Annexure -X	<i>Abbreviations</i>

PIONEERS OF FINGERPRINT SCIENCE

There are records of fingerprints being taken many centuries ago. Ancient artifacts with carvings similar to friction ridge skin have been discovered in many places throughout the world. The ancient Babylonians pressed the tips of their fingertips into clay to record business transactions. Thumbprints were used on clay seals in China to “sign” documents. A petro glyph located on a cliff face in Nova Scotia depicts a hand with exaggerated ridges and finger whorls, presumably left by the Mi'kmaq people.

With the advancement in the field of Identification/ Investigation, many of the Scientists/ Investigators worked, whose contributions are listed below:

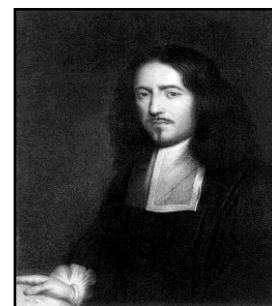

Dr. NEHEMIAH GREW (1641-1712)

- English Plant Morphologist, Considered as “Father of Plant Anatomy”.
- Studied and described the ridges, furrows, and pore structure of friction skin.
- Published very accurate drawings of the Finger Print patterns and areas of the palms.
- Did not address uniqueness or permanence of the ridges.

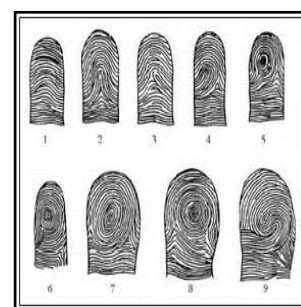

MARCELLO MALPHIGHI (1628-1694)

- First to see the capillaries and was a founder of histology, embryology, plant anatomy, and comparative anatomy.
- Used a microscope for the first time to examine friction skin and made observations as to its structure.
- Malpighian layer of skin named after him, for his research contributions.
- Did not address uniqueness or permanence of friction ridges.

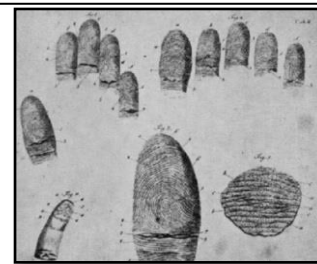

Dr. J.C.A. MAYER (1747-1801)

- Authored a book on human anatomy and anatomical illustrations. The book is one of the earliest recordings supporting the uniqueness of fingerprints.
- The book included drawings of friction skin and this is still a valid statement ;

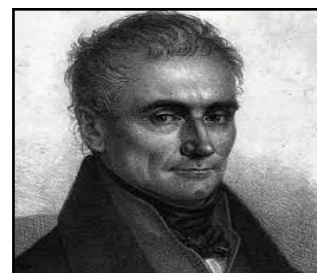

“Although the arrangements of skin ridges are never duplicated in two persons, nevertheless the similarities are closer among some individuals. In others the differences are marked, yet in spite of their peculiarities of arrangement all have certain likeness.”

This statement has been verified by all other medical and scientific researchers of friction skin.

Dr. JOHANNES E. PURKINJE (1787–1869)

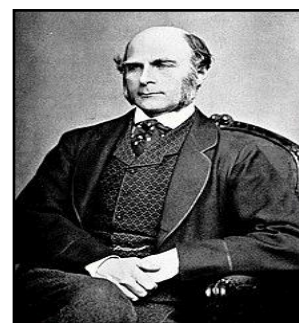

- At Breslau he created the world's first Independent Physiology department and the first official Physiology laboratory.
- He discovered the Purkinje effect, Purkinje cells, and Purkinje fibers.
- He was the first to give regular classification of Fingerprint patterns into nine categories which is as follows:

➤ A: Transverse curves, ➤ B: Central longitudinal stria, ➤ C: Oblique stria, ➤ D: Oblique sinus, ➤ E: Almond	➤ F: Spiral, ➤ G: Ellipse or elliptical whorl, ➤ H: Circle or circular whorl, and ➤ I: Double whorl
--	--

Sir WILLIAM JAMES HERSCHEL (1833-1917)

- He experimented with the idea of using a hand print as a signature by a man named Rajyadhar Konai put a stamp of his right hand on the back of a contract. The contract was received and accepted as valid.
- He instituted taking fingerprints of both pensioners and criminals so that it is not carried out by imposters.
- He was the first person to use Hand Prints/ Finger Prints officially.
- He published an account of his work entitled 'The Origin of Fingerprinting'.

Dr. HENRY FAULDS (1843–1930)

- British surgeon and Superintendent of Tsuki ji Hospital in Tokyo.
- Wrote an article that discussed fingerprints as a means of identification.

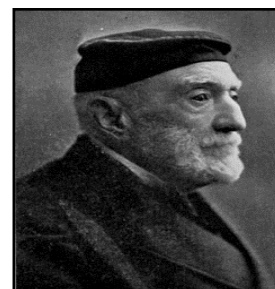

- He published a paper on the subject titled 'On the Skin-Furrows of the Hand', in the scientific journal 'Nature' and it was the first scientific literature to suggest the basic concepts of the fingerprint system of identification.
- In an article, Faulds proposed using friction ridge individualization at crime scenes and gave two practical examples.
- Recommended Printer's Ink for recording of fingerprints.

