FOREWORD

It is a matter of immense pleasure to bring out the 22nd edition of 'Finger Prints in India' for the year 2018. The publication of Finger Prints in India commenced in the year 1997.

The publication contains details of the important cases solved by the Central Finger Print Bureau (CFPB) as well as State Finger Print Bureaux (SFPBx) based on Finger Print science. The revised publication has in-depth information under crime specific heads and sub-heads. The publication also carries information on transaction activities of SFPBx, including visits to different scene of crimes, number of chance prints developed, document cases examined, experts opinion given in Courts of Law etc. It is a matter of satisfaction to note that the Finger Print staff of various State/UT Bureaux visited 36,627 scenes of crimes (SOC) and developed chance prints in 16,715 cases. In these cases, 40,111 chance prints were found fit for comparison. The Bureaux also examined and gave opinion on 136 document cases.

NCRB entered an agreement with M/S Smart Chip for installation and commissioning of National Automated Fingerprint Identification System (NAFIS). It is implemented on the principle of cloud computing model where Finger Print slips enrolled at the districts are stored in an exclusive space allocated for that State/UT. Authorized users from State/UTs can edit/modify/update the Finger Print data stored in the exclusive space and other state users can only search the slips for Finger Print matching. If adequate staff is not available at districts then Finger Print slips can be digitized at the SFPB. Chance prints developed from the Scene of Crime and the Finger Prints of the arrested persons can be searched against the State/Central Data base from the workstation installed at SFPB/districts. The implementation of NAFIS will greatly reduce the time and efforts as there will be no need to send the physical Finger Print slips to SFPB/CFPB and the IO would be able to get the results online instantly. A mobile app is also being rolled out as a part of NAFIS which will enable the police personnel posted at check posts to verify the antecedents of suspects without taking them to the police stations.

NCRB is also making efforts for amendments in the Identification of Prisoners Act 1920, so as to empower police officers/FP experts to capture advance biometrics of arrested persons as well by removing mandatory one year rigorous imprisonment clause for taking finger prints.

Further, the XIX All India Conference of Directors of Finger Print Bureaux of States/UTs was organized on 21st and 22nd June 2018 at MCR-HRD Institute, Hyderabad, Telangana. A total of 98 delegates from various Finger Print Bureaux of the States/UTs, CFSL-CBI, CFPB/NCRB, Colleges and Universities participated in this two day event and deliberated on important issues related to Finger Prints.

In order to have a streamlined operation/work flow in Finger Print Bureaux, NCRB has taken a call to get them accredited by NABL (National Accreditation Board for Testing and Calibration Laboratories), as per a decision point in Directors' (Finger Print Bureaux) Conference.

I take this opportunity to compliment Central Finger Print Bureau team for their efforts in revising input collection proforma and brining out this publication. I am sure that the present edition of this annual report will be found useful by all stake holders. Suggestions, if any, are welcome.

EXECUTIVE SUMMARY

‘Finger Prints in India 2018’ is the 22nd edition of annual publication of Central Finger Print Bureau (CFPB) under the aegis of National Crime Records Bureau (NCRB). It presents the annual performance report for the calendar year 2018, of the Central and State/UT Finger Print Bureaux (SFPBx), including the activities, achievements, database status, trainings undertaken etc. It also presents other useful information such as relevant laws, equipment and relevant books, all at a glance, enabling the Finger print experts, readers and the stakeholders throughout the country to equip themselves with the latest developments in the field.

Chapter I - ACTIVITIES OF CENTRAL FINGER PRINT BUREAU

In the year 2018, CFPB was able to examine and send opinion/report in 136 document cases received from Nationalized Banks, Recruitment Agencies, Insurance companies, and 529 chance prints received from various State/UT Finger Print Bureaux. The Bureau has been able to achieve a search slip trace percentage of 11.23. The bureau organized the XIX All India Conference of Directors of Finger Print Bureaux on 21-22 June, 2018 at MCR-HRD Institute, Hyderabad, Telangana with a participation of 98 delegates. CFPB has conducted the All India Board Examination for Finger Print Experts (AIBE) 2018, during February 2-5, 2019, for Finger Print personnel from States/UTs. In AIBE 2018, 112 eligible nominations were received, out of which 104 candidates appeared for the examination and 94 candidates passed, making the passing percentage of AIBE 2018 as 90.4%. The first position was bagged by Sh. Rejani Raj V R, Finger Print Searcher from Kerala.

The process of procuring long awaited National Automated Fingerprint Identification System (NAFIS) has started. The Request For Proposal (RFP) prepared by CFPB experts for NAFIS has been approved by MHA and a global tender has been floated to procure world class NAFIS for Indian Police. NAFIS aims to function as the central repository of all crime and criminal finger print data available in all States/UTs, and facilitate a national level searchable finger print information repository.

A detailed proposal along with comprehensive justification to amend the existing Identification of Prisoners Act 1920 (IPA) was sent to MHA for approval by CFPB/NCRB in the month of July 2018. Meetings were held at MHA and opinion of the Ministry of Law has been taken. The Act, if amended, would include more number of finger prints of arrestees/convicts leading to a significant increase in the national database. The key amendments proposed were: Change of the title to ‘Identification of Arrested and Suspected Persons’ Act; inclusion of biometrics such as Palm Impressions, Voice samples, Iris Scan, DNA typing etc.; removal of mandatory 1 year rigorous imprisonment clause; powers for Magistrate to order for taking measurements of Juveniles.

The National Accreditation Board for Testing and Calibration Laboratories (NABL) is an autonomous body under the guidance of the Dept. Of Science & Technology, Govt. of India whose purpose is to provide accreditation to testing and calibration of clinical laboratories in the country. In order to have a streamlined operation/work flow in Finger Print Bureaux, NCRB has taken a call to get accredited by the agency as per a decision point in Directors’ (Finger Print Bureaux) Conference 2018.

Chapter II - ACTIVITIES OF STATE FINGER PRINT BUREAUX

Main responsibility of FP expert is to develop the chance prints left by criminals at the crime scene and to match with the fingerprints of the existing criminals. Further, FP experts also receive fingerprint slips of arrested persons for providing the previous criminal history by comparing fingerprints. Expert opinion is given on the handwriting in the questioned documents referred to the Finger Print Bureaux. As the total number of activities is very large, each State has submitted a few important cases based on the sensitivity, value of property lost/recovered, detection of a series of cases etc. for printing in this publication.

In the year 2018, FP staff from SFPBx visited 36,627 crime scenes and found 40,111 chance prints fit for comparison. SFPBx has forwarded details of 144 important cases solved through finger prints in the calendar year 2018 to CFPB for inclusion in the annual report, out of which 63 were shortlisted for publishing in 'FPI 2018' under murder, theft, dacoity, robbery, Arms Act and NDPS Act.

Chapter III - TRANSACTION ACTIVITIES OF CFPB AND SFPBx

State wise statistics related to transactional activities such as number of FP slips of convicted and arrested persons received, accepted and enrolled, number of crime scenes visited, number of chance prints developed and compared, number of document cases received and opinion given are covered in this chapter. CFPB received 41,814 FP Slips for record & 46,311 cases for search in the central database. State Finger Print Bureaux received 79,604 finger print record slips from Districts / Police Stations and a total of 6,26,350 fit search slips for conducting search in the respective databases of Finger Print Bureaux of States/UTs. A total of 1884 document cases were received in the SFPBx out of which 1763 cases were examined by FP experts. In 342 cases, FP experts from various SFPBx deposed in the Courts of Law for testimonies. In case of development of chance finger prints from scene of crime (SOC), Kerala topped the list with development of 12,548 chance prints, followed by 9,971 chance prints by Andhra Pradesh. State of Andhra Pradesh topped the list by identifying 553 chance print cases and in document cases Tamil Nadu led with 320 cases. Following table shows the All India Statistics of the finger print transactions in States/UTs during 2018.

	Convict Slips Received	Arrestee Slips Accepted	Chance Prints Developed	FP Document Cases Received
TOTAL	79,604	6,26,350	61,743	1884

Chapter IV - ANALYSIS OF FP TRANSACTION ACTIVITIES

This chapter consists of the analysis of various finger print related transaction activities performed in States/UTs. Extensive changes have been made in the Annual Statistics Report (ASR) Form 2018, which has led to the addition of many crime specific heads and sub-heads. This revision of ASR 2018 form has facilitated in gathering crime specific information from the States/UTs.

The States of Tamil Nadu, Punjab and Andhra Pradesh have examined a large number of document cases. States such as Maharashtra, Madhya Pradesh, Gujarat, Punjab and Telangana have recorded the highest number of arrestee slips. Record slips of those convicted for murder, grievous hurt, rape and attempt to murder are the highest in number as compared to other IPC heads whereas the search slips recorded also demonstrate a sharp rise in crimes such as kidnapping, abduction and assault on women. The number of persons arrested and convicted for the offence of theft is higher than those involved in each of robbery, burglary and dacoity. The number of persons arrested and convicted under NDPS Act are highest in other SLL crimes. States of Madhya Pradesh, Gujarat and Rajasthan received the highest number of conviction slips.

Chapter V - CAPACITY BUILDING

This chapter provides information pertaining to capacity building and various training programs conducted during the calendar year. CFPB/NCRB organizes a number of training/refresher courses for police officers/staff of FPBx from India as well as from foreign countries.

 - m) Information about R&D activities taking place in the SFPBx.
 - n) Chance Print (Scene of Crime) details describing a clear picture of chance print comparison happening in SFPBx and in districts. The table has a column to specify Chance Prints lifted by Finger Print staff, police personnel or other staff.
 - o) Provision is made to furnish judgment details regarding important cases solved by SFPB.
 - p) Information about finger print equipments available at state FPB or subordinate offices.
 - q) Information on vehicles available for finger print work at state, district and police station levels is also introduced.
- ii) On receiving the data from States/UTs, CFPB officials compile and verify with the statistics of previous years. If any abnormality is noticed, then concerned States/UTs are asked to reconfirm/rectify.
 - iii) Based on the reconfirmed data, this publication is prepared.
 - iv) In chapter IV, analytical and graphical representations of transactional details of the states have also been presented for ease of comprehension and comparison.

ACTIVITIES OF CFPB

CHAPTER-I

Chapter-1

ACTIVITIES OF CFPB

The Central Finger Print Bureau is an apex body in the country which co-ordinates, guides, monitors and provides technical support to the State Finger Print Bureaux, as well as investigation agencies and international organizations like INTERPOL in all matters related to Finger Print Science.

The Bureau maintains the records of 10-digit Finger Print slips of persons convicted under various laws as per OM No. 115/POLICE (L)/55(8) Intelligence Bureau, Ministry of Home Affairs, Government of India, dated 19.02.1955, on the subject of 'Establishment of CFPB and Instructions to be followed by State Bureaux and District Police Officers in sending FP Record Slips. As on **31.12.2018**, number of digitized Finger Print slips maintained in the database is **12,12,429** which is tantamount to over 12 million (or one crore finger impressions). State Finger Print Bureaux and INTERPOL (through CBI) are regularly requesting CFPB to furnish the previous criminal antecedents of the arrested persons by sending the arrested persons Finger Prints. Similar requests are also being made to CFPB with respect to Chance Prints developed at the scene of crime.

The Bureau imparts training in various aspects of Finger Print Science to police and non-police personnel coming from States/UTs of India as well as abroad, as per Indian Technical and Economic Cooperation (ITEC) and Special Commonwealth African Assistance Programme (SCAAP) of Ministry of External Affairs. The Bureau is also mandated to conduct All India Board Examination (AIBE) annually for the accreditation of Finger Print Experts. All India Conference of Directors of Finger Print Bureaux of States/UTs is also being organized by CFPB with the assistance of a State which is ready to host the event. The conference provides a forum for Finger Print professionals to deliberate on recent advancements in the field of Finger Print science and other issues concerning Finger Print fraternity of the nation. CFPB has a branch at Kolkata which is mainly organizing training courses for North Eastern States and examining the questioned documents.

A. Important Document Cases Solved at CFPB, New Delhi

During the year 2018, New Delhi Office has given opinion on **136** questioned document cases which includes cases referred from Banks, Income Tax Authority and Judiciary. Brief descriptions of few notable cases are described below:

i. Document Case number NIA-01-A/2018

This document case was received from National Investigation Agency (NIA), MHA, New Delhi-110037, for finger print examination and furnishing expert opinion thereon. The finger prints were of extremely poor quality but the finger print expert at CFPB with his dedicated and constant efforts was able to establish the identity of three questioned prints with one original history ticket of an inmate Mudsar Ahmad Bhat s/o Abdul Rashid Bhat resident of Kakapora, Pulwama, Kashmir, J&K. The

officer was suitably appreciated by SP, NIA, for the extreme display of dedicated hard work and professionalism.

ii. Document Case No 112/2018

Finger print expert of CFPB were handed over a case pertaining to examination of finger prints in an income tax case, where authorities suspected impersonation. The case involved examination of large number of disputed prints on the revenue stamps put against different names on 5 registers. The prints were partial, smudged, faint and thus of very poor quality, and posed great difficulty to examine and compare because of very small clear area. The case was very voluminous requiring examination of very large number of prints but FP experts of CFPB did his job meticulously with full dedication, consulting and updating his seniors time to time regarding the development of case and with their experience established the truth beyond doubt that the finger prints were created by repetition of digits against different names and grouped the identical prints together, thus conclusively established the impersonation in the case, The total amount involved in the case was around Rs.15 crore.

iii. Document Case number 96/2018

CFPB Finger print expert handed over a case pertaining to examination of finger prints in a Provident fund fraud case, which involved examination of large number of number of partial prints on the revenue stamps. The prints were partial, smudged, and in some cases faint and of very poor quality, posing great difficulty to examine and compare. The case was very voluminous requiring examination of large number of prints, FP experts did their job painstakingly with full dedication and with his experience established the truth beyond doubt that all the fingerprints were created by not more than 4 persons and grouped the identical prints together, thus conclusively establishing the impersonation in the case. The total amount of money involved in this particular case was 1,71,55,100/- rupees.

iv. Document Case number 111/18

A case received from CJM, Barabanki related to examination of questioned finger prints on disputed documents in case No. 297/14 of P.S. Fatehpur, district Barabanki u/s 419/420/467/468/471/504/506 IPC. The original Power of Attorney purported to be executed by Sh. Shiv Kumar Singh s/o late Sh. Janki Baksh Singh in favor of Sh. Lal Singh s/o Uday Bhan Singh bearing questioned finger impressions on two sheets was the disputed documents. The validity of original power of authority needed to be examined. Although the quality of finger prints was very poor and the document was laminated for protection, The experts at CFPB with their perseverance, dedication and professional skill could establish the genuineness of the document and help the court authorities.

v. Document Case number. 31 to 75/2018

CFPB Finger print experts were handed over the case where authorities had been issued summons and those desired urgent and immediate attentions. Expert was handed over 45 cases related to suspected post office withdrawals, where despite very poor quality prints; the finger print experts could conclusively establish impression in all the cases with their professional competence and helped post

office authorities ascertain the truth and at the same time a hope to rightful possessors of money a chance to recover their money.

