MESSAGE

I am delighted to note that National Crime Records Bureau is publishing the 29th edition of the annual statistical publication "Prison Statistics India" for the year 2023. This report offers an in-depth statistical analysis of different aspects of prison systems and their management. The data presented is vital for conducting a thorough examination of correctional administration in our country and for shaping effective policies.

2. I express my sincere appreciation to the Heads of Prison Departments of all States and Union Territories for their prompt and cooperative response in providing the required information for the publication. I would also like to commend the Director, NCRB and his team for their excellent work in collecting, collating and publishing the report.

(Govind Mohan)