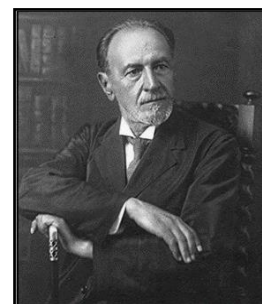

SIR FRANCIS GALTON (1822-1911)

- He was an English explorer and anthropologist best known for his research in Eugenics and Human Intelligence.
- Established that friction ridge skin was unique and persistent.
- Defined & Named each Peculiar characteristics /Minutiae/ Ridge Characteristics
- Wrote book on "Fingerprints" in 1892 and "Decipherment of Blurred Fingerprints"

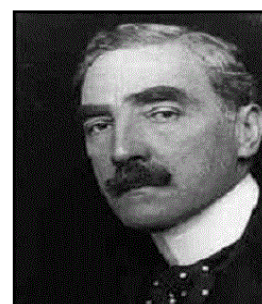

IVÁN (JUAN) VUCETICH (1858-1925)

- His classification system and individualization of prisoners through the use of fingerprints were the first practical uses of the Finger Print science by law enforcement personnel.
- He made the first positive identification of a criminal in a case where Francisca Rojas had killed her two children and then cut her throat, trying to put the blame on the outside attacker. A blood print identified her as the killer.

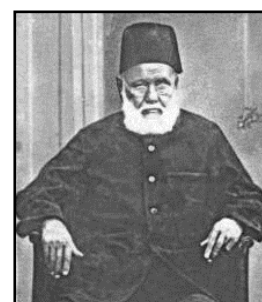

SIR EDWARD RICHARD HENRY (1850-1931)

- Inspector General of Police for the Lower Provinces in Bengal.
- Considered as Father of Modern Finger Print Science.
- With the help of Indian Police Officers Khan Bahadur Azizul Haque, and Rai Bahadur Hem Chandra Bose, the Henry classification system was developed.
- Went before an inquiry committee to convince them to change to fingerprinting of criminals instead of using the Bertillon Method.
- Established the Metropolitan Police Finger Print Bureau, which Was Britain's first.
- Published a book "The Classification and Use of Finger Prints."

AZIZUL HAQUE (1872 – 1935)

- Officer-in-charge of the Anthropometric Bureau at Calcutta
- Helped in devising the classification formula on a mathematical

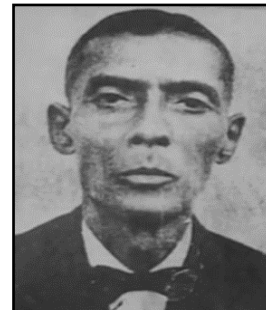

basis.

- Was awarded the title “Khan Bahadur”
- Was awarded honoraria of rupees 5000/- for his contribution to the establishment of Finger Print classification.

HEM CHANDRA BOSE (Born in 1867)

- An officer of the Anthropometric Bureau in Calcutta
- Created a system for single digit impression
- Created a telegraphic code for communicating classification.
- Was awarded the title “Rai Bahadur”
- Wrote a book called “Finger Print Companion”

EDMOND LOCARD (1877-1966)

- Formulated the basic principle of forensic science: "Every contact leaves a trace".
- Developed the science of Poroscopy.
- Established the first rules of the minimum number of minutiae necessary for identification. He said that if 12 specific points were identical between two fingerprints, it would be sufficient for positive identification.

Annexure-II

LAWS RELATING TO FINGERPRINTS IN INDIA

In this chapter contains all relevant legal information pertaining to Finger Print Science in India.

Section 45 of the Indian Evidence Act, 1872, as amended by Act V of 1899, defines:

Any other person whose finger prints are ordered to be maintained by the Govt. of India from time to time, subject to the provisions of the Identification of prisoners Act (act XXXIII of 1920).

"When the Court has to form an opinion upon a point of foreign law, or of science or art, or as to identity of handwriting or finger impressions, the opinions upon that point of persons especially skilled in such foreign law, science or art, or in questions as to identify of handwriting or finger impressions are relevant facts. Such persons are called Experts".

Section 293 of Cr. P.C. states as follows:

- 1) Any document purporting to be a report under the hand of a Government scientific expert to whom this section applies, upon any matter or thing duly submitted to him for examination or analysis and report in the course of any proceeding under this code may be used as evidence in any inquiry, trial or other proceeding under this code.
- 2) The Court may, if it thinks fit, summon and examine any such expert as to the subject-matter of his report.
- 3) Where any such expert is summoned by a Court, and he is unable to attend personally, he may, unless the court has expressly directed him to appear personally, depute any responsible officer working with him to attend the court, if such officer is conversant with the facts of the case and can satisfactorily depose in court on his behalf.
- 4) This section applies to the following Government Scientific Experts, namely:
 - a) Any Chemical Examiner or Assistant Chemical Examiner to Government.
 - b) The Chief Inspector of Explosives.
 - c) The Director, Finger Print Bureau.
 - d) The Director, Haffkine Institute, Bombay.
 - e) The Director of a Central Forensic Science Laboratory or a State / UT Forensic Science Laboratory.
 - f) The Serologist to the Government.

To ascertain, whether a finger print is that of a person by whom it purports to have been

made, the court may direct any person present in the court to record his finger prints for the purpose of enabling the court to compare the finger prints alleged to have been made by such person. When given by recognized finger print experts, evidence as to the identification of persons by means of finger prints left at the scene of crime, is a fact. Summon from court is received whenever, court requires the services of experts either to prove the identity of the accused person or to give evidence in case in which experts opinion has already been furnished by the Bureau.

LAWS RELATING TO PREPARATION OF RECORD AND SEARCH SLIPS

Identification of Prisoners Act, 1920

Section 3: Related to Convicted Persons

- a) Every person who has been convicted of any offence punishable with rigorous imprisonment for a term of one year or upwards or of any offence which would render him liable to enhanced punishment on a subsequent conviction and
- b) Every person ordered to give security of his good behavior under Section 118 Cr.PC shall if so required allow his measurements and photographs to be taken by a police officer in the prescribed manner.

Section 4: Empowers police officers for taking fingerprints of non-convicted arrested persons in connection with an offence punishable with RI for one year or more.

Section 5: Empowers a magistrate of first class to order a person to give his Finger Print for the purpose of any investigation or proceedings.