B. Important Document Cases Solved at CFPB, Kolkata

During the year 2018, Kolkata Office had given opinion on 81 questioned document cases which included cases referred from Government and PSUs. Brief descriptions of few other notable cases are described below:

i. Document Case No. 31/2018:

A case had been received on 13.07.2018 from Ld. Civil Judge (Sr.Dv.II), Koderma, Bihar containing therewith two Sale Deeds in original for examination and furnishing Expert's opinion thereon. The brief history of the case is that one Eitwari Sao, purportedly created two different Sale Deeds of one piece of land (Sale Deed No.9271 dated 15.12.1986 and 7263 dated 11.09.1991). By preparing the said two Deeds, Eitwari Sao had sold out the said single piece of land to two different persons namely Hem Lal Shaw in the year 1986 and Govind Sarwan Modi in 1991.

The finger impressions against the name of Eitwari Sao appeared in both the sale deeds have been examined at this unit thoroughly and scientifically and found identical which revealed committing of offense by Eitwari Sao. Accordingly, report had been forwarded to the sender of the case on 12.12.2018.

ii. Document Case No. 40/2018:

A case had been received from Vigilance Officer (Personnel), N.F. Railway, Maligaon, Kamrup, Assam on 26.11.2018. The gist of the case is that, Shri Anil Kumar Verma had joined Diesel Locomotive Workshop and posted at Varanasi in the year 2011 as Group-D staff. Later on he resigned from the said service. Further, with a different name as Shri Swar Sangam joined N.E. Railway, Katihar in the year 2017 and later on posted at Maligaon, Assam as Group-C employee.

One of the responsible officers of DLW, Varanasi in turn transferred from Varanasi to Maligaon, Assam and he surprisingly detected that Shri Anil Kumar Verma of Varanasi DLO is working at N.E. Railway, Maligaon, Assam in the name of Swar Sangam. Immediately the officer collected the Service Books of the suspects and forwarded to CFPB, Kolkata office for examination of finger prints appearing in the service books and furnished the Expert's opinion thereon.

The finger impressions against the name of Anil Kumar Verma and Swar Sangam appearing in two different Service Books were examined and found identical. It disclosed that Shri Anil Kumar Verma and Swar Sangam is one and same person. Since the age of Anil Kumar Verma for selection in the Railway service had already been over, Shri Anil Kumar Verma got himself appointed at N.E. Railway, Maligaon in the name of Swar Sangam by production of forged documents including fake age proof. Reports were forwarded to CVO, N.E. Railway, Maligaon on 10.12.2018 through their special messenger.

iii. Document Case No. 32/2018:

This case has been received from Workshop Personnel Officer, S.E. Railway, Kharagpur on 27.07.2018. In order to verify the claimant who has claimed for unmarried daughter Family Pension putting her LTI in the proforma claim form, Personnel Officer has forwarded two old records of the year 1987. The claim form dated 13.09.2014 for unmarried daughter Family pension, submitted by Miss Binoda had also been received by this office for examination.

Finger impressions appeared in all the above mentioned document has been examined thoroughly and found that the finger impressions in GC-7 dated 16.04.1987 and in GP-47 dated 04.06.1987 against the name of Miss Binoda was IDENTICAL with the finger impression appeared in the claim form for unmarried daughter Family pension against the name of Miss Binoda and thus it proves the genuineness of claimant Miss Binoda. Accordingly reports were forwarded to Workshop Personal Officer, S.E. Railway, KGP on 30.11.2018 through their special messenger.

iv. Document Case No.37/2018:

This case had been received from Asstt. Personnel Officer-III, Eastern Railway, Asansol on 13.12.2018. The description of the case in brief is that one Shri Manav Kumar, S/o Ganesh Prasad Verma has been newly recruited as Helper in S&T Deptt of Asansol Division. During selection process a total 14 finger impressions of said Shri Manav Kumar (Q1 to Q14) have been obtained in different documents. To ascertain the genuineness of the candidate (Manav Kumar) the Railway Authority of Asansol Division has forwarded all 14 documents to this office bearing finger impressions of Shri Manav Kumar for examination. This office has thoroughly examined the case and found that the out of total 14 finger impressions appeared in different documents against the name of Manav Kumar, 9 finger impressions marked as Q1 to Q8 and Q10 remained inter-se identical while finger impressions against the name of Manav Kumar, appeared in the said documents marked as Q9, Q11 to Q14 are different. The Report of the case had been forwarded to the Eastern Railway authority through their special messenger on 21.12.2018.

C. OTHER ACTIVITIES AND EVENTS BY CFPB

1. Procurement of National Automated Finger print Identification System (NAFIS)

Currently installed Automated Finger Print Identification System called FACTS 5.0 has become obsolete and its supplier has advised CFPB to replace it with latest system called FACTS7.0 Actually, FACTS 5.0 was designed for capacity of one million FP slips and we have crossed that limit. When CCTNS was conceptualized in 2011, M/s PWC was engaged as consultant for preparation of RFP to procure National Automated Finger Print Identification System (NAFIS). However, MHA dropped that plan with an intention to use Aadhaar system. Since, Unique Identification Authority of India (UIDAI) has denied sharing their data with other agencies, NCRB has requested MHA to accord an approval for procurement of NAFIS and in-principle approval was given on 25.08.2017. NCRB officers prepared RFP document without engaging any Consultant. Highly cost effective architecture is proposed by which States need not have to procure their own AFIS. Even the States, who have recently procured latest AFIS, can utilize their investment because their data can be replicated to centre. NAFIS aims to function

as the central repository of all crime and criminal finger print data in the country. NAFIS and CCTNS are proposed to be integrated, so that Finger Print Expert need not have to enter the demographic details of the criminal because they will be coming from CCTNS. Regular Criminal Number (RCN) maintained in NAFIS will be shared with CCTNS so that uniqueness of a criminal can be established. NAFIS would also be capable of complete integration with other biometric systems such as Iris, Facial Image Recognition etc. IFD/MHA examined the RFP and gave an approval for floating the NAFIS tender. An open tender inviting global bid was floated on 17/11/2018. IDEMIA has been awarded the tender and process of NAFIS installation is on.

2. Amendments in Identification of Prisoners Act 1920

At the time of creation of NCRB in 1986, mandate was given to NCRB to amend a very old ACT “Identification of Prisoners Act 1920” dealing with taking and recording measurements etc. of certain categories of persons. The Act is almost 100 years old and in such a long period many scientific, technological, biological and computer advancements led to discoveries and acceptance of many new biometric techniques. Present Act covers only convicts and arrested persons for offence punishable with one year RI or more but many local amendments have been made by different states, and the same Act differs from one state to another therefore uniformities required.

CFPB requested all States/UTs to offer their views about the amendments required in Identification of Prisoners Act 1920. Representatives of few neighboring states like Haryana, Delhi, and Uttar Pradesh along with BPR&D were invited to NCRB and lots of deliberations were made in this regard. Information about modern biometrics was collected and a detailed proposal was prepared highlighting all the clauses that require amendment. Comprehensive justification was also worked out and the same was sent to MHA for approval. Meetings were held at MHA and the file was forwarded to legal department. The Act, if amended would include more number of arrestees/convicts leading to a significant increase in the national database. The key amendments proposed were: Change of title to ‘Identification of Arrested and Suspected Persons’ Act; inclusion of biometrics such as Palm Impressions, Voice samples, Iris Scan, DNA typing etc.; Removal of mandatory one year rigorous imprisonment clause; powers for Magistrate to order for taking measurements of juveniles.

3. XIX All India Conference of Directors of Finger Print Bureaux held at Hyderabad

19. MEGHALAYA

Meghalaya was earlier part of the undivided Assam State and the Finger Print Bureau was located at Shillong. The State of Assam was divided into four States (Assam, Meghalaya, Mizoram and Nagaland) but the FPBx remained common for all the States at Shillong. The Finger Print Bureau of the Meghalaya State was then set up at Shillong in 2nd January 1979 as a Single Digit Bureau, Later it became a full-fledged Ten digit State Finger Print Bureau on 16.07.1980. The Bureau is functioning under the direct control of ADGP (CID), Meghalaya headed by an officer of the rank of SSP (CID). AFIS (FACTS IV) was installed by CMC Ltd. in 2002 but is presently not functional. It had **4,355** number of ten-digit finger print slips of convicted persons in its records as on 31.12.2018.

ANALYSIS OF FP TRANSACTION ACTIVITIES

CHAPTER-IV

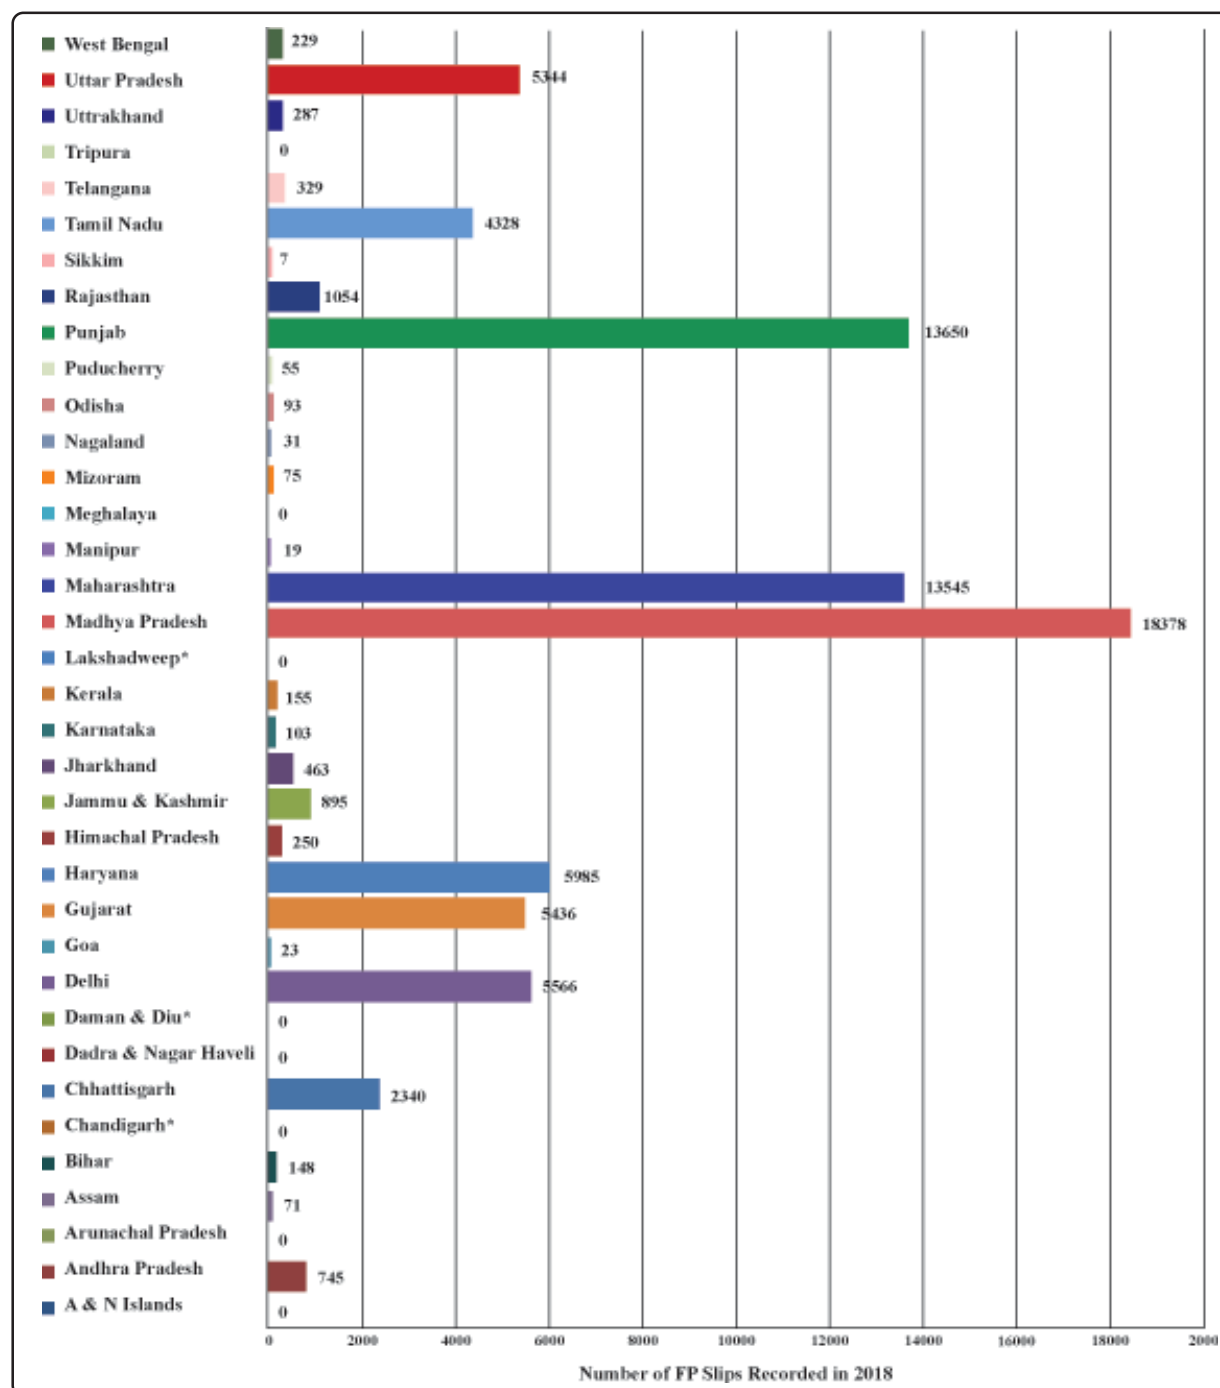

Chapter-IV

ANALYSIS OF FP TRANSACTION ACTIVITIES

Fingerprint science has evolved to be an indispensable part of not only the criminal justice system, but also the governance in countries around the world. Worldwide scientific peer groups are working along in order to utilize the science of fingerprints in as many ways as possible. This chapter deals with the analysis of cumulative factors such as conviction rate, population of the states, reasons of discrepancies in the data provided and an inter-comparison of data procured from the State Finger Print Bureaux along with the depiction of major activities such as Record slips, Search slips, Document cases and Chance prints at a glance.

