative position, orientation, and in some cases, the relationship and/or types of the minutiae in a Finger Print image.
- ❖ **PATTERN CLASSIFICATION**—Characterization of a Finger Print as containing one of seven Finger Print patterns: arch, tented arch, right-slant loop, left-slant loop, whorl, amputation, or scar. The Integrated Automated Finger Print Identification System will provide for both pattern level and Henry classifications.
- ❖ **TEN-PRINT**—A Finger Print card (or Finger Print card equivalent) containing rolled and plain impressions from the ten fingers of an individual. The standard format contains 14 impressions: one rolled Finger Print impression of each finger, plain Finger Print impressions of each thumb, and plain impressions of the four fingers of each hand simultaneously.