Section 6:

- i) Empowers the use of necessary means to secure the fingerprints of any person who resists or refuses taking of fingerprints.
- ii) Resistance or refusal is deemed to be an offence u/s 186 IPC.

Section 7: Deals with destruction of finger print slips on acquittal or on discharge or on release without trial.

SCHEDULE OF OFFENCES FOR TAKING FINGER IMPRESSIONS AS PER CFPB MANUAL

As per OM No. 115/POLICE (L)/ 55 (8) Intelligence Bureau, Ministry of Home Affairs, Government of India, Dated 19.02.1955, on the subject of 'Establishment of C.F.P.B and instructions to be followed by State Bureaux and District Police officers in sending F.P. record

slips', mentions about the G.O. No. 37/223/55-piii Dated 5.12.55, which incorporates the procedure to be adopted for taking finger impressions of all persons convicted of any offence mentioned in the schedule of offences.

Finger Print slips of the following persons will be recorded at the Central Finger Print Bureau:

- 1) All persons convicted of offences under chapter XII to XVII IPC which are punishable with rigorous imprisonment for a term of one year or more.
- 2) All persons convicted of any offence under Chapter VI IPC or of sabotage and subversive activities against State.
- 3) All persons convicted of offences under section 170, 302, and 304 (murder for gain), 328, 338, 465 to 477A, 489A to 489D IPC.
- 4) All persons convicted under the Arms, Opium and State Excise acts who are suspected to be smugglers in Arms, Opium by dangerous drugs as defined in the Dangerous Drugs Act (Act II of 1930) or entailing enhanced punishment on reconviction .
- 5) All persons convicted of smuggling gold, currency and valuable articles under Foreign exchange Regulation Act VII of 1947.
- 6) All persons ordered to execute bonds under sections 109 and 110 CrPC (for offence against property only).
- 7) All traffickers in women and children who are convicted under section 363 to 373 IPC.
- 8) All persons convicted under section 5 of Act LXXIV of 1950 for unlawful possession of telegraph wires.
- 9) All persons convicted under section 3 of Ordinance XIX of 1944 for unlawful possessions of Railway Stores.
- 10) All professional criminals and persons of dangerous character externed from any area under any state Act.
- 11) All foreigners externed under Foreigners Act XXXI of 1946.
- 12) All approvers in gang dacoity and criminal conspiracy cases.
- 13) All persons suspected of being professional itinerant criminals and persons of notoriously criminal reputation who habitually absent themselves from their homes and are believed to travel to other states for the purpose of committing crime and who have been arrested by police and whose finger prints have been taken, even if they are acquitted provided that in

case of acquittal permission for record for finger prints is obtained from the court under section 7 of Act XXXIII of 1920.

- 14) All persons convicted for attempt or abetment (sec 511 or 109/114 IPC) and criminal conspiracy (sec 120B IPC) for offences mentioned in this schedule.
- 15) All Indian nationals convicted outside India of any offence for which finger prints have been received at the State Bureau from those countries.
- 16) All International criminals and absconders whose finger prints are sent to the State Bureau from countries outside India.
- 17) All persons convicted under explosive Substances Act (Act VI of 1908).
- 18) All persons convicted under the official Secrets Act (Act XIX of 1923).
- 19) All persons convicted under sec 101, 126 and 128 of the Indian Railways Act (Act IX of 1890).
- 20) Any other person whose finger prints are ordered to be maintained by the Govt. of India from time to time, subject to the provisions of the Identification of prisoners Act (act XXXIII of 1920).

Note: The taking of finger prints of persons who are local men and convicted of offences of trivial nature will be subject to the discretion of the Supdt. of Police of the district concerned.

IMPORTANT COURT VERDICTS ON FINGER PRINT EVIDENCE

1. Supreme Court Ruling of 1961 : [State of Bombay Vs. Kathikalu Oghad AIR 1961 SC 1808]

A thumb impression of an accused taken by the police in course of investigation which was later on produced at the trial did not amount to testimonial compulsion under Article 20(3) and was not on that account inadmissible. It held that the application of finger prints in the identification of persons does not violate the fundamental rights under Article 20(3) of the constitution. It was further held that to be a witness in its wider sense means giving an oral or written statement but does not amount to exposing a part of the body for the purpose of identification.

2. Supreme Court Ruling of 1972 : [AIR 1972 SC 975]

“The comparison and identification of finger prints has developed into a science and the results derived there from have reached a stage of exactitude. As long as the report shows that the opinion was based on observations which led to a conclusion, such opinion can be accepted.”

“Unless there is a doubt as to the correctness of the opinion, the report of the examiner may be accepted without examination of the expert.”

3. Supreme Court Ruling of 1978: [Mohanlal Vs. Ajit Singh AIR July 1978 SC 1183]

The Hon'ble Supreme Court ruled that an opinion based on 08 identical ridge characteristics was fully justified and conformed to the views expressed in scientific books on the subject.

“Nothing substantial has been urged to challenge the opinion of the director of the Finger Print Bureau and all that has been argued is that as there were only 8 points of similarity, there was not enough basis for the expert's opinion about the identity of finger prints. Reference in this has been made to B.L Saxena's 'Identification of handwriting, disputed documents, finger prints, foot prints and detection of forgeries' (1968 edition, page 247), Walter R. Scott's 'Finger print mechanics' (page 62) and M.K. Mehta's 'The identification of thumb impression and the cross examination of finger print experts' (second edition, page 28). We have gone through these books but they do not really support the argument of the learned counsel for the respondent. While referring to the old practice of looking for a minimum of 12 identical characteristic details, Saxena has admitted that the modern view is that 6 points of similarity are sufficient to establish the identity of finger prints. Walter Scott has stated that as a matter of practice most experts who work with finger prints constantly satisfy themselves as to the identity with 8 or even 6 points.” The larger surface of the fully rolled impression not only allows accurate classification but it also gives more points for comparison. (For representative purpose only)

4. Supreme Court Ruling of 1979: [Jaspal Singh Vs. State of Punjab AIR 1979 SC 1708]

“The science of Finger print identification is an exact science and does not admit of any mistake or doubt.”