Graph No.1 NUMBER OF FP RECORD (CONVICTION) SLIPS RECORDED IN THE YEAR 2018 (STATE WISE)

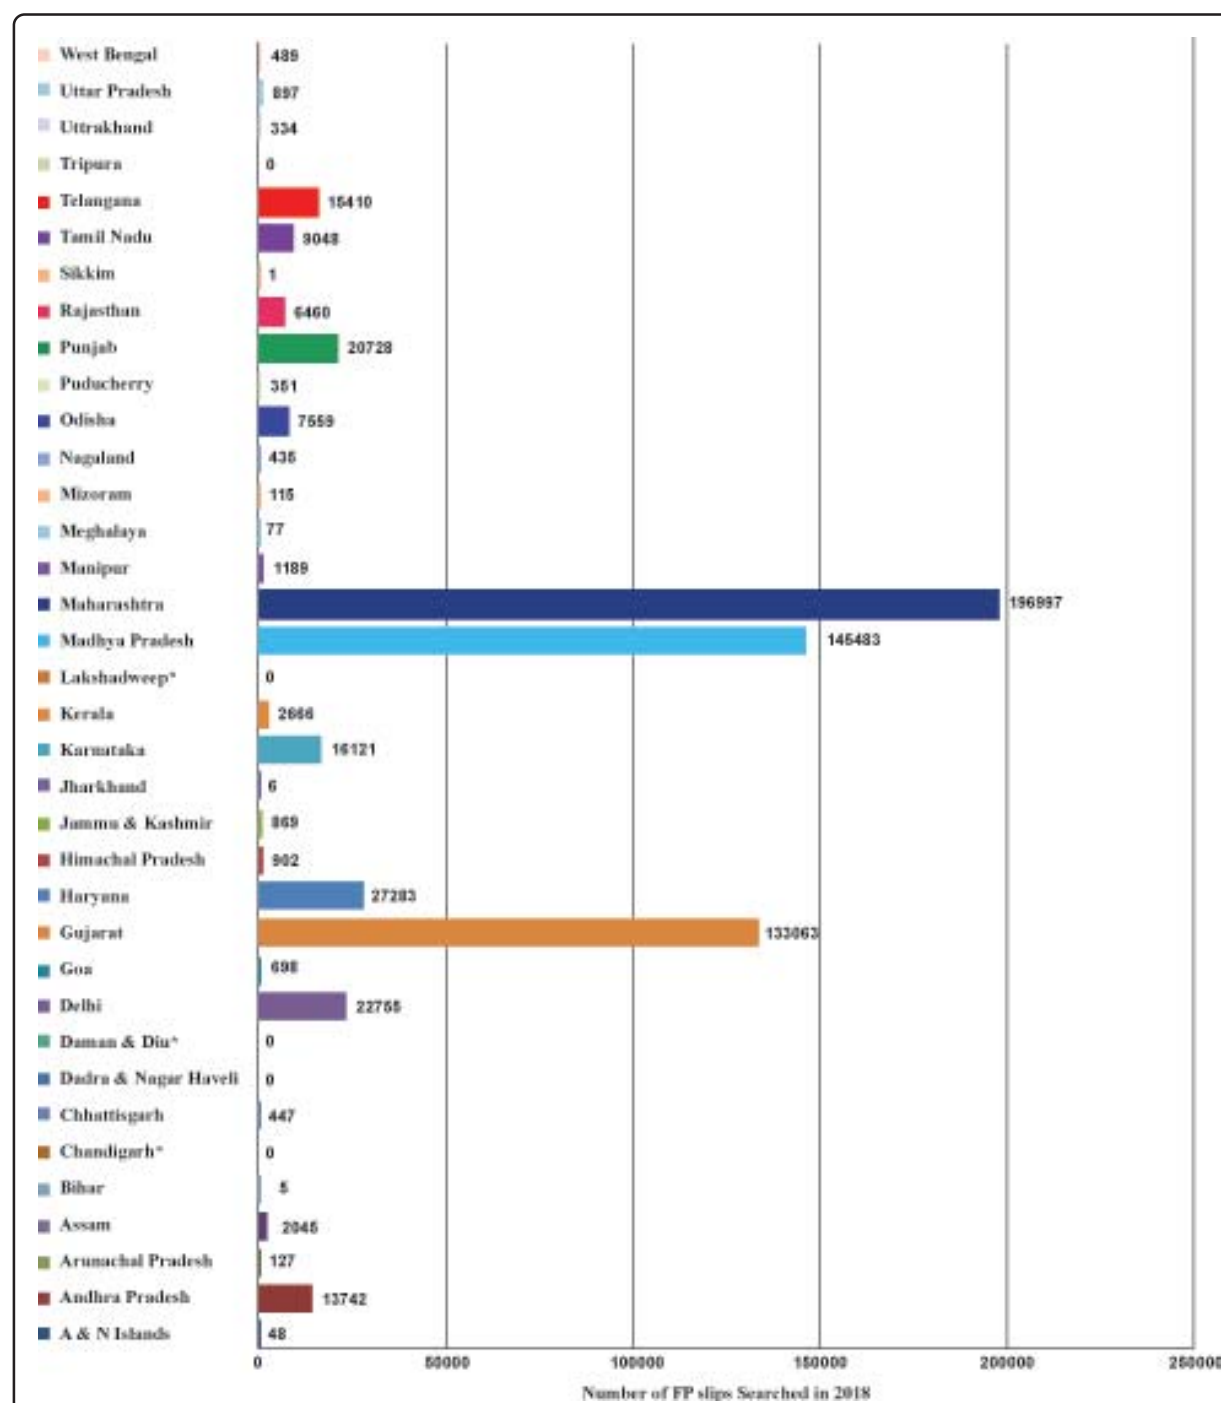

Graph 1

States like Madhya Pradesh, Punjab, Maharashtra, have recorded tens of thousands finger print slips whereas Haryana, Delhi, Gujarat, Uttar Pradesh and Tamil Nadu has recorded significantly higher number of slips in the year 2018. Karnataka, Bihar, Kerala Odisha, West Bengal, Uttarakhand and Telangana are remained underperformers.

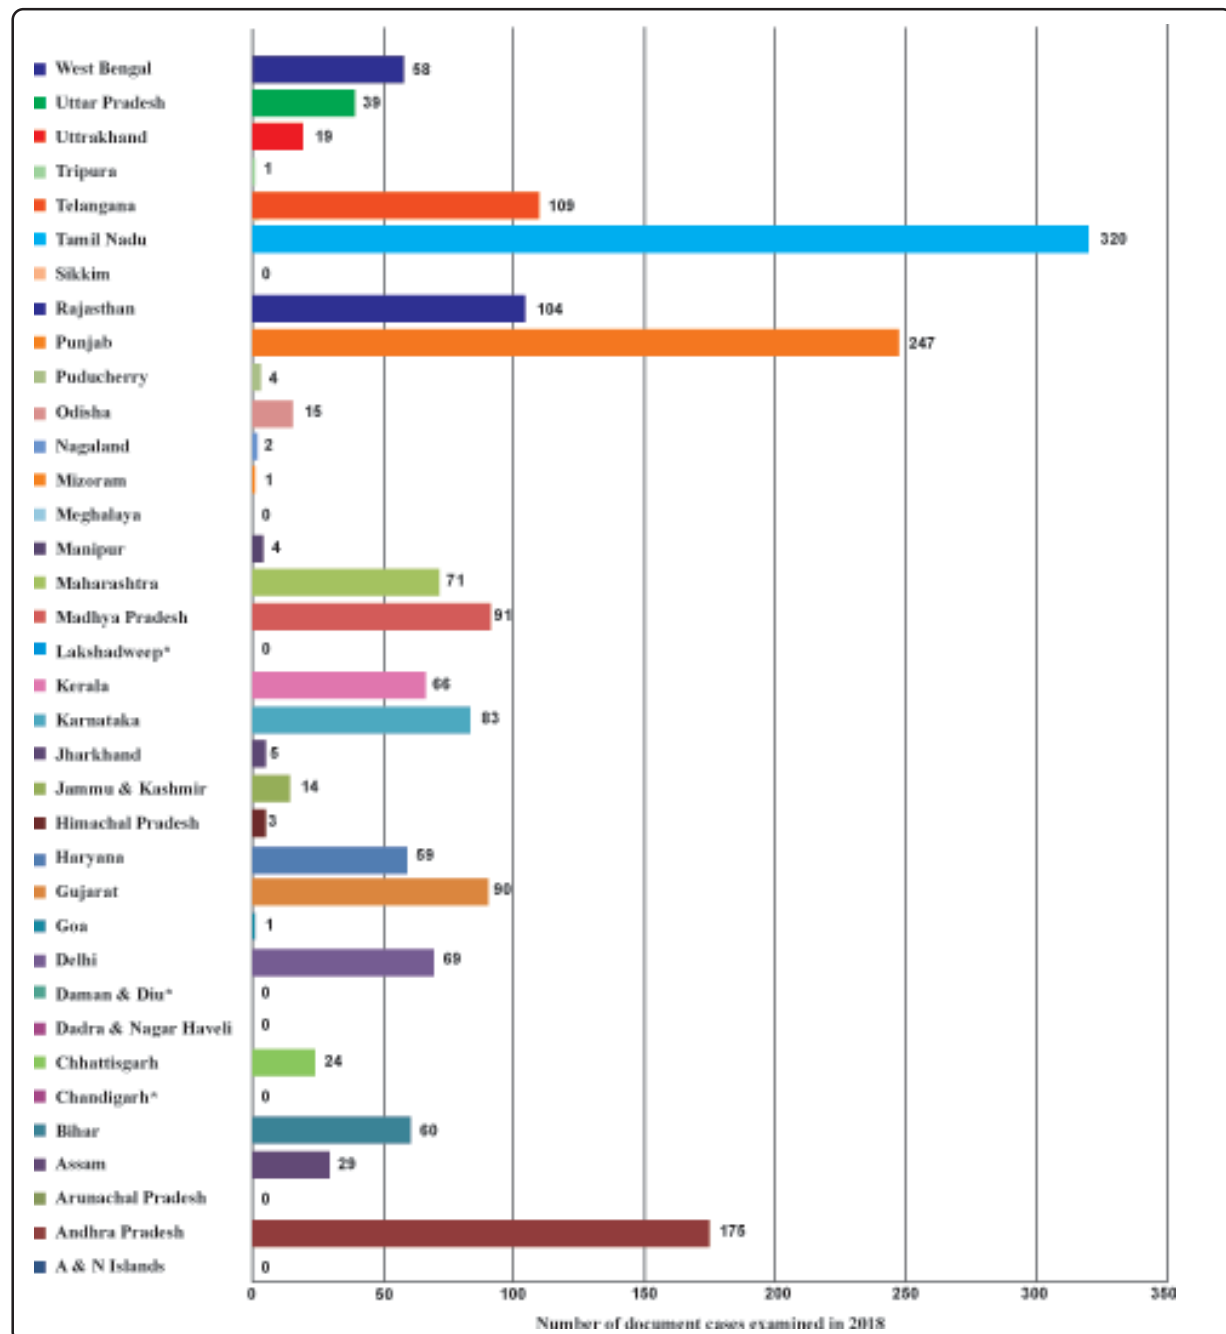

Graph No.2 NUMBER OF FP SEARCH (ARRESTEE) SLIPS RECORDED IN THE YEAR 2018 (STATE WISE)

Graph 2

States such as Maharashtra, Madhya Pradesh and Gujarat have recorded highest number of arrestee slips those are in Lakhs. Haryana, Delhi and Punjab have also recorded the higher number of slips. The point to be speculated is that some of the other states including Chhattisgarh, Rajasthan, Tamil Nadu, Uttar Pradesh and West Bengal have recorded much lesser number of FP Arrestee slips as compared to their mere size (area wise), population and number of crime incidences. Some of the States/UTs are under the process of maintenance/upgrading their AFIS.

Graph No.3 NUMBER OF DOCUMENT CASES EXAMINED IN THE YEAR 2018 (STATE WISE)

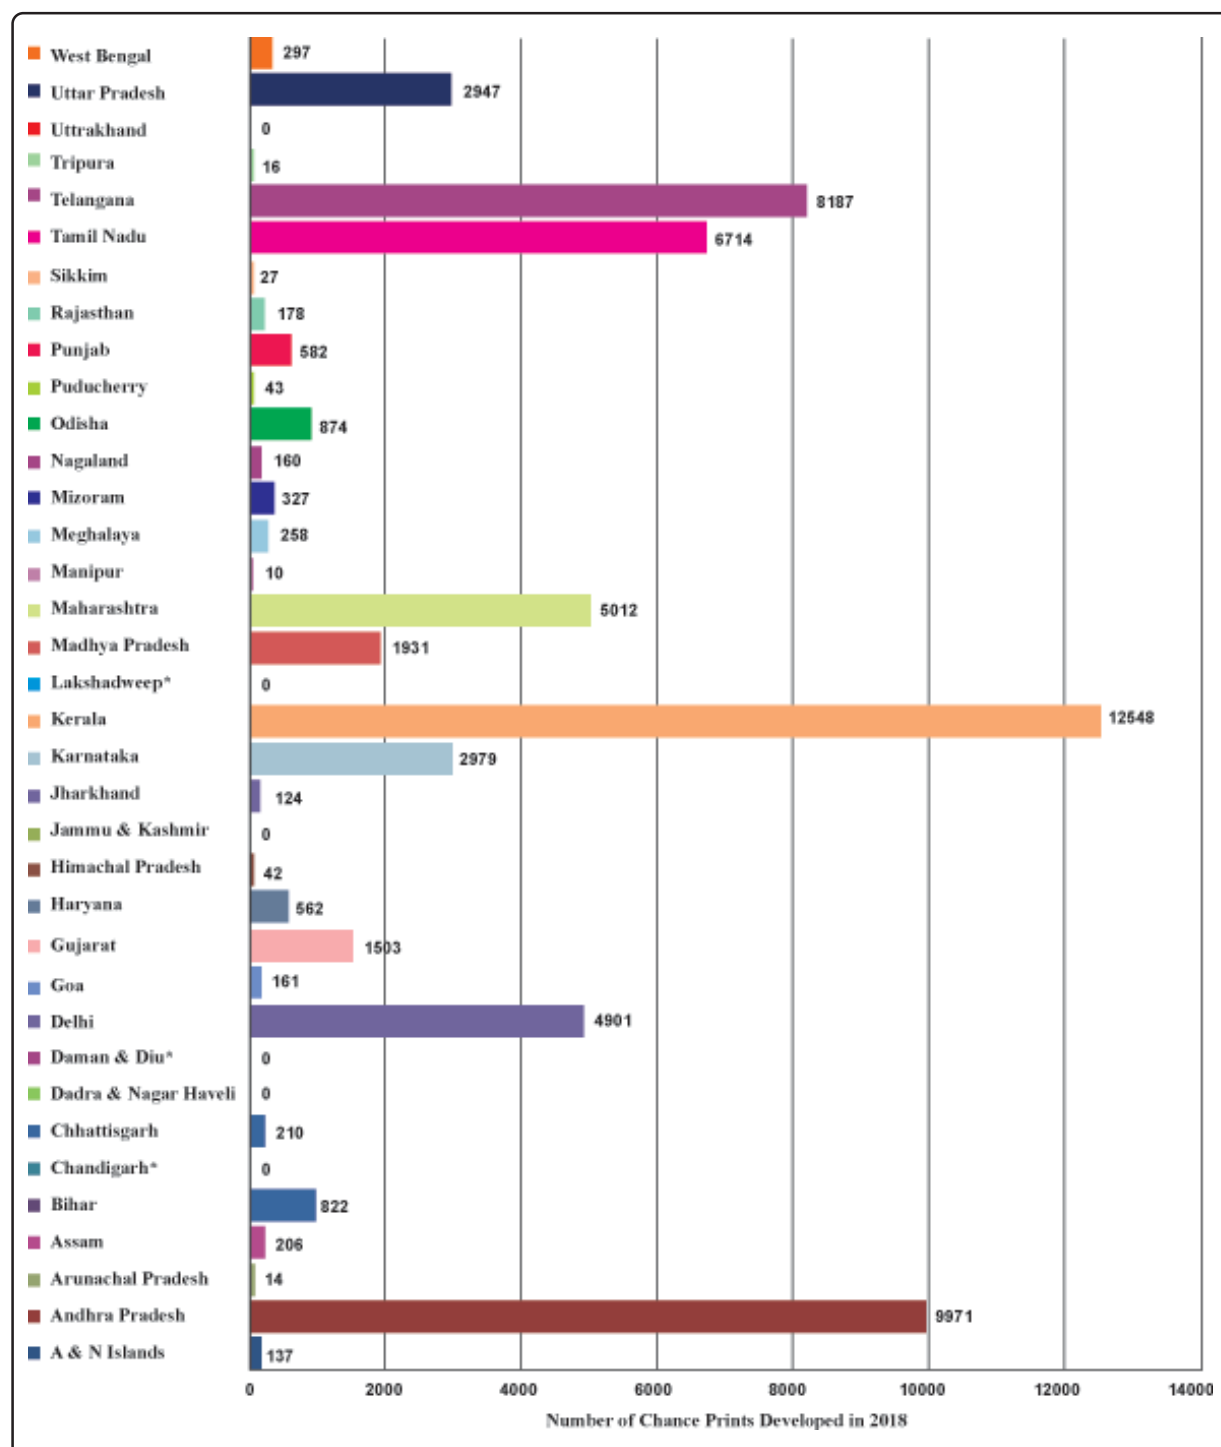

Graph3

The States of Tamil Nadu, Punjab, Andhra Pradesh, and Telangana in decreasing order, have examined significant number of document cases in the year 2018. State Tamil Nadu has examined highest number of 320 document cases in this year. As depicted in the graph, the States/UTs with an asterisk* have no established FPBx, therefore the number of cases examined are also null.