Annexure-III

Recommendations of XXI All India Conference of Directors of FPBx held on online platform Webex on 13th & through 14th October, 2020

1. NAFIS:

- a. NCRB informed that two rounds of NAFIS User Acceptance Test have been conducted and installation of NAFIS equipment in the State FPB/Districts/Commissionarete is in progress. It was informed that post Go-Live, criminals can be taken to nearby District Hqs for live enrolment through Fingerprint Enrolment Device(FED) while the fingerprints of other criminals obtained in paper have to be sent to District Hqs for digitization.
- b. NCRB explained the functions of enrolment Operator, Chance print Expert and Administrator under NAFIS. All States/UTs were requested to identify the officials for performing these activities, so that necessary training can be imparted to them.
- c. Karnataka informed that in their AFIS(NEC system), it is possible to send good ten prints directly to database and only poor prints are being checked by FP Experts. NCRB clarified that such a provision exists in NAFIS also.
- d. Regarding the replication of State AFIS data into NAFIS, it was informed that Solution Provider is yet to develop the required bridge software. Advanced States were requested to send their specific requirements for incorporating the same in the bridge software.
- e. All States/UTs were requested to extend the necessary support to the NAFIS Solution Provider by arranging the office space, stable power supply, network connectivity in the Districts, Commissionarete and State FPBx for smooth commissioning. Regarding final sign off, NCRB informed that detailed guidelines will be shared to the NAFIS Nodal Officers along with check-list.
- f. On a question about FED procurement for the police stations etc, NCRB informed that issue will be taken up in phase-II which is immediately after the NAFIS is made operational.

(NCRB, States, UTs)

2. Director of FPB should be a FP expert:

The Conference deliberated as whether Fingerprint Bureau needs to be headed by only FP expert. The house was informed that the decision on the issue had already been unanimously taken in XX Conference and accordingly, NCRB has sent an advisory to all the states. Some of the state delegates reported that Director post remain vacant for substantial period and it was unanimously decided that NCRB should send an advisory to fill the vacant post of Director early.

(NCRB)

3. **Modernization of FPBx:**

Conference discussed about the difficulties experienced in getting funds under Police Modernization scheme for Fingerprint equipments. It was suggested that NCRB should take up the matter with MHA for allocating certain funds exclusively for procurement of Fingerprint equipment under Police Modernization scheme keeping in view the necessity to modernize the Fingerprint Laboratories. NCRB informed that there is flexibility for States in asking assistance under any or many of the heads and earmarking of funds under specific heads may not be a good idea.

(NCRB)

4. **Regulation of Private experts:**

NCRB informed that a committee was constituted under the chairmanship of Joint Director (CCTNS), NCRB with members from Punjab, Haryana, Maharashtra, Delhi and Himachal Pradesh, for examining a legal sanctity of private fingerprint experts giving opinion in different Courts under Section 45 Indian Evidence Act. It was informed that due to COVID not much of progress was made. Conference resolved that the same committee may continue and finish the task.

(NCRB, Punjab, Maharashtra, Haryana, Delhi and HP)

5. **FP Records of Arrestees:**

Few delegates expressed the necessity to follow uniform procedure across the country for arrestee slip maintains as some States are removing the slips immediately after furnishing the previous criminal antecedents whereas others are retaining such slips. Conference decided that, FP slips of arrested persons should be retained until there is request from the concerned authorities for removal of such slips or information regarding details of acquittal is received.

(NCRB, States/UTs)

6. **Format of Document Cases:**

Participants expressed that all FP Exerts are not following the same format for giving the opinion on document cases. In this regard, NCRB informed that a document cases module is being implemented in NAFIS which is expected to resolve the problem. All FP Experts were requested to test this module after NAFIS roll out and offer feedback so that uniformity can be achieved.

(NCRB, States/UTs)

7. **Manpower:**

NCRB requested States/UTs to fill up the vacant posts before NAFIS commissioning, so that NAFIS can be optimally put to use. Certain States/UTs delegates informed that they are facing issues in filling the vacant posts in their States/UTs and requested NCRB/MHA to send an advisory in this regard.

(NCRB)

8. **Research:**

Conference deliberated about Fingerprint Bureaux taking post graduate students and research scholars for internship by providing some financial support. Conference suggested that NCRB may explore this area for encouraging such research.

(NCRB)

9. **Training:**

- a. **Refresher course for Photographers:** Director, Goa and other SFPBx requested to organize refresher course for chance print photographers of their Bureaux. The matter was discussed in previous conference also but due to statewide lockdown and COVID restrictions the matter could not be perused. NCRB offered to explore the options of organizing such courses in consultation with NICFS.
- b. **Fingerprint Training on Modern Chemical Methods:** Delegates suggested that NCRB may conduct Training on new chemical methods of fingerprint development. NCRB informed that suitable action will be taken on the matter after the pandemic situation improves.
- c. **Fingerprint Training on Proficiency course:** Conference deliberated about the syllabus, content, duration of the Proficiency course on Fingerprint Science that is being conducted at CFPB, Kolkata. There was a suggestion that participants may be taken to CFPB, New Delhi for demonstration of the facilities available at New Delhi. NCRB informed that visit to SFPB of West Bengal in Kolkata can be organized.
- d. **Fingerprint Training on rare prints:** A demand was raised on in-depth study on forged, overlapped and/or damaged finger prints and such training in the CFPB training programs. Similarly advance training on Finger Print Science and/or exposure to important cases handled by legal Experts/Lawyers may be included so that the FP officers can gain insights and successfully provide evidence in the court. On this matter, state experts having exposure on such cases may volunteer themselves for such specialized training or alternatively NCRB may explore the possibility of arranging retired experts in this field to impart such training. It was also suggested that a lawyer well versed with evidence on fingerprint science may be arranged for a talk to prepare the experts in facing the courts.
- e. **Training in Foreign Countries:** There was a demand from the house that opportunities should be explored for training opportunities in foreign countries for international

exposure on fingerprint science. Conference resolved that States/UTs will identify the courses and inform NCRB for initiating necessary action on this matter.