Graph No.4 NUMBER OF CHANCE PRINTS DEVELOPED IN THE YEAR 2018 (STATE WISE)

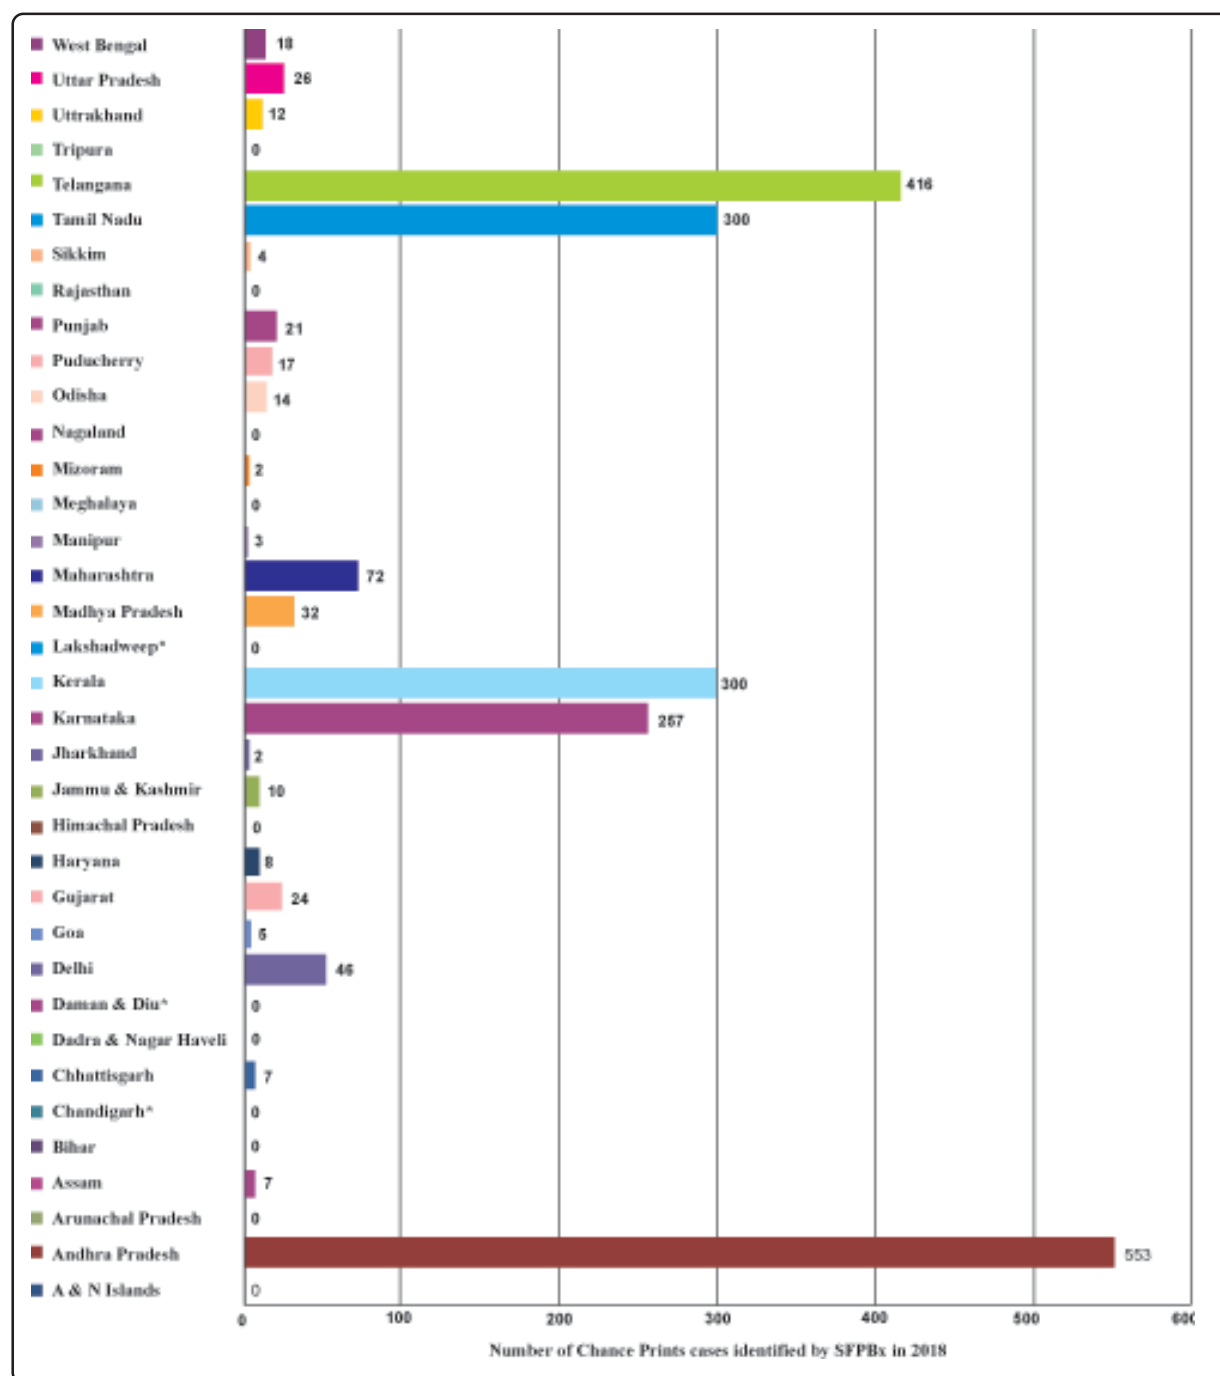

Graph 4

States of Kerala, Andhra Pradesh and Telangana have topped the list with highest number of chance prints developed in a calendar year. Tamil Nadu, Maharashtra, Karnataka and Uttar Pradesh also developed significantly more chance prints. Delhi is the only union territory to have developed a large number of chance prints.

Graph No.5 NUMBER OF CHANCE PRINT CASES IDENTIFIED DURING THE YEAR-2018 (STATE WISE)

Graph 5

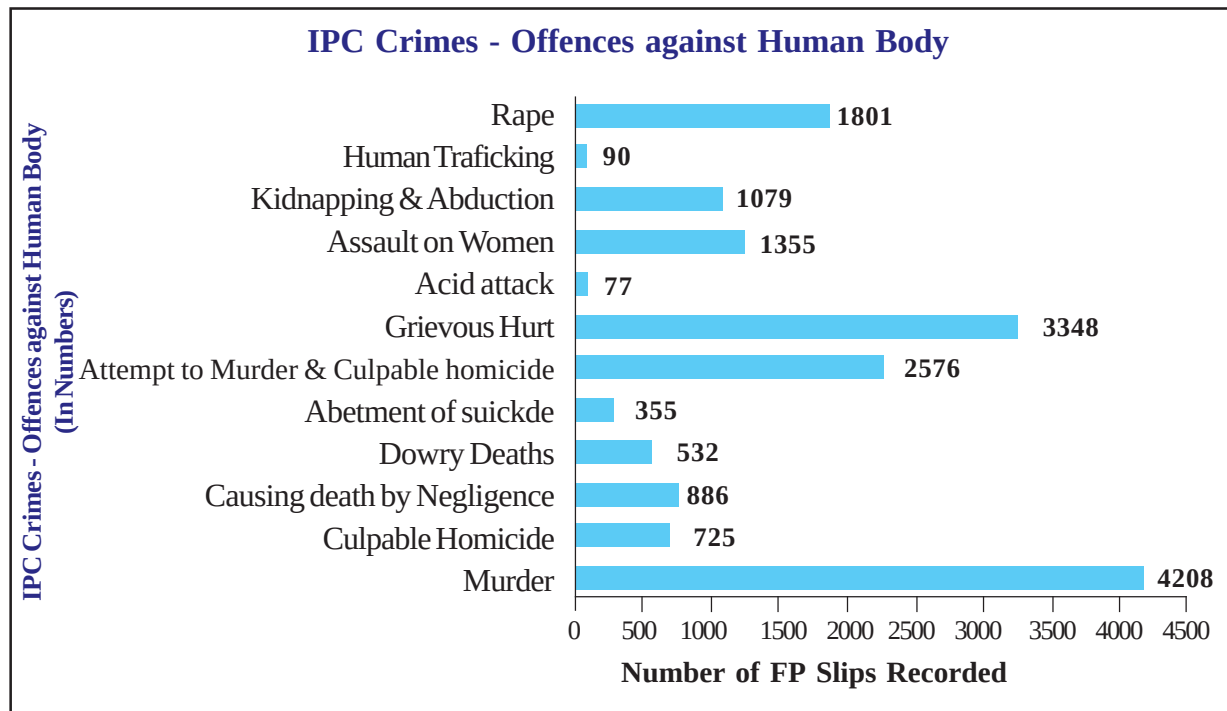

States of Andhra Pradesh, Telangana, Tamil Nadu and Kerala have topped the list with highest number of chance print cases identified in the year 2018. The States of Karnataka & Maharashtra have also identified a significant number of CP cases in succession to the above mentioned States.

IPC Crimes -Offences against Human Body

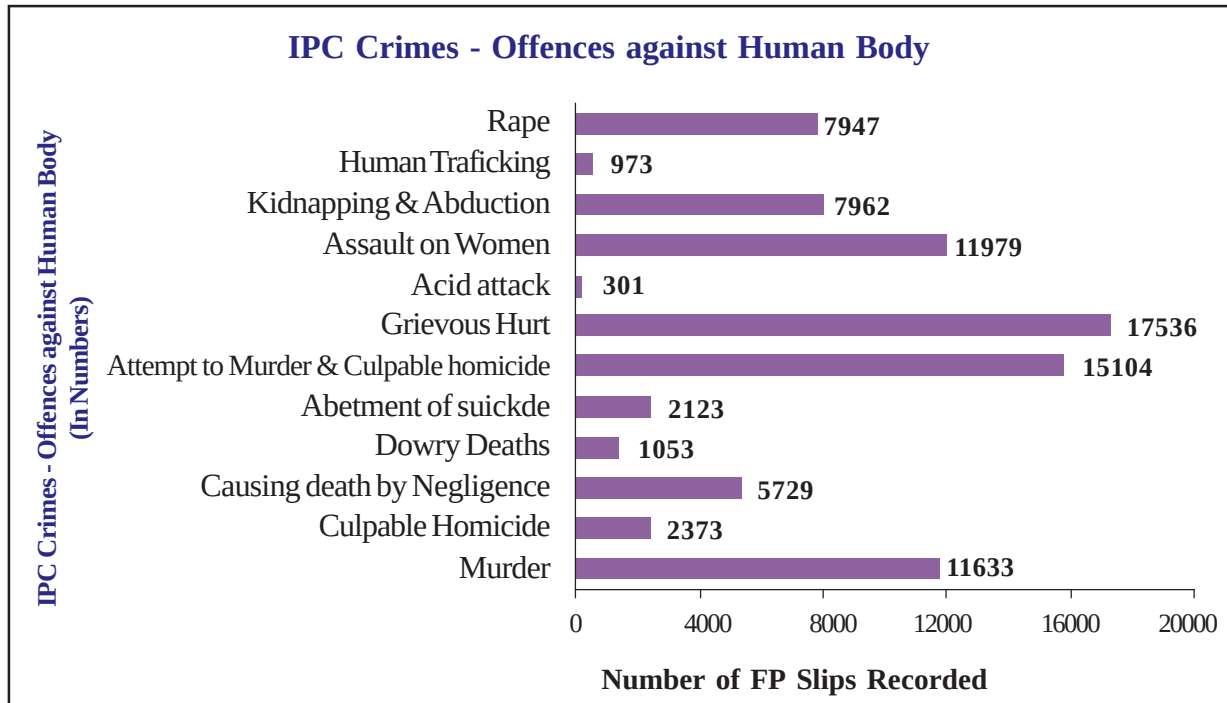

Record Slips

Graph 5

Search Slips

Graph 6

Graph 5 & 6

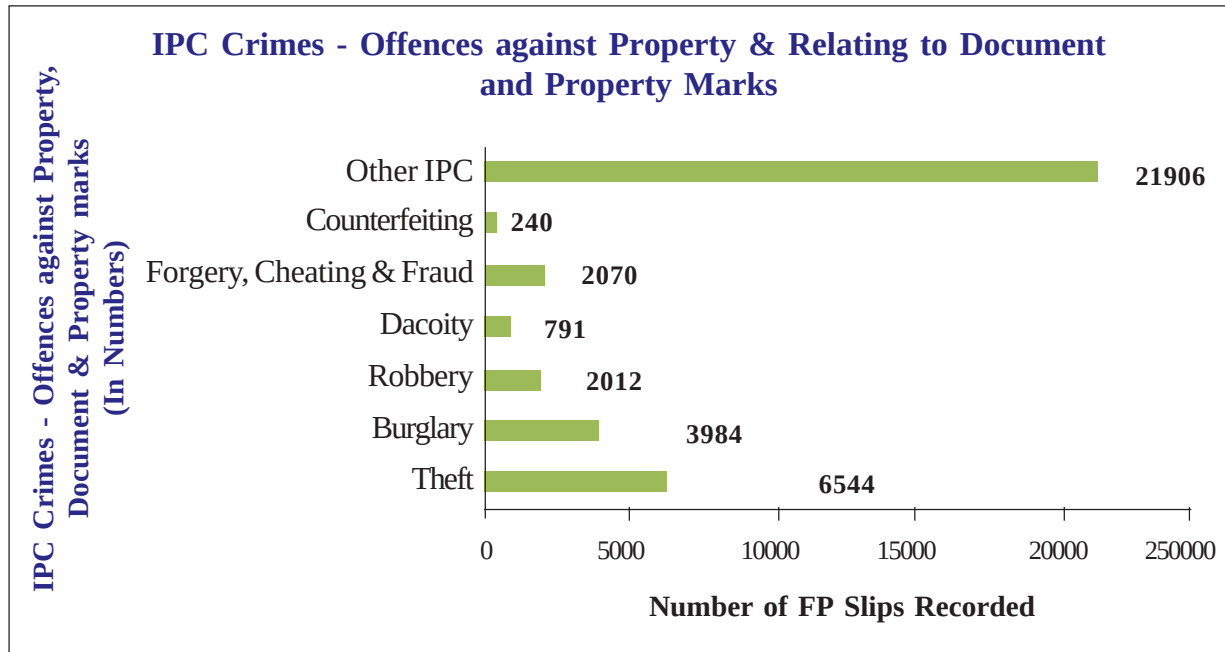

Record slips of those convicted for Murder, Grievous Hurt, Attempt to Murder and Rape are the highest in number as compared to other IPC heads whereas the search slips recorded also demonstrate a sharp rise in crimes such as Kidnapping, Abduction and Assault on women. The number of Search slips for all the heads of crime is higher than the number of conviction slips recorded.