(NCRB/States/UTs)

Annexure-IV

**SANCTIONED AND POSTED STAFF STRENGTH IN PROMINENT STATE FPBx AS
ON 31.12.2020**

This annexure gives overview of staff position in prominent State Finger Print Bureaux functioning in the country.

1. ANDAMAN & NICOBAR

Sl. No.	Post	Sanctioned Strength (SFPB, Zone/Range/Distt.)	Posted Strength (SFPB, Zone/Range/Distt.)	Vacancy
1.	Director/S. P.	00	01	00
2.	DSP, FPBx	00	00	00
3.	Sub-Inspector	00	00	00
4.	Head Constable	00	00	00
5.	Constable	00	00	00
	Total	00	01	00

2. ANDHRA PRADESH

33. **CHANDHIGARH**

❖ No Finger Print Bureau

34. **DADRA& NAGAR HAVELI**

❖ No Finger Print Bureau

35. **DAMAN& DIU**

❖ No Finger Print Bureau

36. **LAKSHDWEEP**

❖ No Finger Print Bureau

The numbers of sanctioned, posted staff and vacancies may be taken as indicative, because in some Bureaux there is more staff posted than actually sanctioned position, thus the value of vacancy too may not be correct

Annexure- V (a)

National Automated Fingerprint Identification System (NAFIS) Overview

The NAFIS software serves as the key application for Fingerprint experts/personnel for performing crime and criminal investigation functions. It shall function as the central information repository of all the crime and criminal related fingerprint data of the country. The national level NAFIS solution would be implemented and managed by the Central Fingerprint Bureau (CFPB) at NCRB, New Delhi.

❖ **Mission**

- Establish a robust online searchable National database of Fingerprints from all States/UTs that primarily functions as a central information repository for identifying criminals using fingerprint & palm print data.

❖ **Key Objectives**

- To provide standards based, interoperable, online, fast and accurate biometric enrolment and search services for the national as well as state levels.
- The system would have configurable virtual partitions which can be accessed by each State/UT and Central agencies.
 - State/UT/Agency level (within the virtual partition)
 - Selected Units (Selection option to be provided across Units)
 - National Level (Complete Repository across all Virtual Partitions)

National Fingerprint Number (NFN):

A unique fingerprint reference number is assigned by NAFIS.

- NAFIS assigns a unique 10 digit NFN for each criminal based on biometrics
- Multiple incidents, one ID
 - One unique ID for the lifetime of a criminal
 - Different crimes registered under different FIRs as incidents belonging to same NFN
- State Ownership
 - Each criminal registered in a particular state has first 2 digits of state code, followed by a sequence number
 - State partition will have IDs belonging to state (e.g. UP00001234, MP00000007)

Applications Under NAFIS:

MBIS: Morpho Biometric Identification System

Morpho BIS (or MBIS) is an automated biometric identification system (or ABIS) that allows acquisition, storage, and search of biometric data of persons (like prints, portraits).

To achieve this, the system is capable of managing:

- Persons, enrolled with rolled and flat fingerprints, palms, portraits as well as descriptive data (civil status, context of the arrest, ...),
- Criminal cases composed of latent prints found on the scenes of crime and their descriptive data (context of the crime, description, etc.).

MBIS also consists of Central Viewer tool, which is used to access reports, define thresholds, check system status, record counts, quota, licenses, CV agent tools, define users and groups, decision logic, LSS registration. However, most of the functions are available only to administrator and basic user can view only System status, access reports, record counts and quota.

MESA: Morpho Enrolment Software Application.

- MESA is a live enrolment application which captures biometrics (fingerprints, palm prints and face etc.) and it requires demographics data to do live enrolment of a person.
- Quick search is used to launch search with two thumbs to get possible HIT or NOHIT results from the national criminal database of thumbs.
- MESA application is integrated with NAFIS (National Automated Fingerprint Identification System) solution which performs searching and matching of live fingerprints or palm prints.

Bio Search (Mobile App):

- NAFIS Bio Search is an Android application to perform national level fingerprint search with two fingers, which is also called Fast ID Search.
- It integrates with the National AFIS solution, which is an initiative of National Crime Records Bureau (NCRB) and Central Finger Print Bureau (CFPB).
- Its users must be authorized to use the application and can perform Fast ID search using single fingerprint scanner (MSO device) to get possible HIT or NO HIT results from the national criminal database of fingerprints.
- Users of this android application will be Police Personnel who are on duty in the field. This application will be used pan-India.
-

Alfresco Share – A DMS Solution for NAFIS:

Document Management System helps to store, access, manage, control and track electronic documents and electronic images of paper-based information that has been captured through document scanning technology. Document Management System is similar to what you use for personal use to store files by organizing them in folders. Some well-known applications are: Drop box, Google Drive etc.

- Alfresco makes it easy to quickly locate the exact NAFIS document they need from among many thousands of files, in their document management system.
- Easily find, share and secure all important files such as Digitized Slips, etc.
- Files can be easily searched for and downloaded for offline use. Helps in version controlling of the newly uploaded and edited files.

**Annexure-VI****LIST OF TOPPERS OF ALL INDIA BOARD FOR EXAMINATION OF F.P. EXPERTS (AIBE) FROM
1963 TO 2020**

Year	No. of Persons Qualified	Name	State
1963	27	Sh. T.A. Jose	CFPB
1964	08	Sh. B.N. Sahai	Bihar
1965	22	Sh. M.N. Sinha	Bihar
1966	27	Sh. K.P. Sinha	Bihar
1967	35	Sh. K. Laxma Reddy	Andhra Pradesh
1968	38	Sh. S.M. Singh Bhalla	Punjab
1969	19	Sh. V. Muthu Karuppan	Madras
1970	27	Sh. D. Narsimha Murthy	Andhra Pradesh
1971	43	Sh. S.J. Pathak & Sh. M.K. Mody (Joint)	Gujarat
1972	30	Sh. P.K. Ghosh	West Bengal
1973	36	Sh. Sisir Chakrabarti	CFPB
1974	48	Miss S.N. Aryambal	Tamil Nadu
1975	39	Sh. P.D. Narkar	Maharashtra
1976	23	Sh. Iqbal Ahmad Usta	Rajasthan
1977	13	Sh. Shuja Shafquat	J&K
1978	99	Sh. K.S. Dhaliwal	CFSL New Delhi
1979	55	Sh. V.P. Sharma	CFPB
1980	70	Sh. Gopal Krishna Mishra	Odisha
1981	62	Sh. B. Venugopal Nair	Kerala
1982	41	Sh. V. Nageswara Rao	Tamil Nadu
1983	48	Sh. T. Jayashankar	Tamil Nadu
1984	61	Sh. R. Rajendran	Kerala
1985	16	Sh. K. Madhusudan & Sh. Pirthipal Singh (Joint)	Kerala & Punjab
1986	68	Sh. Suhas Mitra & Sh. Narayan Prasad (Joint)	CFPB & Haryana
1987	41	Sh. J.K. Kaushik	Delhi
1988	52	Sh. Amar Pal Verma	Delhi
1989	46	Sh. Nar Singh	Haryana
1990	77	Sh. B. Yeshwant Khedekar	Maharashtra

1991	66	Sh. Ajay Gadkary	CFPB
1992	34	Sh. S.S. Baisoya	CFPB
1993	44	Sh. Mukhtiar Singh	Punjab
1994	36	Mrs. Savita Devi	Odisha
1995	25	Sh. P.K. Mishra	CFPB
1996	26	Sh. Birja Prasad Samal	Odisha
1997	26	Sh. Giri Raju	Karnataka
1998	22	Sh. Darshan Singh	Punjab
1999	42	Smt. Manjit Kaur	Punjab
2000	28	Smt. Harbhajan Kaur	Punjab
2001	38	Sh. Manjeet Kumar Viridi	CFPB
2002	29	Smt. Anita Kadam	Madhya Pradesh
2003	22	Smt. Mousumi Doloi	Odisha
2004	11	Sh. Manoj Kumar	Delhi
2005	22	Sh. K. Jayan	Kerala
2006	37	Sh. Ranbir Singh	Haryana
2007	11	Smt. Neelam,	Haryana
2008	23	Sh. Ram Partap Rai	Punjab
2009	37	Sh. S. Arun Kumar	Kerala
2010	21	Sh. Shibhu Raj M.S.	Kerala
2011	42	Smt. M. Hema	Tamil Nadu
2012	21	Sh. V. V. Vivekanandan	Kerala
2013	45	Sh. Jagpal Sharma	J & K
2014	10	Sh. Rajesh Kumar R.	Kerala
2015	157	Sh. Y. Pavankumar Reddy	Andhra Pradesh
2016	66	Ms. Ruchi Raghuvanshi	M.P.
2017	10	Sh. Ajesh K V	Kerala
2018	112	Sh. Rejani Raj V R	Kerala
2019	41	Sh. Sudheesh K.V	Kerala

**LIST OF BOOKS ON FINGER PRINT SCIENCE**

Sl. No.	Title of the Book	Author	Year of Publication
I. FUNDAMENTALS OF FINGER PRINT SCIENCE			
1	Fundamentals of Finger Print Analysis	Hillary Moses Daluz	2014
2	Fingerprints: Analysis and Understanding	Mark Hawthorne	2008
3	Fingerprints and Other Ridge Skin Impressions	Christophe Champod, Chris J. Lennard, Pierre Margot, Milutin Stoilovic	2004, 2016 (2 nd edi.)

No.CFPB(105)/NAFIS-IMP/11/2019-NCRB Dated: 18/ 06/2020

Dear Vivek,

Please refer to your DO. No. 21011/36/2020-PM.1 dated 05.06.2020, wherein it has been requested to freeze the technical specifications of the Automatic Finger Print Identification System (AFIS) to help States in procurement and installation in Police Stations.

Under the National Automated Finger Print Identification System (NAFIS) which complies NIST standards, expert workstations and Finger Print Enrollment devices (FEDs) are being installed at all the State Finger Print Bureaus and in all Police Districts and Commissionerates. The procurement and installation of FEDs in Police Stations is likely to be taken up in the second phase of the NAFIS project.

The present NAFIS architecture also allows the States to have their own NIST compliant AFIS system and their data can be replicated to NAFIS. States like Delhi, Telangana, Andhra Pradesh, Maharashtra and Karnataka are following this model.

Further, States may also procure NIST compliant Fingerprint Enrolment Devices (FEDs) on their own for Police Stations. However, vendors supplying FEDs must configure their solution in such a manner that NIST compliant Finger Print data should be made available to NCRB Hqrs on near real time basis. I am also enclosing specifications of FED and approximate cost of a unit supplied by NAFIS vendor to NCRB, for your information.

We would be happy to provide any further assistance.