IPC Crimes -Offences against Property & Relating to Document and Property Marks

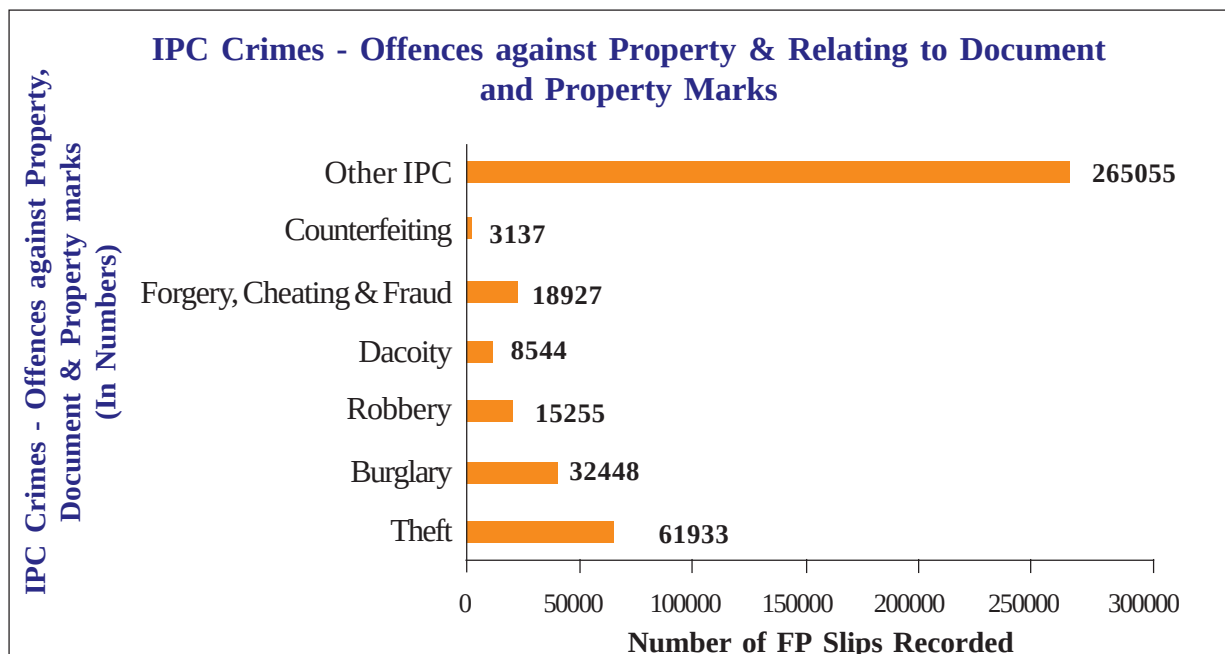

Record Slips

Graph 7

Search Slips

Graph 8

Graph 7& 8

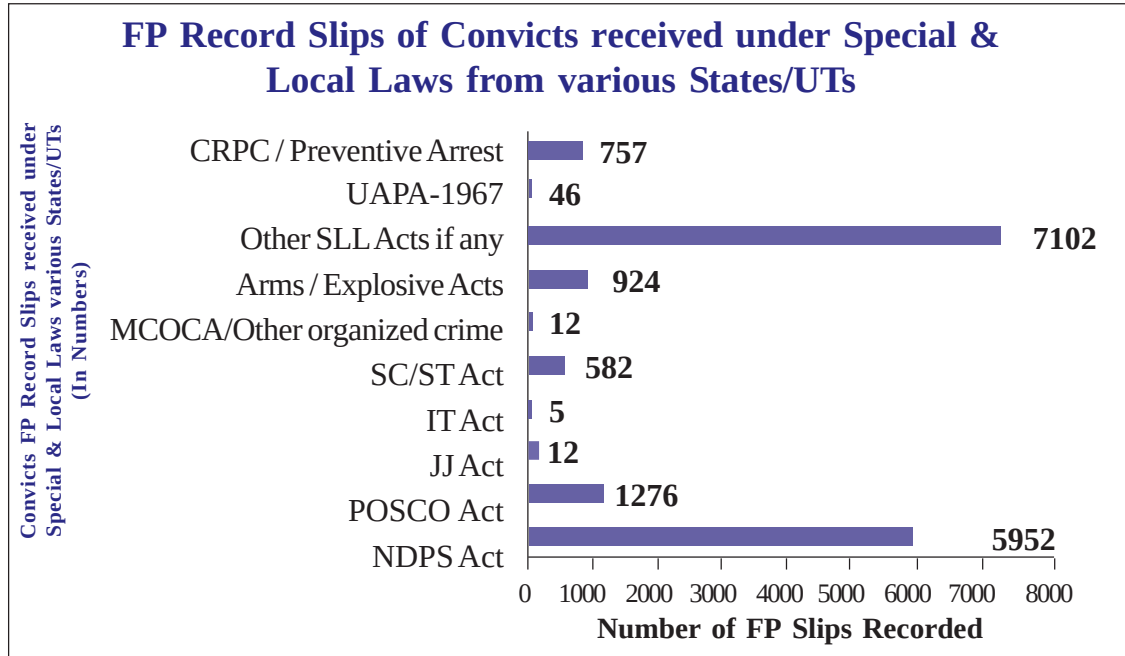

The number of persons arrested and convicted for the offence of Theft is higher than those involved in Robbery, Burglary and Dacoity. In document related offences, more number of persons has been arrested and convicted for forgery rather than counterfeiting. As 'other IPC' crime head involves the rest of the IPC sections, it has obviously documented more number of crimes than rest of the crimes combined.

Convicts & Arrestee FP Slips received and searched under Special & Local Laws from various States/UTs

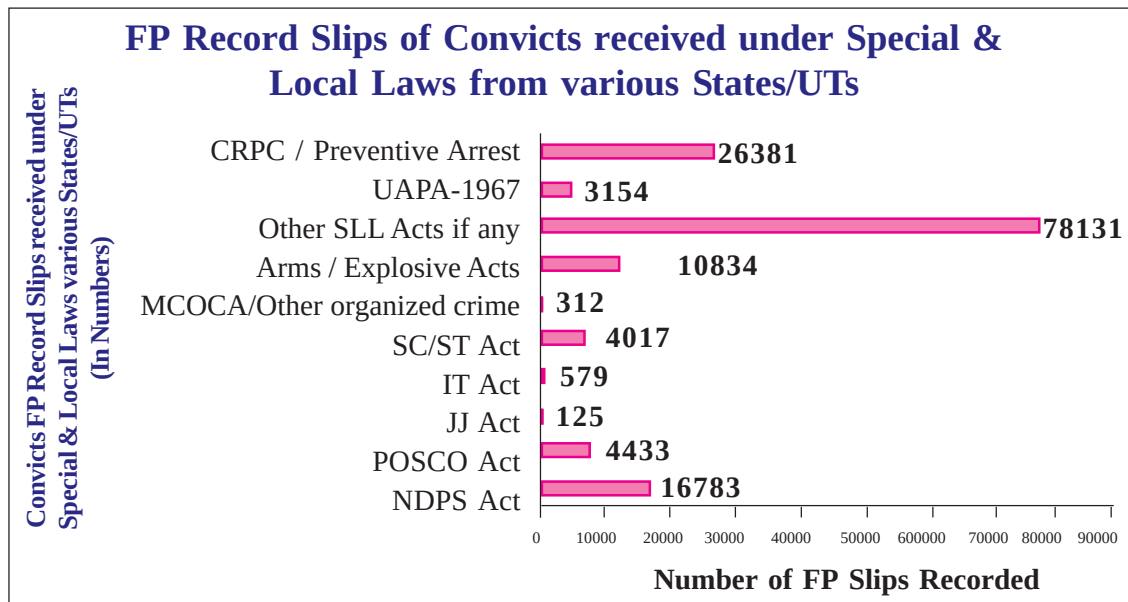

Record Slips

Graph 9

Search Slips

Graph 10

Graph 9 & 10

The number of persons arrested and convicted for NDPS comes second after other SLL crimes. 4433 persons have been arrested under POSCO Act while 1276 have been convicted. More numbers of persons were arrested under the crime head CrPC/Preventive arrest and Arms/ Explosive act. Neglecting the discrepancies in receipt, collection and forwarding of the data mentioned here and assuming

the figures to be the ground reality, Graph 9&10 highlights the fact that the number of persons arrested for a certain crime is always higher than those who get conviction from the court of law. It also endorses the quote that a person remains innocent until proven guilty.

CAPACITY BUILDING

TRAINING AND CAPACITY BUILDING IN FINGER PRINT SCIENCE AT CFPB/ NCRB, NEW DELHI

One of the objectives of NCRB is to provide training in IT and Finger Print Science for capacity building in Police Forces in the country and abroad. Each year this branch conducts various training programs for Indian & Foreign Police Officers. Training on subjects like Cyber Crime Investigation & Digital Forensics, CCTNS, ToT in Finger Print Science, Advanced Finger Print Science, Network & e-Security, Colored Portrait Building System, Operators Course for Statistical Software Crime in India & ADSI, Operator Course for Prison Statistics India etc. is conducted. NCRB also conducts the courses on “Training of Trainers” for development of training resource persons in Police Programs conducted in NCRB are attended by officers of all ranks including senior officers from States / Union Territories as well as from Central Police Organizations/Central Armed Police Forces. Besides training of Indian Police Officers, NCRB also conducts courses for Foreign Police officers under Indian Technical and Economic Cooperation (ITEC) and Special Commonwealth African Assistance Program (SCAAP) of Ministry of External Affairs. In the year 2018, CFPB with the progressive leadership of Director, NCRB conducted training for Foreign Nationals in Finger Print Science for six week and Indian Nationals Training of Trainers on finger print science, Refresher Course on finger print science and basic course on finger print science.

PIONEERS OF FINGER PRINT SCIENCE

There are records of finger prints being taken many centuries ago. Ancient artifacts with carvings similar to friction ridge skin have been discovered in many places throughout the world. The ancient Babylonians pressed the tips of their fingertips into clay to record business transactions. Thumbprints were used on clay seals in China to “sign” documents. A petroglyph located on a cliff face in Nova Scotia depicts a hand with exaggerated ridges and finger whorls, presumably left by the Mi’kmaq people.

With the advancement in the field of Identification/ Investigation, many of the Scientists/ Investigators worked, whose contributions are listed below:

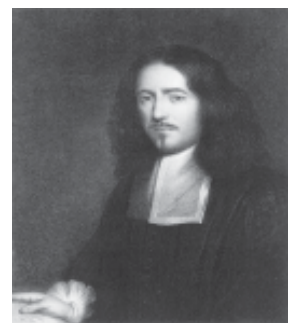

Dr. NEHEMIAH GREW (1641-1712)

- English Plant Morphologist, Considered as “Father of Plant Anatomy”.
- Studied and described the ridges, furrows, and pore structure of friction skin.
- Published very accurate drawings of the Finger Print patterns and areas of the palms.
- Did not address uniqueness or permanence of the ridges.

MARCELLO MALPIGHI (1628-1694)

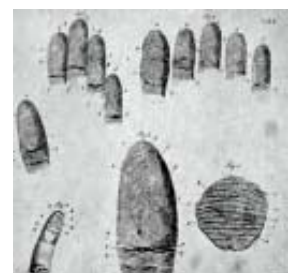

- First to see the capillaries and was a founder of histology, embryology, plant anatomy, and comparative anatomy.
- Used a microscope for the first time to examine friction skin and made observations as to its structure.
- Malpighian layer of skin names after him, for his research contributions.
- Did not address uniqueness or permanence of friction ridges.

Dr. J.C.A. MAYER (1747-1801)

- Authored a book on human anatomy and anatomical illustrations. The book is one of the earliest recordings supporting the uniqueness of fingerprints.
- The book included drawings of friction skin and this is still a valid statement ;

“Although the arrangements of skin ridges are never duplicated in two persons, nevertheless the similarities are closer among some individuals. In others the differences are marked, yet in spite of their peculiarities

of arrangement all have certain likeness.”

This statement has been verified by all other medical and scientific researcher of friction skin.

Dr. JOHANNES E. PURKINJE (1787–1869)

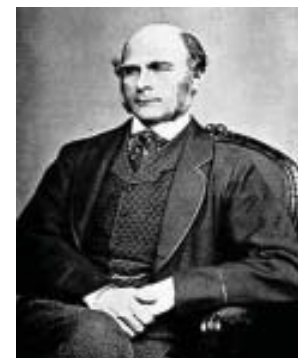

- At Breslau he created the world’s first Independent Physiology department and the first official Physiology laboratory.
- He discovered the Purkinje effect, Purkinje cells, and Purkinje fibers.
- He was the first to give regular classification of FingerPrint patterns into nine categories which is as follows:

- | | |
|----------------------------------|------------------------------------|
| ➤ A: Transverse curves, | ➤ F: Spiral, |
| ➤ B: Central longitudinal stria, | ➤ G: Ellipse or elliptical whorl, |
| ➤ C: Oblique stria, | ➤ H: Circle or circular whorl, and |
| ➤ D: Oblique sinus, | ➤ I: Double whorl |
| ➤ E: Almond | |

SIR WILLIAM JAMES HERSCHEL (1833-1917)

- He experimented with the idea of using a handprint as a signature by having a man named Rajyadhar Konai put a stamp of his right hand on the back of a contract. The contract was received and accepted as valid.
- He instituted taking fingerprints of both pensioners and criminals so that it is not carried out by imposters.
- He was the first person to use Hand Prints/ Finger Prints officially.
- He published an account of his work entitled ‘The Origin of Fingerprinting’.

Dr. HENRY FAULDS (1843–1930)

- British surgeon and Superintendent of Tsukiji Hospital in Tokyo.
- Wrote an article that discussed fingerprints as a means of identification.
- He published a paper on the subject titled ‘On the Skin-Furrows of the Hand’, in the scientific journal ‘Nature’ and it was the first scientific literature to suggest the basic concepts of the fingerprint system of identification.

- In an article, Faulds proposed using friction ridge individualization at crime scenes and gave two practical examples.
- Recommended Printer's Ink for recording of fingerprints.

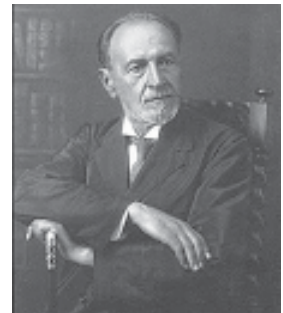

SIR FRANCIS GALTON (1822-1911)

- He was an English explorer and anthropologist best known for his research in Eugenics and Human Intelligence.
- Established that friction ridge skin was unique and persistent.
- Defined & Named each Peculiar characteristics /Minutiae/ Ridge Characteristics
- Wrote book on "Fingerprints" in 1892 & "Decipherment of Blurred Fingerprints"

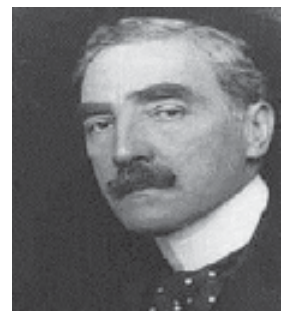

IVÁN (JUAN) VUCETICH (1858-1925)

- His classification system and individualization of prisoners through the use of fingerprints were the first practical uses of the Finger Print science by law enforcement personnel.
- He made the first positive identification of a criminal in a case where Francisca Rojas had killed her two children and then cut her throat, trying to put the blame on the outside attacker. A bloody print identified her as the killer.

SIR EDWARD RICHARD HENRY (1850-1931)

- Inspector General of Police for the Lower Provinces in Bengal.
- Considered as Father of Modern Finger Print Science.
- With the help of Indian Police Officers Khan Bahadur Azizul Haque, and Rai Bahadur Hem Chandra Bose, the Henry classification system was developed.
- Went before an inquiry committee to convince them to change to fingerprinting criminals instead of using the Bertillon Method.
- Established the Metropolitan Police Finger Print Bureau, it was Britain's first.
- Published a book "The Classification and Use of Finger Prints."

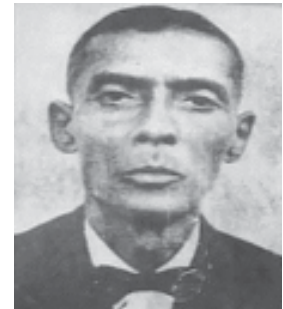

AZIZUL HAQUE (1872 – 1935)

- Officer-in-charge of the Anthropometric Bureau at Calcutta
- Helped in devising the classification formula on a mathematical basis.
- Was awarded the title “Khan Bahadur”
- Was awarded honoraria of rupees 5000/- for his contribution to the establishment of finger print classification.

HEM CHANDRA BOSE (Born in 1867)

- An officer of the Anthropometric Bureau in Calcutta
- Created a system for single digit impression
- Created a telegraphic code for communicating classification.
- Was awarded the title “Rai Bahadur”
- Wrote a book called “Finger Print Companion”
- Awarded honoraria of rupees 5000/- for his contributions.

EDMOND LOCARD (1877-1966)

- Formulated the basic principle of forensic science: “Every contact leaves a trace”.
- Developed the science of Poroscopy.
- Established the first rules of the minimum number of minutiae necessary for identification. He said that if 12 specific points were identical between two fingerprints, it would be sufficient for positive identification.

**Annexure-II****LAWS RELATING TO FINGER PRINTS IN INDIA**

In an endeavor for the betterment of the publication a new chapter on laws relating to Finger Prints has been added from this year, the chapter contains all relevant legal information pertaining to Finger Print Science in India.

Section 45 of the Indian Evidence Act, 1872, as amended by Act V of 1899, defines:

Any other person whose finger prints is ordered to be maintained by the Govt. of India from time to time, subject to the provisions of the Identification of prisoners Act (act XXXIII of 1920).

“When the Court has to form an opinion upon a point of foreign law, or of science or art, or as to identity of handwriting or finger impressions, the opinions upon that point of persons especially skilled in such foreign law, science or art, or in questions as to identify of handwriting or finger impressions are relevant facts. Such persons are called Experts”.

Section 293 of Cr. P.C. states as follows:

- 1) Any document purporting to be a report under the hand of a Government scientific expert to whom this section applies, upon any matter or thing duly submitted to him for examination or analysis and report in the course of any proceeding under this code may be used as evidence in any inquiry, trial or other proceeding under this code.
- 2) The Court may, if it thinks fit, summon and examine any such expert as to the subject-matter of his report.
- 3) Where any such expert is summoned by a Court, and he is unable to attend personally, he may, unless the court has expressly directed him to appear personally, depute any responsible officer working with him to attend the court, if such officer is conversant with the facts of the case and can satisfactorily depose in court on his behalf.
- 4) This section applies to the following Government Scientific Experts, namely:-
 - a) Any Chemical Examiner or Assistant Chemical Examiner to Government.
 - b) The Chief Inspector of Explosives.
 - c) The Director, Finger Print Bureau.
 - d) The Director, Haffkine Institute, Bombay.
 - e) The Director of a Central Forensic Science Laboratory or a State / UT Forensic Science Laboratory.
 - f) The Serologist to the Government.

To ascertain, whether a finger print is that of a person by whom it purports to have been made, the court may direct any person present in the court to record his finger prints for the purpose of enabling the court to compare the finger prints alleged to have been made by such person. When given by

recognized finger print experts, evidence as to the identification of persons by means of finger prints left at the scene of crime, is a fact. Summon from court is received whenever, court requires the services of experts either to prove the identity of the accused person or to give evidence in case in which experts opinion has already been furnished by the Bureau.

LAWS RELATING TO PREPARATION OF RECORD AND SEARCH SLIPS

Identification of Prisoners Act, 1920

Section 3: Related to Convicted Persons

- a) Every person who has been convicted of any offence punishable with rigorous imprisonment for a term of one year or upwards or of any offence which would render him liable to enhanced punishment on a subsequent conviction and
- b) Every person ordered to give security of his good behavior under Section 118 CrPC shall if so required allow his measurements and photographs to be taken by a police officer in the prescribed manner.

Section 4: Empowers police officers for taking fingerprints of non-convicted arrested persons in connection with an offence punishable with RI for one year or more.

Section 5: Empowers a magistrate of first class to order a person to give his Finger Print for the purpose of any investigation or proceedings.

Section 6:

- i) Empowers the use of necessary means to secure the fingerprints of any person who resists or refuses taking of fingerprints.
- ii) Resistance or refusal is deemed to be an offence u/s 186 IPC.

Section 7: Deals with destruction of finger print slips on acquittal or on discharge or on release without trial.

SCHEDULE OF OFFENCES FOR TAKING FINGER IMPRESSIONS AS PER CFPB MANUAL

As per OM No. 115/POLICE (L)/ 55 (8) Intelligence Bureau, Ministry of Home Affairs, Government of India, Dated 19.02.1955, on the subject of 'Establishment of C.F.P.B and instructions to be followed by State Bureaux and District Police officers in sending F.P. record slips', mentions about the G.O. No. 37/223/55-piii Dated 5.12.55, which incorporates the procedure to be adopted for taking finger impressions of all persons convicted of any offence mentioned in the schedule of offences.

Finger Print slips of the following persons will be recorded at the Central Finger Print Bureau:

- 1) All persons convicted of offences under chapter XII to XVII IPC which are punishable with rigorous imprisonment for a term of one year or more.
- 2) All persons convicted of any offence under Chapter VI IPC or of sabotage and subversive activities against State.
- 3) All persons convicted of offences under section 170, 302, and 304 (murder for gain), 328, 338, 465 to 477A, 489A to 489D IPC.

- 4) All persons convicted under the Arms, Opium and State Excise acts who are suspected to be smugglers in Arms, Opium by dangerous drugs as defined in the Dangerous Drugs Act (Act II of 1930) or entailing enhanced punishment on reconviction .
- 5) All persons convicted of smuggling gold, currency and valuable articles under Foreign exchange Regulation Act VII of 1947.
- 6) All persons ordered to execute bonds under sections 109 and 110 CrPC (for offence against property only).
- 7) All traffickers in women and children who are convicted under section 363 to 373 IPC.
- 8) All persons convicted under section 5 of Act LXXIV of 1950 for unlawful possession of telegraph wires.
- 9) All persons convicted under section 3 of Ordinance XIX of 1944 for unlawful possessions of Railway Stores.
- 10) All professional criminals and persons of dangerous character externed from any area under any state Act.
- 11) All foreigners externed under Foreigners Act XXXI of 1946.
- 12) All approvers in gang dacoity and criminal conspiracy cases.
- 13) All persons suspected of being professional itinerant criminals and persons of notoriously criminal reputation who habitually absent themselves from their homes and are believed to travel to other states for the purpose of committing crime and who have been arrested by police and whose finger prints have been taken, even if they are acquitted provided that in case of acquittal permission for record for finger prints is obtained from the court under section 7 of Act XXXIII of 1920.
- 14) All persons convicted for attempt or abetment (sec 511 or 109/114 IPC) and criminal conspiracy (sec 120B IPC) for offences mentioned in this schedule.
- 15) All Indian nationals convicted outside India of any offence for which finger prints have been received at the State Bureau from those countries.
- 16) All International criminals and absconders whose finger prints are sent to the State Bureau from countries outside India.
- 17) All persons convicted under explosive Substances Act (Act VI of 1908).
- 18) All persons convicted under the official Secrets Act (Act XIX of 1923).
- 19) All persons convicted under sec 101, 126 and 128 of the Indian Railways Act (Act IX of 1890).
- 20) Any other person whose finger prints are ordered to be maintained by the Govt. of India from time to time, subject to the provisions of the Identification of prisoners Act (act XXXIII of 1920).

Note: The taking of finger prints of persons who are local men and convicted of offences of trivial nature will be subject to the discretion of the Supdt. of Police of the district concerned.

IMPORTANT COURT VERDICTS ON FINGER PRINT EVIDENCE

1. Supreme Court Ruling Of 1961 : [State of Bombay Vs. Kathikalu Oghad AIR 1961 SC 1808]

A thumb impression of an accused taken by the police in course of investigation which was later on produced at the trial did not amount to testimonial compulsion under Article 20(3) and was not on that account inadmissible. It held that the application of finger prints in the identification of persons does not violate the fundamental rights under Article 20(3) of the constitution. It was further held that to be a witness in its wider sense means giving an oral or written statement but does not amount to exposing a part of the body for the purpose of identification.

2. Supreme Court Ruling Of 1972 : [AIR 1972 SC 975]

“The comparison and identification of finger prints has developed into a science and the results derived there from have reached a stage of exactitude. As long as the report shows that the opinion was based on observations which led to a conclusion, such opinion can be accepted.”

“Unless there is a doubt as to the correctness of the opinion, the report of the examiner may be accepted without examination of the expert.”

3. Supreme Court Ruling of 1978: [Mohanlal Vs. Ajit Singh AIR July 1978 SC 1183]

The hon’ble Supreme Court ruled that an opinion based on 8 identical ridge characteristics was fully justified and conformed to the views expressed in scientific books on the subject.

“Nothing substantial has been urged to challenge the opinion of the director of the Finger Print Bureau and all that has been argued is that as there were only 8 points of similarity, there was not enough basis for the expert’s opinion about the identity of finger prints. Reference in this has been made to B.L.Saxena’s ‘Identification of handwriting, disputed documents, finger prints, foot prints and detection of forgeries’ (1968 edition, page 247), Walter R. Scott’s ‘Finger print mechanics’(page 62) and M.K.Mehta’s ‘The identification of thumb impression and the cross examination of finger print experts’ (second edition, page 28). We have gone through these books but they do not really support the argument of the learned counsel for the respondent. While referring to the old practice of looking for a minimum of 12 identical characteristic details, Saxena has admitted that the modern view is that 6 points of similarity are sufficient to establish the identity of finger prints. Walter Scott has stated that as a matter of practice most experts who work with finger prints constantly satisfy themselves as to the identity with 8 or even 6 points.” The larger surface of the fully rolled impression not only allows accurate classification but it also gives more points for comparison. (For representative purpose only)

4. Supreme Court Ruling of 1979: [Jaspal Singh Vs. State of Punjab AIR 1979 SC 1708]

“The science of Finger print identification is an exact science and does not admit of any mistake or doubt.”

**Annexure-III****RECOMMENDATIONS OF THE XIX ALL INDIA CONFERENCE FOR DIRECTORS OF FINGER PRINT BUREAUX HELD AT Dr. MCR HRD INSTITUTE OF TELANGANA, HYDERABAD ON 21st AND 22nd JUNE, 2018**

The 19th All India Conference of Directors of Finger Prints Bureaux was organized by Telangana State Police under the aegis of National Crime Records Bureau on 21st and 22nd June, 2018 at Dr. MCR HRD Institute of Telangana, Hyderabad. Conference was inaugurated by hon'ble Minister of State (Home) Shri Hansraj Gangaram Ahir and the Chief Guest for valedictory function was hon'ble Telangana State Home Minister Shri Nayani Narashimha Reddy. Fingerprint professionals from NCRB, State Fingerprint Bureaux, Central Police Organizations and Universities have participated in the conference. Summary of recommendations made during this two days conference are:

1. National Automatic Fingerprint Identification System(NAFIS):

- (a) **Architecture:** NCRB presented the proposed architecture of National Automatic Fingerprint Identification System (NAFIS) and the future roadmap for its procurement. Provision will be given for States to search chance prints, arrestee prints in their own database or selected States database or entire country. It is also clarified that policeman at NAKA or check post can make national level search from NAFIS through mobile app. FED's will be provided to all Police stations in the second phase. CCTNS Network will be used to access NAFIS and with a provision to access from open internet also.
- (b) **Integration:** It was informed that NAFIS will be integrated at central level (CCTNS-CAS-Centre) as well as each State Level (CCTNS-CAS-State) using web service.
- (c) **Advanced States:** However, advanced States like Maharashtra, Telangana, Andhra Pradesh will continue to use their own AFIS and their data will be replicated into NAFIS.
- (d) **Digitization:** Data available in NIST format with the States will be migrated into NAFIS by the System Integrator. However, States should digitize remaining FP slips in NIST complaint format so that same can also be migrated into NAFIS.

(NCRB/States/UTs)

2. NABL accreditation & BEST SFPB:

- (a) Accreditation improves the quality and technical competence and efficiency of the Institution. In order to achieve this objective, it was proposed that all Laboratories of fingerprints in the country should acquire a NABL accreditation to make FPBx, standardized and quality compliant. Therefore, it was proposed to layout criteria and decides benchmarks for FPBx enabling them to get NABL accreditation.
- (b) Thereafter, FPBx will be assessed on the basis of their performance and rewarded. A Committee is proposed to be constituted under the chairmanship of Joint Director

(CCTNS) with members from Rajasthan (Shri Pankaj Choudhary, SSP), Himachal Pradesh (Shri Arun Sharma, Director), Punjab (Shri Hardeep Singh, Director), West Bengal (Shri Debashish Ghosh, Director), Tamil Nadu (Shri Krishnamurthy G, DSP), Delhi (Shri R K Rohella, Inspector) and NCRB (Smt S Indira Sudha, DSP) to suggest guidelines for accreditation and to work out the parameters for choosing best Finger-print Bureaux every year and to reward during the conference. Committee will submit its report by 30-09-2018.

(Committee/NCRB)

3. Medals for scientific community:

Director, NCRB spoke about the increasing role played by scientific community in policing and proposed that annual medals may be instituted for various technical disciplines such as Finger print science, Information Technology, FSL and Police wireless. While addressing the gathering during the inaugural function, Minister of State (Home) also expressed that it is a good idea and asked NCRB to submit a detailed proposal to MHA for instituting such medal.

(NCRB/MHA)

4. Manpower for Fingerprint Bureau:

Conference deliberated about the kind of manpower available in each State Fingerprint Bureau and their hierarchy. It was felt that designations like FP searcher, FP test Inspector, Sub Inspector (FP) followed in different States is creating confusion and it is better to have uniform designations across the country. The recommendation of the earlier committee headed by Shri Sumit Sharan, IPS, IGP Tamil Nadu was discussed and delegates expressed that guidelines from center are necessary for brining uniformity. Conference recommended to constitute another committee for studying the existing Fingerprint staffing pattern in various States and to recommend an ideal structure. This committee will submit its report in 2 months and the members volunteered to work are Uttar Pradesh (Shri Anil Kumar Singh, IPS, SP), Bihar (Mrs. Anjana Kumari, Director), Telangana (Shri Prabhakar Rao, Director), Maharashtra (Shri R B Kulkarni, Director, Pune), Delhi (Shri R K Vajpayee, Director), Karnataka (Shri Mahabaleshwar Hedge, Director) , Madhya Pradesh (Mrs. Nidhi Srivatasava Inspector) and NCRB (Shri S. P. Singh and Smt Indira Sudha, DSP). Committee will be headed by Joint Director (CCTNS), NCRB. Committee will submit its report by 30-09-2018.