With warm regards,

Yours sincerely,

18/6
(Ram Phal Pawar)

Shri. Vivek Bharadwaj, IAS
Additional Secretary,
Ministry of Home Affairs,
Jaisalmer House,

Annexure

Supply, installation and commissioning of FED to Police Stations

In the first phase of National Automated Fingerprint Identification System(NAFIS) Project, NCRB has supplied all the equipment required for the Fingerprint Expert and the objective of second phase is to provide Fingerprint Enrolment Devices(FED) to the police stations. Broad scope of the work in this phase will be:

- (a) Fingerprint Enrolment Device(FED) of the type 4-4-2 is to be installed and commissioned in each and every police station.
- (b) FED should have a provision to take slap & rolled prints.
- (c) FED should be Federal Bureau of Investigation Appendix – F certified and NIST compliant.
- (d) FED should be connected to the existing CCTNS workstations in the police station through USB Port
- (e) Operating System(OS) of the CCTNS work station may be Microsoft or open source. But within the State, all police stations are operating in the same OS. Accordingly solution provider have to customize their enrolment software.
- (f) Fingerprint Enrolment should be off line. That means Network is not required for enrolment. Further it should have standard features like while enrolling rolled prints, it should detect mismatches, configurable mandatory fields etc.
- (g) Existing bandwidth of CCTNS network from police station to State Data centre is adequate for transferring fingerprint data. However, solution provider may inspect and satisfy that they can transfer Fingerprint data with the existing CCTNS bandwidth. National Knowledge Network(NKN) connectivity is used from SDC to centre.
- (h) Inter Connectivity Document (ICD) specifying the details of the fields that needs to be captured while enrolling fingerprints can be downloaded from the NCRB website. It is the responsibility of the solution provider to transfer the fingerprint data captured at the Police station to NCRB Hqrs(NAFIS) in this specified format. NAFIS will consume this data and place the same in the corresponding NAFIS virtual partition allotted to the State.
- (i) Already CCTNS data is being replicated to NCRB Hqrs on near real time basis between SDC and centre. Solution provider have to utilize the existing CCTNS connectivity but it is optional for the solution provider to use the CCTNS server space at State Data Centre or to install their own hardware.
- (j) Software provided under this project should be open licence and not machine dependant. It is further clarified that if police station replaces the work station, then that police station should be in a position to install the software without depending on the solution provider.

D.O. No. CFPB(105)/NAFIS-DM&R/11/2020-NCRB

Dated: 6th July, 2020

Sub: **Migration of State FP Data to NAFIS**

Dear Sir,

As you are aware, National Automated Fingerprint Identification system Project (NAFIS) is being implemented by NCRB in the country. The System Integrator for this project, M/s Smart Chip Private Limited has already supplied Work Stations, Fingerprint Enrollment Devices (FEDs) and other peripheral equipment to all District Police Headquarters, Police Commissionerates and State Fingerprint Bureaus across the country and also doing the work of digitization of legacy fingerprint data, if any, available in physical slips in States/UTs.

2. Since some States/UTs (list enclosed) were already using their own AFIS, and thus having digitized data, M/s Smart Chip has been asked to develop a software utility to migrate this digitized FP data to NAFIS database. It is, however, learnt that AFIS operational in your state earlier is now not being maintained by the System Integrator of your State. In order to extract the digitised FP data from your State AFIS, and develop software utility to migrate it to NAFIS database, assistance of AFIS-SI of your State would be needed.

3. I, therefore, request you to direct the concerned officers to make available appropriate technical support as mentioned above. Alternatively, the physical FP slips available in the State could also be sent to NCRB for digitization once again.

With regards,

Yours sincerely,

6/7/2020
(Ram Phal Pawar)

Director General of Police,
(As per List)

Glossary

- ❖ **AMPUTATED-** The removal of a limb or other body extremity by trauma, prolonged constriction or surgery.
- ❖ **ARTIFACT-** Any distortion or alteration not in the original friction ridge impression produced by an external agent or action. 2: Any information not present in the original object or image inadvertently introduced by image capture, processing, compressions, transmission, display, or printing. (SWGFAST2011)
- ❖ **AUTOMATED FINGER PRINT IDENTIFICATION SYSTEM (AFIS)-** An automated, minutiae-based identification system that may consist of two or more distinct databases comprising two-finger identification records and ten-finger latent cognizant records (records of individuals more likely to be found at crime scenes, for example, burglars). 2: A computer-based system for reading, cataloguing, searching, matching, and storing fingerprints and related data. (ANSI/IAI) 3: A generic term for a Finger Print matching, storage, and retrieval system. (SWGFAST2011)
- ❖ **ACE-V-** The process for identifying latent fingerprints, which involves Analysis, Comparison, Evaluation, and Verification:
 - a. Analysis is the qualitative and quantitative assessment of Level 1, Level 2, and Level 3 Details to determine proportion, interrelationship, and value for individualization.
 - b. During Comparison, the latent print examiner looks at the attributes noted during analysis for differences and agreement between the latent print and the known exemplar.
 - c. Evaluation follows extensive comparison by making a determination if two impressions were made by the same source, not from the same source, or if the information is inconclusive. (A determination is made as to the results of the Comparison process. The Finger Print community accepts three conclusions: (a) the latent print and known exemplar were made by the same source, (b) the latent print and known exemplar were not made by the same source, or (c) a conclusive comparison could not be determined. This could be due to a lack of comparable area in the known exemplar or lack of clarity due to improperly

recorded known exemplars.)

d. Verification occurs when a second qualified examiner does an independent assessment of the latent print and known exemplar, utilizing the ACE process.