(Committee/NCRB)

5. Modernization of State FPBx:

- (a) Presentation was made by the member of the committee constituted under the chairmanship of Shri Sumit Sharan IPS, IGP Tamilnadu. It was informed that State Governments have not allotted funds in many States for purchase of modern equipment and FP experts are using the equipment which was supposed to be condemned long back. Committee has identified certain items which are essential for each State Fingerprint Bureau. Conference felt that all state FPBx must procure these items.

- (b) It was recommended that NCRB may take up this issue with MHA for providing funds to procure the equipment identified by the committee under Police Modernization scheme and also for sanction of certain amount every year towards replacement of obsolete equipment and to introduce modern equipment that helps to improve the efficiency of FP Experts.
- (c) Conference discussed about the merits in procurement of material through Government Electronic Marketplace (GEM). It was unanimously recommended that NCRB should work out the specifications for the commonly used items and share with GEM for inclusion in their list.

(NCRB/MHA)

6. Legal Matters:

(a) Identification of Prisoners Act, 1920:

NCRB made a detailed presentation about the amendments required in Identification of Prisoners Act, 1920 as requested by MHA. Delegates suggested including hand geometry and veining pattern also under 'measurements'. Conference also felt that enough safe guards must be built in for stopping misuse of any provisions in the Act.

A number of delegates were of the view that fingerprints of the suspects taken for the purpose of search should be stored in a separate database instead of keeping them with convict database. It was also suggested that separate center rules should be notified in this regard.

(b) Usage of Aadhaar database:

Director, NCRB, in his welcome address stated that about 45,000 unidentified dead bodies are reported across the country every year and many bodies are found in a condition that faces offer no clue with regards to their identification. He also stated that all the chance prints developed at the scene of crime are not being matched since about 80% to 85% criminals are first time offenders. He informed that if limited access is given to Aadhaar database, then it is possible to solve several cases where first time offenders have committed crime which will make the society more secure. Moreover, several unidentified bodies can be handed over to their relatives for graceful disposal as enrolment in Aadhaar is almost complete. Conference recommended that NCRB should take up this issue with the Government for amendment of Aadhaar Act, so that limited access to Aadhaar database may be given to Law enforcing agencies.

(NCRB)

7. **Standardization:**

(a) **Revision of CFPB Manual:**

Conference discussed about the need for revision of Central Fingerprint Bureau Manual. Delegates from Uttar Pradesh, Madhya Pradesh, Punjab, Rajasthan, Maharashtra, and Tamilnadu informed that they have state FPB manuals. It was decided to collect all these State manuals and to revise CFPB manual. A committee has been proposed in this regard with Shri A Mohan Krishna DD (C-III) as chairman and members from Jharkhand (Shri Neeruj Sahay, Director), Bihar (Shri Ashutosh Kumar, DSP), Delhi (Shri N K Vadhera, Inspector), Maharashtra (Shri Prasad Joshi, API), and CFPB (Shri B. Roy Director I/c CFPB, Shri S. P. Singh DSP, Smt Indira Sudha DSP, Shri R R Sharma, Inspector). Committee will submit its report by 20-09-2018.

(Committee/NCRB)

(b) **National Criminal Number (NCN):**

It was felt that there is no unique identifier for the same criminal if he commits crime in different States, as Regular Criminal Number (RCN) allotted to the same criminal is not unique in different states, since each state allots different RCN. Therefore it is proposed to allot **National Criminal Number (NCN)** by NCRB so that it works as unique identifier. As a part of CCTNS integration, this **NCN** will be shared with CCTNS so that it can maintain unique identity for criminal.

(NCRB)

(c) **Standard format to be designed for opinion of FP experts:**

Delegates from Rajasthan expressed that opinion given in different formats by different FPBx is giving room for cross examination by defense counsels which sometimes diminishes the value of FP expert and the evidence. Therefore, the conference unanimously recommended that NCRB may propose a standard format for furnishing the opinion of FP experts in the court of law.

(NCRB)

(d) **AIBE:**

Decision about the previous conference recommendation of making Science graduate as compulsory qualification to appear for AIBE was discussed and NCRB clarified that non-science graduates were not permitted to appear for AIBE exam. For a question about non-science graduates already in service, it was clarified that they will be allowed if concerned State gives an undertaking that future recruitments are exclusively science graduates.

(NCRB/States/UTs)

8. Capacity Building:

(a) New techniques for FP development:

Retiring Directors of State FPBx, Award Winners of fingerprint competition and Research scholars have described various techniques for fingerprint development. Conference resolved that Fingerprint Experts should keep abreast of latest easy and cost effective powders and other techniques for FP development and to adopt them.

(States/UTs)

(b) New multi modal biometrics:

The Conference recommended that with the advent of technological advances in the field of personal identification, the role of a FP expert has to be extended to cover the other biometrics such as Voice Samples, Vein Pattern, Hand Geometry, Earlobe Geometry, Iris and Retina Scan, Photographs, Palm Impression, Foot Print Impression as well. FP experts should look forward to learn the technicalities of the upcoming multi modal biometric systems to stay updating in this progressive field.

(NCRB/States/UTs)

(c) Collaboration with universities/ research organizations:

People associated with various law enforcement agencies are often unaware of the latest advancements in the field of FP science. It was felt that collaboration with universities/ research organizations would be beneficial for FP personnel to be aware of such technological advancements. Therefore, all State FPBX and NCRB were requested to have tie ups or MOUs for the interaction with Universities/Institutions.

(NCRB/States/UTs)

(d) Training in foreign Countries:

In order to equip our fingerprint experts at par with the international standards and knowledge, the conference recommended that Fingerprint personnel need to be sent for training in foreign institutions so as to make them aware of the latest practices in the field of fingerprint science. It was proposed that NCRB should identify and coordinate with such institutions and take MHAs approval for the same.

(NCRB/MHA)

(e) Training in the State Fingerprint Bureaux for capacity building:

Fingerprint experts, already scarce in most of the state bureau, are not able to visit all crime scenes and train the newly recruited staff. Uttar Pradesh informed that most of their Fingerprint experts are retired and they do not have FP experts even to conduct

trainings. In such cases, Director, NCRB suggested that the states may initiate action for engaging retired persons on contractual basis so that they can train the newly recruited staff as well as visit crime scenes. It was also informed that NCRB fingerprint experts can be deputed to State FPBX for conducting Fingerprint related trainings.

(NCRB/States/UTs)

(f) Journal on Fingerprint Science:

Participants from Universities suggested that CFPB should start a journal on Fingerprint Science as there is no journal exclusively for fingerprint science published in India. Periodicity of the journal was discussed and it was decided to have 2 issues per year. All States/UTs and academicians are requested to contribute meaningful articles/write-ups for this journal.

(NCRB/States/UTs)

9. Administration related matters:

(a) Director of FPB should be a FP expert:

The Conference deliberated as whether Fingerprint Bureau should be headed by only FP expert or not. Several participants expressed that Director with FP expertise would be able to make the scientific and technical decisions pertaining to the bureau in an efficient manner. It is decided that committee proposed to work on manpower issues will look into this matter.

(Committee/NCRB)

(b) CFPB Nodal Officers:

Tamil Nadu informed that States are seeking lot of assistance from CFPB with regard to search slips and chance prints for which one Nodal Officer should be designated from CFPB. It was also informed that such arrangement will assist CFPB because designated Nodal Officer can verify the receipt of search and record slips from those States. Director, NCRB informed that such sort of arrangement already exists for CCTNS and same pattern will be implemented for Fingerprints also.

(NCRB)

(c) Collection and documentation of Judgment copies of the crucial cases:

The criteria for the citations for the award of excellence have been broadly divided into various categories with variable weightage, of which the conviction, cross examination and the case intensity are a few to name. It is proposed that copies of judgment should be attached with the cases sent for nomination.

(NCRB/States/UTs)

**10. Miscellaneous:****(a) DGs/IGs Conference:**

Delegates suggested that there should be a session in the DGs/IGs conference for fingerprint related issues such as modernization of State fingerprint Bureaux, filling of vacancies. Director NCRB informed that NCRB will certainly make a request to include this item in their agenda.

(NCRB)

(b) Conference Title:

In order to broaden the scope of the conference and also to encourage other institutions carrying out analytical and research work in the field of Finger Print science to participate in the conference, it is decided to rename the conference as “National Conference on Finger Print Science”.

(NCRB/MHA)

(c) Regulating Authority:

Delegates expressed that many private persons are giving opinion in the court as FP Expert and there is no regulating authority for FP Experts like BAR ASSOCIATION for advocates or MCI for doctors etc. The Conference suggested that NCRB may take up with MHA for creating regulating authority for fingerprint experts.

(NCRB/MHA)

(d) Fees for Private/Civil Cases:

Delegates informed that in some States, non-government/private organizations are seeking the services of FP experts for which fees can be prescribed. Conference recommended that NCRB should collect the information from all States/UTs about various types of services that are offered and to work out suitable rate for each type of service.

(NCRB)

Annexure-IV

The numbers of sanctioned, posted staff and vacancies may be taken as indicative, because in some Bureaux there is more staff posted than actually sanctioned position, thus the value of vacancy too may not be correct

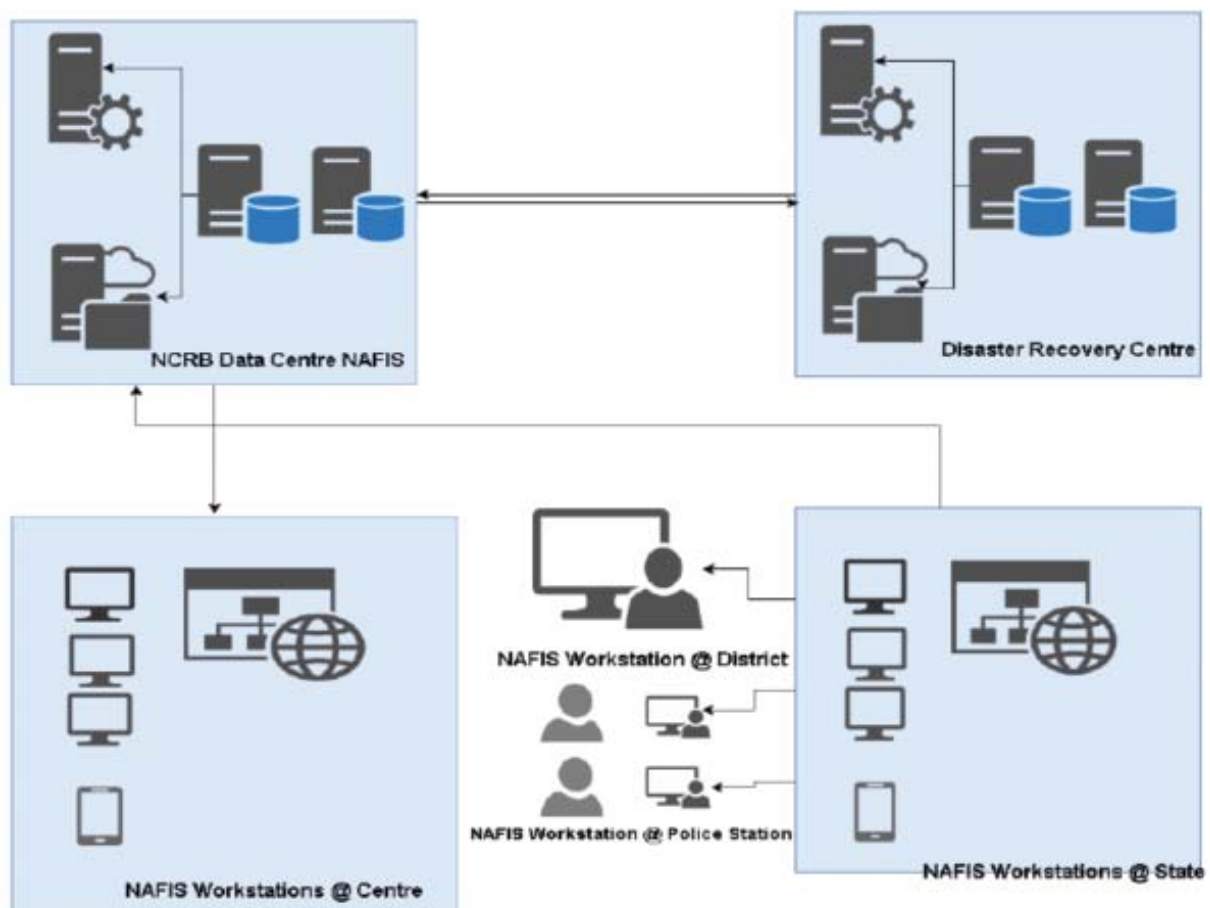

Annexure– V (a)**AUTOMATED FINGER PRINT IDENTIFICATION SYSTEM**

Automation of the fingerprinting technology has been the agenda of scientific and industrialist peers in order to provide the law enforcement agencies with the best of the tools and techniques to maintain highest possible decorum of law and order. As there is a need of fast and robust system to handle large number of data and cope up with latest emerging trends in the era of Finger print science, MHA has taken a call to procure latest system for replacement of FACTS in the country. Following are the specifications and work flow of the system.

National Automated Fingerprint Identification System (NAFIS) Overview

The basic process of capture, use and management of fingerprint information in crime and criminal investigation has been defined in the Identification of Prisoners Act, 1920 and its amendments, other State and Central acts and other procedures defined by law.

Based on the provisions of the act, both rolled and plain fingerprints (including palm prints) will be captured from individual involved in crimes through Fingerprint Enrolment Devices (FEDs) or on paper. The FEDs also have relevant embedded software for capture, processing and transmission of fingerprint information for search, matching and verification purposes performed through NAFIS software.

Indicative architecture of NAFIS:

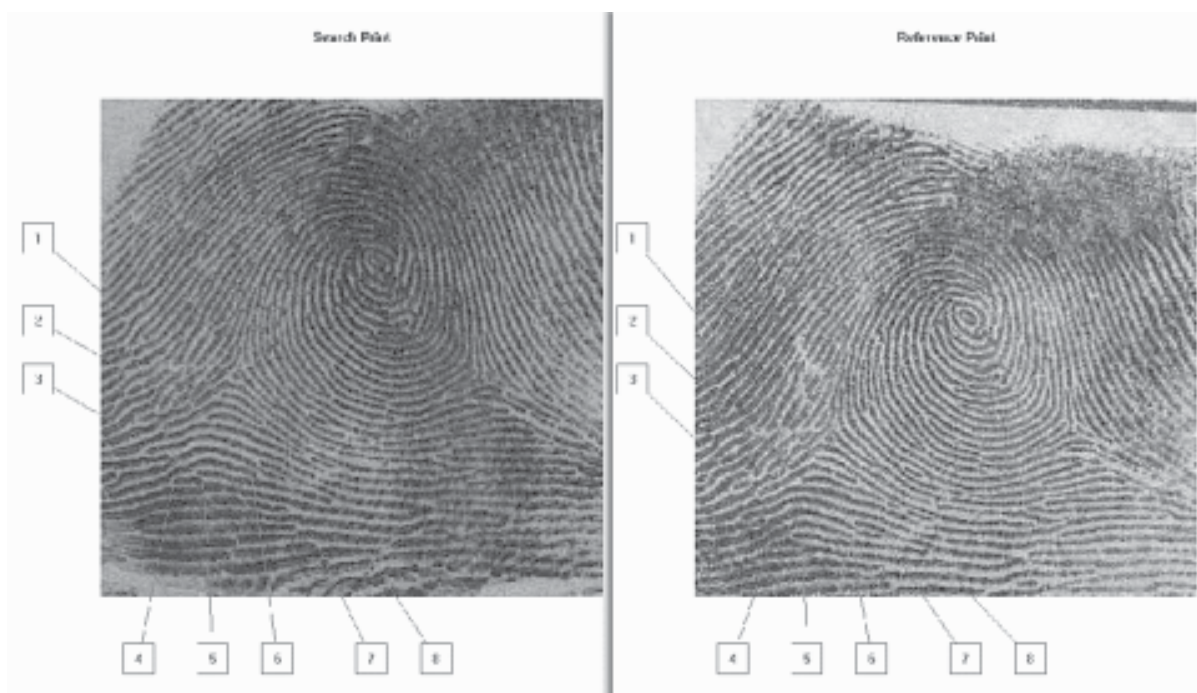

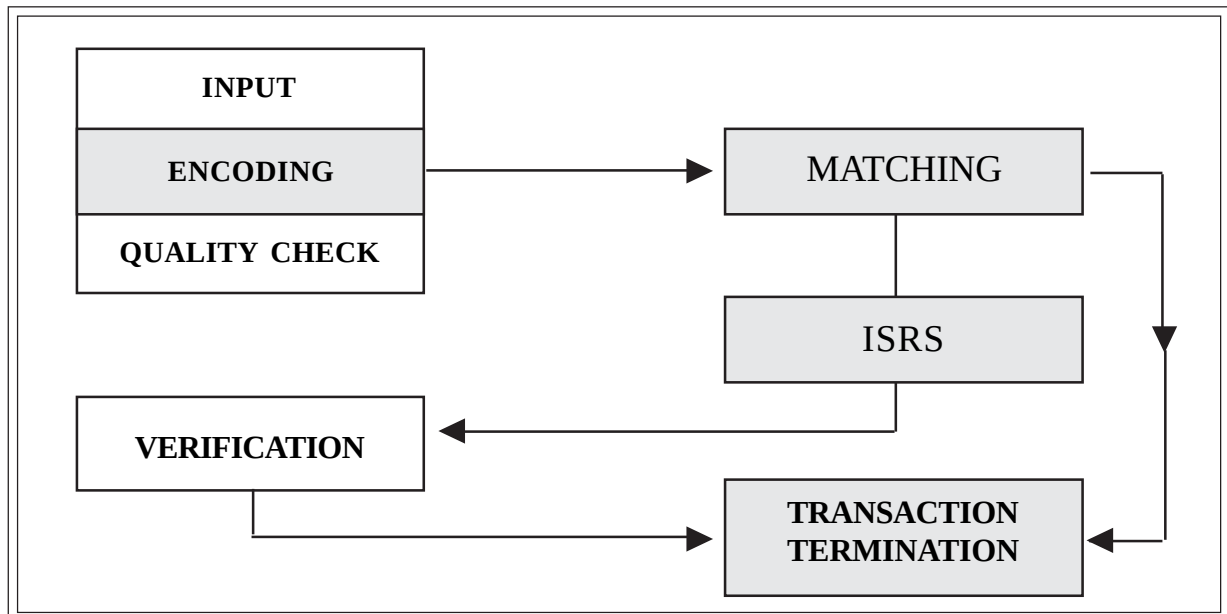

- The NAFIS software serves as the key application for Fingerprint experts/personnel for performing crime and criminal investigation functions. Fingerprints are generally acquired for crime and criminal investigation captured through enrolment of fingerprints of individuals as per the due process laid down by law, chance fingerprints lifted from the site of incident or scene of crime, fingerprints identification through query from an existing fingerprint database (Developed through Enrolment of fingerprints) only for matching and verification purposes as per due Procedure. Chance/Latent fingerprints are class of fingerprints which are not visible to the naked eye and can be used for verification and matching after suitable enhancements.
- It is to be noted that currently 26 States/UTs have implemented AFIS software supplied by various solution providers and 10 States/UTs are yet to implement AFIS solution. The State Fingerprint Bureau (SFPB) is the nodal organization for collection, storage, operations/transactions and management of Fingerprint related information with respect to crime and criminal investigation and tracking functions.
- The SFPB and its staff at districts and other locations carry out fingerprint related functions in police organization.
- Further it is also envisaged that the Fingerprint Enrolment Devices are to be used at Police stations or the Fingerprint reader device integrated with the Mobile Data Terminal using the public Internet for accessing the Central NAFIS database.
- The National level NAFIS solution would be implemented and managed by the Central Fingerprint Bureau (CFPB) at NCRB, New Delhi. The National level Automated Fingerprint Identification System (NAFIS) shall function as the central information repository of all the crime and criminal related fingerprint data of the country. The NAFIS solution envisaged shall consolidate all the fingerprint information available at all States/UTs in AFIS or any other databases for development of a national level searchable fingerprint information repository.
- The NAFIS solution would also integrate with the Core Application Software of CCTNS project implemented at Central level for extracting relevant crime and criminal attribute data mapped to the fingerprints.
- The virtual partition of NAFIS designated for 36 States/UTs would also integrate with CCTNS application (Customized and Configured Core Application Software (State) or other similar applications implemented at States/UTs) for mapping of relevant crime and criminal attribute data with fingerprint data for providing descriptions of demographics, reporting and annotation purposes.

FACTS

Since, FACTS is the indigenous version of AFIS being used by finger print bureaux throughout the country, following is the brief illustration describing the working a generic FACTS system.

The following diagram shows the work transaction mechanism of FACTS 5.0.

AFIS BASED COMPARISON AND MARKING OF IDENTICAL POINTS (FOR REPRESENTATIVE PURPOSE ONLY)

The first FACTS was developed by NCRB with assistance from CMC Ltd. with the most basic features for an automated system. With the advent the microprocessors and communication technology, the latest FACTS is equipped with the state of the art advantages that improves the efficiency of a Finger Print expert. Following is an analytical comparison of the range of features developed since the inception of the FACTS system.

AFIS Interface Specification

The Electronic Finger Print Transmission Specification or EFTS defines the interface between the IAFIS and other agencies' systems. The EFTS contains a description of operational concepts, descriptors, field edit specifications, image quality specifications, and other information related to IAFIS services. The Electronic Biometric Transmission Specification (EBTS) is the latest upgrade to the FBI

Finger Print specification and replaces EFTS Version 7.1. The scope of the EBTS has been expanded over previous versions to include additional biometric modalities (e.g., Palm print, facial, and iris) in recognition of the rapidly developing biometric identification industry. The most recent update to the American National Standards Institute /National Institute of Standards and Technology-Information Technology Laboratory 1-2015(ANSI/NIST-ITL 1-2011, Update: 2015) standard includes new record types to facilitate data sharing for new biometric modalities. Integrating biometric data in accordance with the ANSI/NIST standard, the FBI EBTS provides a description of all requests and responses associated with electronic Finger Print and other biometric identification services.

Glossary

- ❖ **AMPUTATED-** The removal of a limb or other body extremity by trauma, prolonged constriction or surgery.
- ❖ **ARTIFACT-** Any distortion or alteration not in the original friction ridge impression produced by an external agent or action. 2: Any information not present in the original object or image inadvertently introduced by image capture, processing, compressions, transmission, display, or printing. (SWGFAST 2011)
- ❖ **AUTOMATED FINGER PRINT IDENTIFICATION SYSTEM (AFIS)-** An automated, minutiae-based identification system that may consist of two or more distinct databases comprising two-finger identification records and ten-finger latent cognizant records (records of individuals more likely to be found at crime scenes, for example, burglars). 2: A computer-based system for reading, cataloguing, searching, matching, and storing fingerprints and related data. (ANSI/IAI) 3: A generic term for a Finger Print matching, storage, and retrieval system. (SWGFAST 2011)
- ❖ **ACE-V-** The process for identifying latent fingerprints, which involves Analysis, Comparison, Evaluation, and Verification:
 - a. Analysis is the qualitative and quantitative assessment of Level 1, Level 2, and Level 3 Details to determine proportion, interrelationship, and value for individualization.
 - b. During Comparison, the latent print examiner looks at the attributes noted during analysis for differences and agreement between the latent print and the known exemplar.
 - c. Evaluation follows extensive comparison by making a determination if two impressions were made by the same source, not from the same source, or if the information is inconclusive. (A determination is made as to the results of the Comparison process. The Finger Print community accepts three conclusions: (a) the latent print and known exemplar were made by the same source, (b) the latent print and known exemplar were not made by the same source, or (c) a conclusive comparison could not be determined. This could be due to a lack of comparable area in the known exemplar or lack of clarity due to improperly recorded known exemplars.)
 - d. Verification occurs when a second qualified examiner does an independent assessment of the latent print and known exemplar, utilizing the ACE process.
- ❖ **ALGORITHM-** Mathematical routine used in computer processing. In AFIS processing, the matcher algorithm searches for relationships between the search print and ten-print. 2: Mathematical routine used in computer processing, e.g., an AFIS matching algorithm establishes the correlation of Level 2 Detail between fingerprints. (SWGFAST). 3: A step-by-step computational procedure for solving a problem. The system computer and other system components use algorithms to make decisions required to process and handle information. (ANSI/IAI)
- ❖ **ANSI/NIST STANDARD-** Standard proposed by NIST and adopted by ANSI. For example, the ANSI/NIST-ITL standard Data Format for the Interchange of Fingerprint, Facial &

Other Biometric Information is used by law enforcement, intelligence, military, and homeland security organizations throughout the world. The first version of this standard dates to 1986. Over the years, it has been updated and expanded to cover more biometric modalities beyond the original record type of Finger Print minutiae. (NIST)

- ❖ **BACKGROUND DISTURBANCE / INTERFERENCE**- A feature of the background (such as the texture or pattern) of the substrate (surface) that the mark is left on, which affects the appearance and resultant interpretation of the friction ridge flow or ridge details.
- ❖ **CADAVER**- A deceased person.
- ❖ **CHANCE PRINT OR SCENE OF CRIME PRINT**- means any chance or accidental impression left by friction ridges skin on a surface, regardless of whether it is visible or invisible at the time of deposition.
- ❖ **DISPATCH CHEQUE**- The details in triplicate prepared by the State Bureaux containing Name, Parentage of the convicts and Cheque No., Date and District of Origin of Finger Print Record Slips for forwarding the Finger Print Record Slips to other Bureaux are called Dispatch Cheques /Invoice.
- ❖ **DATABASES**- Collections of data and associated material designed to provide information rather than for archive, which are stored systematically in hard copy or electronic format and are, e.g. used for: providing information on the possible origin of objects or substances found in casework; and/or providing statistical information.
- ❖ **EDGEOSCOPY**- Study of the contour or shape of the edges of friction ridges.
- ❖ **EXPERT (CFPB)**- ‘Expert’ means an officer working in the CFPB having undergone thorough training in classifying, recording & searching of F.P. Slips and examining of latent and documentary prints either in any State Bureau or at the Central Finger Print Bureau and having a Finger Print expert certificate by clearing the All India Board for Examination of Finger Print Experts.
- ❖ **EXEMPLAR**- An impression or image of friction ridge skin purposely collected with the knowledge of the subject. 2: The prints of an individual associated with a known or claimed identity deliberately recorded electronically, by ink, or by another medium (also known as known prints). (SWGFAST 2011)
- ❖ **ELIMINATION FINGER PRINTS** 1- Finger Print images taken from persons with legitimate access to evidence under examination for latent fingerprint. 2: Exemplars of friction ridge skin detail of persons known to have had legitimate access to an object or location.
- ❖ **GRAY-SCALE IMAGE** -An image using more than two radiometric values, i.e., 256 shades of gray in an 8-bit image. Not a strictly black/white image.
- ❖ **HENRY CLASSIFICATION**- an alphanumeric system of Finger Print classification named after Sir Edward Richard Henry used for filing, searching, and retrieving ten-print records.
- ❖ **FINGER PRINT SLIP FOR RECORD**- The form containing 10-digit rolled impressions and plain prints taken in proper sequence for record with particulars regarding name, parentage, residence, conviction, etc. of a convict is called a Finger Print Slip for record.

- ❖ **FINGER PRINT SLIP FOR SEARCH-** Similar form with 10 digit impressions when used for search to trace previous conviction from the record of the Bureau is called Finger Print slip for search.
- ❖ **INKED FINGER PRINT-** the Intentional recording of the friction ridge skin. Using black printer's ink and a Finger Print roller, the ridge characteristics of a particular individual, can be formally recorded on a standard Finger Print card.
- ❖ **INTERPOL-** Originally the International Police Commission, established in 1923 with the first headquarters in Vienna, Austria. With the General Secretariat now in Lyon, France, Interpol focuses on international crimes that threaten public safety, especially those involving terrorism, criminal organizations, drugs, finances and technology, and trafficking in human beings, and provides fugitive investigative support.
- ❖ **LATENT (Chance print)/LATENT SEARCH-** A search of a latent print against other latent prints, which are usually stored in the Unsolved Latent File, and which has the potential to link crimes committed by same person, even though that person is as yet unidentified. Also referred to as a latent/unsolved latent search.
- ❖ **LIVESCAN-** "Livescan is an electronic biometric platform for capturing, storing and transmitting friction ridge detail.
- ❖ **MINUTIAE DATA-** The data representing the relative position, orientation, and in some cases, the relationship and/or types of the minutiae in a Finger Print image.
- ❖ **NATIONAL INSTITUTE OF STANDARDS AND TECHNOLOGY-** Formerly known as the National Bureau of Standards, this division of the U.S. Department of Commerce ensures standardization in non-defense government agencies.
- ❖ **PATTERN CLASSIFICATION-** Characterization of a Finger Print as containing one of seven Finger Print patterns: arch, tented arch, right-slant loop, left-slant loop, whorl, amputation, or scar. The Integrated Automated Finger Print Identification System will provide for both pattern level and Henry classifications.
- ❖ **SCANNER-** Capture device to create a digital image. New scanners that connect to the Finger Print Work stations must meet the standards outlined in Appendix F of the Electronic Biometric Transmission Specification.
- ❖ **TEN-PRINT-** A Finger Print card (or Finger Print card equivalent) containing rolled and plain impressions from the ten fingers of an individual. The standard format contains 14 impressions: one rolled Finger Print impression of each finger, plain Finger Print impressions of each thumb, and plain impressions of the four fingers of each hand simultaneously.
- ❖ **TEN-PRINT IMAGE SEARCHES-** An electronic transaction submitted to the Cental/State Finger Print bureau's data base, which contains fingerprint images, classification information as required by the Automated Fingerprint Identification System, or remotely extracted fingerprint characteristics. The subsequent search will be conducted automatically with no additional manual editing or processing. If candidates are identified, the candidates' PIN Numbers are returned to the transmitting agency along with fingerprint images from the highest scoring candidates.