- **ALGORITHM-** Mathematical routine used in computer processing. In AFIS processing, the matcher algorithm searches for relationships between the search print and ten-print. 2: Mathematical routine used in computer processing, e.g., an AFIS matching algorithm establishes the correlation of Level 2 Detail between fingerprints. (SWGFAST). 3: A step-by-step computational procedure for solving a problem. The system computer and other system components use algorithms to make decisions required to process and handle information.(ANSI/IAI)
- **ANSI/NIST STANDARD-** Standard proposed by NIST and adopted by ANSI. For example, the ANSI/NIST-ITL standard Data Format for the Interchange of Fingerprint, Facial & Other Biometric Information is used by law enforcement, intelligence, military, and homeland security organizations throughout the world. The first version of this standard dates to 1986. Over the years, it has been updated and expanded to cover more biometric modalities beyond the original record type of Finger Print minutiae. (NIST)
- **BACKGROUND DISTURBANCE / INTERFERENCE-** A feature of the background (such as the texture or pattern) of the substrate (surface) that the mark is left on, which affects the appearance and resultant interpretation of the friction ridge flow or ridge details.
- **CADAVER-** A deceased person.
- **CHANCE PRINT OR SCENE OF CRIME PRINT-** means any chance or accidental impression left by friction ridges skin on a surface, regardless of whether it is visible or invisible at the time of deposition.
- **DISPATCH CHEQUE-**The details in triplicate prepared by the State Bureaux containing Name, Parentage of the convicts and Cheque No., Date and District of Origin of Finger Print Record Slips for forwarding the Finger Print Record Slips to other Bureaux are called Dispatch Cheques/Invoice.

- **DATABASES-** Collections of data and associated material designed to provide information rather than for archive, which are stored systematically in hard copy or electronic format and are, e.g. used for: providing information on the possible origin of objects or substances found in casework; and/or providing statistical information.
- **EDGEOSCOPY-** Study of the contour or shape of the edges of friction ridges.
- ❖ **EXPERT (CFPB)-** 'Expert' means an officer working in the CFPB having undergone thorough training in classifying, recording & searching of F.P. Slips and examining of latent and documentary prints either in any State Bureau or at the Central Finger Print Bureau and having a Finger Print expert certificate by clearing the All India Board for Examination of Finger Print Experts.
- ❖ **EXEMPLAR-** An impression or image of friction ridge skin purposely collected with the knowledge of the subject. 2: The prints of an individual associated with a known or claimed identity deliberately recorded electronically, by ink, or by another medium (also known as known prints). (SWGFAST 2011)
- ❖ **ELIMINATION FINGERPRINTS-**Finger Print images taken from persons with legitimate access to evidence under examination for latent fingerprint. 2: Exemplars of friction ridge skin detail of persons known to have had legitimate access to an object or location.
- ❖ **GRAY-SCALE IMAGE** -An image using more than two radiometric values, i.e., 256 shades of gray in an 8-bit image. Not a strictly black/white image.
- ❖ **HENRY CLASSIFICATION-** an alphanumeric system of Finger Print classification named after Sir Edward Richard Henry used for filing, searching, and retrieving ten-print records.
- ❖ **FINGER PRINT SLIP FOR RECORD-** The form containing 10-digit rolled impressions and plain prints taken in proper sequence for record with particulars regarding name, parentage, residence, conviction, etc. of a convict is called a Finger Print Slip for record.
- ❖ **FINGER PRINT SLIP FOR SEARCH-** Similar form with 10 digit impressions when used for

search to trace previous conviction from the record of the Bureau is called Finger Print slip for search.

- ❖ **INKED FINGER PRINT**- the Intentional recording of the friction ridge skin. Using black printer's ink and a Finger Print roller, the ridge characteristics of a particular individual, can be formally recorded on a standard Finger Print card.
- ❖ **INTERPOL**- Originally the International Police Commission, established in 1923 with the first headquarters in Vienna, Austria. With the General Secretariat now in Lyon, France, Interpol focuses on international crimes that threaten public safety, especially those involving terrorism, criminal organizations, drugs, finances and technology, and trafficking in human beings, and provides fugitive investigative support.
- ❖ **LATENT (Chance print)/LATENT SEARCH**- A search of a latent print against other latent prints, which are usually stored in the Unsolved Latent File, and which has the potential to link crimes committed by same person, even though that person is as yet unidentified. Also referred to as a latent/unsolved latent search.
- ❖ **LIVESCAN**- "Live scan" is an electronic biometric platform for capturing, storing and transmitting friction ridge detail.
- ❖ **MINUTIAE DATA**- The data representing the relative position, orientation, and in some cases, the relationship and/or types of the minutiae in a Finger Print image.
- ❖ **NATIONAL INSTITUTE OF STANDARDS AND TECHNOLOGY**- Formerly known as the National Bureau of Standards, this division of the U.S. Department of Commerce ensures standardization in non-defense government agencies.
- ❖ **PATTERN CLASSIFICATION**- Characterization of a Finger Print as containing one of seven Finger Print patterns: arch, tented arch, right-slant loop, left-slant loop, whorl, amputation, or scar. The Integrated Automated Finger Print Identification System will provide for both pattern level and Henry classifications.
- ❖ **SCANNER**- Capture device to create a digital image. New scanners that connect to the

Finger Print Work stations must meet the standards outlined in Appendix F of the Electronic Biometric Transmission Specification.

- ❖ **SPECIAL AND LOCAL LAWS-** These are Acts that are framed by the state government for specific issues.

TEN-PRINT- A Finger Print card (or Finger Print card equivalent) containing rolled and plain impressions from the ten fingers of an individual. The standard format contains 14 impressions: one rolled Finger Print impression of each finger, plain Finger Print impressions of each thumb, and plain impressions of the four fingers of each hand simultaneously.

- ❖ **TEN-PRINT IMAGE SEARCHES-** An electronic transaction submitted to the Central/State Finger Print bureau's data base, which contains fingerprint images, classification information as required by the Automated Fingerprint Identification System, or remotely extracted fingerprint characteristics. The subsequent search will be conducted automatically with no additional manual editing or processing. If candidates are identified, the candidates' PIN Numbers are returned to the transmitting agency along with fingerprint images from the highest scoring candidates.
